QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
E. PONSONBY, 116, GRAFTON-STREET, DUBLIN; or
EYRE AND SPOTTISWOODE, EAST HARDING-STREET, FLEET-STREET, E.C.; or
OLIVER AND BOYD, EDINBURGH.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1903. **Births & Deaths:**—JAN., FEB., MAR., 1904

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 26,715 births—a number equal to an annual birth-rate of 24·3 in every 1,000 of the estimated population*—and 24,368 deaths, representing an annual rate of 22·2 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,487 persons emigrated.

In England last quarter, the birth-rate represented was 28·4 in every 1,000 of the estimated population, and the death-rate 18·2 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 over the average rate for the corresponding quarter of the ten years 1894–1903, and 0·9 over the rate for the first quarter of 1903. The deaths are 1,275 over those registered in the corresponding quarter of 1903; the death-rate is 1·3 above the rate for that quarter, and 0·4 above the average for the first quarter of the ten years 1894–1903.

* See page 80.

2 Registration of Marriages, Births, and Deaths, Ireland.

Compared with those for the corresponding quarter of 1903, the returns of pauperism, furnished by the Local Government Board, show an increase of 178 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,222 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1894-1903, the number of Workhouse inmates shows an increase of 992, and the number of persons on out-door relief shows a decrease of 1,920, the total under both heads being 0·9 per cent. below the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·3 per cent.

The annual marriage-rate (4·6 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1903 is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 31st December, 1903, and by the Births and Deaths registered in the Quarter ended 31st March, 1904.

The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast, are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (), page 18.

MARRIAGES.

The marriages (5,073) registered in Ireland during the fourth quarter of 1903 are equivalent to an annual rate of 4·6 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of 1902, but equal to the average rate for the fourth quarter of the ten years 1893–1902. The total number of marriages registered during the year was 22,484, or 5·1 per 1,000 of the population, being 0·1 over the average rate for the preceding ten years; 16,044 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 6,440 under the 7 and 8 Vic., cap. 81; the former number being equal to 4·9 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·7 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·3, but that under the latter a decrease of 0·4. Of the 22,484 marriages registered last year, 7,022 were registered in the first quarter, 5,176 in the second, 5,213 in the third, and 5,073 in the fourth.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 26,715—13,800 boys and 12,915 girls—being equal to an annual ratio of 1 in every 41·2, or 24·3 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1894–1903 was 26,791, equivalent to an annual rate of 23·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·9 per 1,000 of the population according to the Census of 1901; Munster, 23·5; Ulster, 24·4; and Connaught, 24·0.

The highest county birth-rate* is 32·4 for Dublin Co. Borough, and the lowest 19·1 for Meath. Of the intermediate rates the highest five are—Belfast Co. Borough, 31·5; Mayo, 27·7; Kerry, 26·4; Limerick Co. and Co. Borough, 25·7; Londonderry Co. and Co. Borough, 25·1; and the lowest five are Queen's Co., 19·6; Wicklow, 19·8; Roscommon, 19·8; Tyrone, 20·1; and Carlow, 20·2.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 24,368—11,981 males and 12,387 females—affording an annual ratio of 1 in every 45·1, or 22·2 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1894–1903 was 21·8 per 1,000.

The death-rate in Leinster was 23·7 per 1,000 of the population according to the Census of 1901; in Munster, 20·4; in Ulster, 22·7; and in Connaught, 18·9.

The county death-rates* range from 15·5 in Kerry, to 31·3 in Dublin County Borough. Between these rates the lowest five are Roscommon, 17·4; Clare, 17·4; Mayo, 18·2; Cavan, 18·4; and Fermanagh, 18·6; and the highest five are—Belfast Co. Borough, 25·7; Armagh, 25·5; Wexford, 24·6; Tipperary, S.R., 23·6; and Westmeath, 23·3.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during the first quarter of the year 1904:—

1904.	24·3	22·2

*See note (a) on page 2.

Ages.—Of the 24,368 deaths registered last quarter, 2,930, or 12·0 per cent., were of children under 1 year old; and 11,369, or 46·7 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 109·7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12·6 per cent. of the total deaths registered therein; in Munster, 11·4 per cent.; in Ulster, 13·3 per cent.; and in Connaught, 8·0 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 42·2 per cent.; in Munster, to 48·0 per cent.; in Ulster, to 46·2 per cent.; and in Connaught, to 55·7 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 900, or less by 174 than the number occurring in the corresponding quarter of 1903, and is equivalent to an annual rate of 0·8 per 1,000 living, being 0·2 below the rate for the first quarter of last year, and 0·2 under the average rate for the first quarter of the ten years 1894–1903.

Small-pox.—Four deaths from small-pox were registered in Ireland during the quarter. Of these, two occurred in the Registrar's District of Achill, in the Union of Westport, and two in the Registrar's District of Ballylessen, in the Union of Lisburn. Of the four deaths from small-pox, one, an old man, had been inoculated in his youth, and had a good mark; another had been vaccinated in infancy, and had a faint mark; a third had been vaccinated in infancy, 41 years ago, and the fourth fatal case was that of an unvaccinated child, aged 5 years. In the year, 1903, the deaths from small-pox occurred as follows:—Four in the first quarter, 29 in the second quarter, 7 in the third quarter, and not one death in the fourth quarter of the year.

Measles.—The deaths from measles, 61 in number, are considerably less than those which occurred in the March quarter of 1903, when 291 deaths were registered. During the successive periods following in that year the deaths declined to 178 in June quarter, 79 in September quarter, and 60 in the December quarter. The deaths recorded from measles in the March quarter of the years 1900–1902 were 260, 168, and 82, respectively. There were twelve counties in which deaths from measles occurred. Nineteen deaths were registered in the County Borough of Dublin (of which figure 17 appertained to the Registrar's District of North City No. 3); 10 were registered in Cork County and County Borough, and 18 deaths were registered as occurring in the County Borough of Belfast.

Scarlet Fever.—The deaths from scarlet fever, 52 in number, show a decrease of 4 as compared with the number registered in the preceding quarter, and are also 7 below the average number of deaths from this disease for the corresponding period of the past 5 years. In the March, June, and September quarters of 1903, the deaths from scarlet fever were 69, 49, and 35, respectively. Of the 8 deaths registered in Dublin County Borough 4 appertained to the Registrar's District of South City No. 1.

Typhus.—Deaths from typhus registered during the quarter, 13 in number, were 12 below the average for the March quarter of the previous quinquennial period; they also show a decline of 11 as compared with the

* See note (t) on page 8.

December quarter of 1903. In the Union of Sligo 3 deaths were registered, in Dingle and Listowel in each two, and one death was recorded in each of the following Unions :—Ballinasloe, Cavan, Clifden, Glennamaddy, Kenmare, and Londonderry.

Whooping-cough.—The deaths from whooping-cough, 466 in number, constitute more than 50 per cent. of deaths from the diseases now the subject of review, and are equal to an annual rate of 0·4 per 1,000 of the population of Ireland, estimated to the middle of 1904. The total number of deaths exceed the average number registered in the corresponding quarter of the previous five years by 205, and is 214 over the number registered in the December quarter of 1903. In the March, June, and September quarters of 1903, the deaths recorded from whooping-cough were 287, 241, and 188, respectively. Of the total (466), it will be seen, from Abstract I., that 129 deaths were recorded in the province of Leinster, 77 in the province of Munster, 251 in the province of Ulster, and 9 deaths only appear to have occurred in Connaught. Of 101 deaths registered in Dublin County Borough, 53 appertained to the Northern districts, and 48 to the Southern districts, 25 deaths being registered in the Registrar's District of South City No. 4. Of 127 deaths from whooping-cough, registered in the County Borough of Belfast, 23 appertained to the Registrar's District of Belfast Urban No. 6; 17 deaths were registered in the Registrar's District of Limerick Urban No. 3; 7 in the Registrar's District of Crumlin (Antrim Union); 7 in the Registrar's District of Bellaghy (Magherafelt Union), and 6 in the District of Caher (Cahersiveen Union).

Diphtheria.—The deaths from diphtheria have increased from 77 in the preceding quarter to 79, but are below the average (100) for the corresponding quarter of the past five years by 21. The deaths registered from diphtheria in the first three quarters of 1903 were respectively. 115, 71, and 49.

Of the 79 deaths in the whole of Ireland for the quarter, 18 were registered in Leinster, 5 in Munster, 41 in Ulster, and 15 in Connaught.

Simple Continued and Ill-defined Fever.—Sixteen deaths were returned by the Registrars as being due to one or other of the causes included in this heading.

Enteric Fever.—The deaths attributed to enteric fever for the quarter in the whole of Ireland were 110 in number (equal to a rate of 0·10 per 1,000 of the population) the average number for the March quarter of the past five years being 142. In the four quarterly periods of the year 1903, deaths registered from enteric fever were, 107, 103, 98, and 116, respectively. The deaths in Dublin County Borough (29), Cork County and County Borough (6), and Belfast County Borough (21), in total 56, are more than 50 per cent. of all deaths occurring in Ireland.

The death-rate from enteric fever in the provinces is for Leinster 0·13 per 1,000 of the 1901 census population, for Munster 0·06 per 1,000, for Ulster 0·12 per 1,000, and for Connaught 0·06 per 1,000. Enteric fever caused one or more deaths in each county in Ireland, excepting County Longford, Queen's County, Westmeath, Wexford, Clare, Tipperary, N. R., Cavan, and Sligo. Of the 29 deaths in Dublin County Borough, 14 appertained to the North City districts, and 15 to the South City districts; in Belfast County Borough of the 21 deaths registered, 10 appertained to the District of Belfast Urban No. 4.

In the Registrar's District of Abbey in the Union of Tuam 5 deaths are reported.

Diarrhoeal Diseases.—The deaths ascribed to the diseases which are classified under this head were 99 in number. This figure is well below the average (169) for the corresponding period of the preceding five years, and is moreover less than half the number of deaths recorded from diarrhoeal diseases in the December quarter of 1903.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district, measles in 12 districts, scarlet fever in 23, whooping-cough in 60, diphtheria in 22, fever in 28 (typhus, 8, enteric, 19, and simple or ill-defined fever, one), influenza in 71; chicken-pox in one, and mumps in 15.

Inquests.—There were 602 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 40 of the total deaths registered.

In Leinster there was 1 inquest to every 40 deaths registered, in Munster 1 to 50, in Ulster 1 to 31, and in Connaught 1 to 88.

Deaths in Public Institutions.—Of the 24,368 deaths registered, 4,673, or 19·2 per cent., occurred in public institutions. In Leinster the percentage was 26·2, in Munster 23·3, in Ulster 13·4, and in Connaught 13·0.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1904, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple Continued Fever.	Enteric Fever.	Diarrhoeal Diseases.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of total population of the country, was 25·6, and the birth-rate 29·3 per 1,000 of the population according to the Census of 1901; in the remainder of the country the death-rate was 15·5 and the birth-rate 21·7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·5 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1904, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 2nd April, 1904.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1904, there were 16,425 persons successfully vaccinated; in 3,617 cases the operation was postponed, 21 children were reported as insusceptible of vaccination, and the deaths of 1,698 unvaccinated children under 3 months old were registered, making a total of 21,761 children with regard to whom particulars as to vaccination were ascertained.

† See note (1), page 8.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 3,487 (1,995 males and 1,492 females), being 666 less than in the corresponding quarter of the year 1903, and 920 under the average number for the first quarter of the ten years 1894-1903.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1903 and 1904:—

* Including 447 emigrants to the United States whose passages were paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{3}{4}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1903 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1894 it was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being $6d.$ under the average for the corresponding quarter of the year 1903. In the first quarter of 1894 the average price was $15s.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $3s. 7d.$ to $4s. 3d.$. In the first quarter of 1903 the average prices were $3s. 3d.$ to $4s.$, and the prices for the corresponding quarter of 1894 were $2s. 3d.$ to $3s. 1d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $47s. 6d.$ to $55s. 6d.$ per cwt. In the corresponding quarter of 1903 the average prices were from $54s. 9d.$ to $58s. 6d.$, and in the first quarter of 1894 they were from $42s. 6d.$ to $53s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter, was $19s.$ per ton nett.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 88\frac{3}{16}$, and the lowest $\pounds 85\frac{3}{16}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland remained at $4\frac{1}{2}$ per cent., to which it was raised from 4 per cent. on the 3rd September last.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1904 was 46,470, or 178 over the average for the corresponding period in 1903.

The average weekly number of persons receiving out-door relief during the quarter was 57,718, being 1,222 under the average for the first quarter of 1903.

Of the persons receiving in-door relief during the first quarter of 1904, an average number of 1,425 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1903 the average weekly number was 1,428.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1904, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first quarter of the years 1899–1904, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14) :—

The mean height of the barometer during the first quarter of 1904 was 29·768 inches, being ·105 below the average for the corres-

* Latitude 53° 21' 44·65" north; longitude 6° 21' 6·35" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1899–1903; the highest reading (30·775 inches) was on the 22nd January, at 9 A.M., air calm; and the lowest (28·719 inches) on the 13th February, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 40·0°, or 0·7 below the average for the first quarter of the five years 1899–1903.

The maximum temperature of the air during the quarter was 58·2° and the minimum 22·4°. The maximum heat in sun was 108·0°, and the minimum on the grass 17·2°.

Rain or snow fell on 60 days during the quarter. The rain-fall measured 8·160 inches, being 1·713 inches above the average for the first quarter of the five years 1899–1903. The greatest monthly rain-fall was in February, when 3·296 inches were registered.

The wind blew on 23 days from S.W., on 22 days from W., on 10 days from S., on 9 days each from N.E. and E., on 7 days from S.E., on 2 days from N., on one day from N.W., and the air was calm on 8 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·829 inches; the highest reading (30·775 inches) was on the 22nd at 9 A.M., air calm; and the lowest (28·871 inches) on the 13th, at 9 A.M., wind S.W. The mean temperature of the air was 40·6°, the maximum registered was 52·8° and the minimum 25·3°. The 27th was the warmest day, and the 6th the coldest night. The mean of the dry bulb was 40·9°, and of the wet bulb 39·2°. The maximum heat in sun was 80·0°, and the minimum on the grass 19·0°. The minimum on the grass was below 32° on 22 nights. The total amount of sunshine recorded was 52·6 hours, the greatest daily amount being 5·3 hours on the 31st. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain or snow fell on 21 days. The rain-fall measured 2·561 inches; the greatest amount in 24 hours was ·505 inch on the 4th.

February.—The mean height of the barometer during this month was 29·493 inches; the highest reading (30·295 inches) was on the 27th at 9 A.M., wind W., and the lowest (28·719 inches) on the 13th, at 9 A.M., wind S.W. The mean temperature of the air was 38·9°, the maximum registered was 54·0°, and the minimum 25·9°. The 21st was the warmest day, and the 1st the coldest night. The mean of the dry bulb was 38·4°, and of the wet bulb 37·1°. The maximum heat in sun was 87·5°, and the minimum on the grass 19·0°. The minimum on the grass was below 32° on 21 nights. The total amount of sunshine recorded was 47·2 hours, the greatest daily amount being 7·8 hours on the 18th. The maximum ozone was 0·8, the minimum 0·1, and the mean 0·5. Rain or snow fell on 20 days. The rain-fall measured 3·296 inches; the greatest amount in 24 hours was ·370 inch on the 5th.

March.—The mean height of the barometer during this month was 29·981 inches; the highest reading (30·465 inches) was on the 23rd, at 9 P.M., air calm; and the lowest (29·284 inches) on the 29th, at 9 P.M., wind W.S.W. The mean temperature of the air was 40·5°; the maximum registered was 58·2°, and the minimum 22·4°. The 19th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 41·2°, and of the wet bulb 39·0°. The maximum heat in sun was 108·0°, and the minimum on the grass 17·2°. The minimum on the grass was below 32° on 20 nights. The total amount of sunshine recorded was 102·6 hours, the greatest daily amount being 10·1 hours on the 10th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain or snow fell on 19 days. The rain-fall measured 2·303 inches; the greatest amount in 24 hours was ·640 inch on the 7th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared under the direction of the Meteorological Council.

In compiling the following Table (pp. 16, 17) the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	The Meteorological Council.
Donaghadee,	The Meteorological Council.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	The Meteorological Council.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	W. J. Roe, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	The Meteorological Council.
Roche's Point,	The Meteorological Council.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee, and where also Greenwich time is used. Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m., and where also Greenwich time is used. Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them from the others.

† The Averages used are based on observations as follows:—Rainfall 35 years, 1866–1900; Temperature 30 years, 1871–1900; Winds of Moderate and Strong (force 4–7), the number of observations of Calms, and the number of days of calm.

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park, and the others at the stations.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted.

† Including accidental deaths, homicides, and suicides.

† Including accidental deaths, homicides, and suicides.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1901.	Deaths.		The Deaths registered during the Quarter as stated by the Registrars to include											Vaccination Return for the Quarter ending 31st March, 1904							
			Mar- riages. 1903.	Births. 1904.	Averages in the Quarter ending 31st March, in the 4 years, 1900-1903.	Registered in the Quar- ter ending 31st March, 1904.	Deaths from											Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons inaccessible of Vac- cination.	Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the Quarter.	Total of the foregoing.	
							Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Measles.	Scarlet Fever.	Typhus Fever.	Whooping-cough.	Diphtheria.	Simple continued Fever.	Katarrhic Fever.	Diarrhoeal Diseases.						Violence.

[illegible]

(a) See note (*), page 19.

* The Registrars Districts (227 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary District of the same names formed under the Medical Charities Act. The latter *W* denotes that the District is a Workhouse District.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

13 weeks extending from 3rd January, 1904, to 2nd April, 1904. With the exception of 118 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in this district have been assigned to the respective districts from which the deceased were admitted.

+ Exclusive of 7 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

NOTE.—This table has been constructed for the years 1830 and 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1904—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901, respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars, to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars, Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW ; *Bagenalstown*. — District healthy. There have been few vaccinations, owing, no doubt, to the extreme wet weather.

CARLOW ; *Carlow, No. 1, W.* — There is a considerable number of cases of mumps amongst children up to fourteen years of age at present.

CARLOW ; *Clonegall*. — There has been nothing to draw attention to during the quarter.

CARLOW ; *Leighlinbridge*. — District healthy. Few vaccinations owing to wet weather.

Dublin County.

CELBRIDGE ; *Lucan*. — Whooping-cough prevalent. A number of vaccinations postponed in consequence of the severity of the weather.

DUBLIN, SOUTH ; *Crumlin*. — The district is particularly healthy for this time of the year.

DUBLIN, SOUTH ; *Rathfarnham*. — One case of cancer (abdominal).

DUBLIN, SOUTH ; *Tallaght*. — Five deaths registered of persons aged respectively 74, 75, 76, 80, and 85 years.

RATHDOWN ; *Dundrum and Glencullen, No. 1*. — Whooping-cough prevalent in district ; all cases mild.

Kildare County.

ATHY ; *Monasterevin*. — Measles of a mild type was very prevalent in this district during last quarter ; no death.

BALTINGLASS ; *Baltinglass, No. 2*. — Vaccinations postponed in consequence of severe weather, and prevalence of diphtheria and influenza amongst children.

CELBRIDGE ; *Celbridge, W.* — District healthy.

CELBRIDGE ; *Maynooth*. — District very healthy.

EDENDERRY ; *Carbury*. — Vaccination postponed owing to severe weather.

EDENDERRY ; *Rathangan, No. 1*. — One death from phthisis, a boy aged 16 years. He underwent amputation of leg to arrest tubercular disease. Death ensued some months afterwards. This boy's mother died of consumption.

NAAS ; *Kildare*. — Sanitary condition good.

NAAS ; *Naas and Carragh, W.* — The health of this district is very good, no serious cases of illness prevailing. Vaccination backward owing to the inclemency of the season. The death of a woman aged 105 years was registered.

Kilkenny County.

CALLAN ; *Callan, W.* — No epidemic. The majority of deaths registered during the quarter were of persons over 60 years.

CALLAN ; *Kilmaganny*. — District healthy.

CASTLECOMER ; *Ballyragget*. — Sanitary arrangements very fair. Whooping-cough prevalent in one townland ; no death. The number of vaccination defaulters is due to mild form of influenza over the district, and the severe season.

CASTLECOMER ; *Castilecomer, W.* — Deaths about the average this quarter.

KILKENNY ; *Freshford*. — The district is quite free from contagious and infectious diseases, and the sanitary arrangements are fairly good.

KILKENNY ; *Tullaroan*. — Health of district good.

URLINGFORD ; *Balleen*. — The sanitary arrangements are fairly good.

URLINGFORD; *Urlingford, W.*—District free from epidemics.

WATERFORD; *Kilmavoge.*—No deaths from cancer or zymotic disease. District healthy generally, except for a mild epidemic of influenza, which I attribute to the constant rainfall. Vaccination postponed on account of weather.

King's County.

BIRR; *Ferbane.*—A slight epidemic of scarlatina in district during the quarter. No deaths from it. Sanitary condition of district fairly good.

BIRR; *Killyon.*—One case of scarlatina reported to me, and one death from septicaemia during the puerperium also notified to me, and towards the close of the quarter there were a few isolated cases of influenza.

BIRR; *Kinnitty.*—Health of district good.

EDENDERRY; *Rathangan, No. 2.*—One death from whooping-cough, a girl aged 6 years. Vaccination postponed. One death from phthisis, a young man, aged 21 years. His father died of consumption in 1901. Deaths registered at ages 88, 73, 73, and 70 years respectively.

EDENDERRY; *Rhode.*—Influenza and whooping-cough prevalent in district.

MOUNTMELICK; *Clonygowan, No. 2.*—District healthy.

ROSCREA; *Shinrone.*—Of the sixteen deaths registered during quarter, ten reached the following ages—63, 67, 70 (two), 75, 78, 83, 84, 86, and 91 years. The sanitary condition of district fairly healthy.

TULLAMORE; *Killoughy.*—The district is in a fairly good sanitary condition.

TULLAMORE; *Philipstown.*—Owing to the severity of season the medical officer postponed vaccination for the quarter. One death registered at 94 years, one at 92, one at 88, one at 82, and two at 80. District free from any disease.

Longford County.

BALLYMAHON; *Abbeyshrule.*—District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee.*—The district is in good sanitary condition. No infectious disease. Vaccination has been rigorously enforced.

GRANARD; *Granard, W.*—Sanitary arrangements seem satisfactory, as there are no deaths from infectious diseases recorded. The Vaccination Acts are well carried out, as the number of defaulters is not very large.

GRANARD; *Scrabby, No. 2.*—The district continues free from any infectious disease. Vaccination postponed on account of the severe weather.

Louth County.

ARDEE; *Ardee, W.*—Scarlatina has been prevalent in the district during the winter, and hence vaccination is rather backward.

ARDEE; *Castlebellingham.*—Three cases of diphtheria in the quarter; one case proved fatal.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Termonfeckin.*—The district continues free from diseases of an infectious nature. Owing to the inclemency of the season vaccinations have been postponed until more favourable weather.

DUNDALK; *Barronstown.*—The district has been in a healthy and sanitary state, and, with the exception of one case of scarlatina, free from zymotic disease.

DUNDALK; *Dundalk, W.*—The quarter has been remarkably free from zymotic disease. Pulmonary affections were very prevalent.

DUNDALK; *Ravensdale.*—Health and sanitary condition of district very good.

Meath County.

DROGHEDA; *St. Mary's.*—The sanitary state of the district is good; no disease that I am aware of.

DROGHEDA; *Stamullen.*—District healthy during the quarter.

KELLS; *Kells, W.*—The district is unusually healthy.

KELLS; *Kilskeer.*—Sanitary condition of district good. Influenza very prevalent during quarter.

KELLS; *Moynalty.*—Typhus fever has occurred in one house subsequent to influenza. The patients (four) were removed to hospital, the clothes sent for disinfection, and the house disinfected very thoroughly.

NAVAN; *Painestown.*—Of the seventeen deaths 5 have been certified as due to tubercular disease of the lung.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Summerhill.*—Diphtheria broke out in one family. One child, male, recovered, aged 7 years; second case, a girl, 6 years, died after third day. Mother of above becoming affected was removed with remaining members of family into Trim Hospital. She has recovered, and no further instance has occurred.

Queen's County.

ABBEYLEIX; *Ballinacill*.—District in a healthy condition.

MOUNTMELICK; *Clonaslee*.—Seven cases of diphtheria came under my observation during last month of quarter. The death of a child 6 years old registered was probably due to diphtheria, as I treated, most successfully, five cases in the same house with antitoxin serum. At present the district is free from the disease.

MOUNTMELICK; *Clonygowan, No. 1*.—District healthy.

MOUNTMELICK; *Emo*.—Vaccination backward this quarter.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Athlone No. 1, W*.—Among the deaths registered for the quarter were three females, whose ages respectively were 97, 86, and 85, and three males, 90, 84, and 83 years.

ATHLONE; *Glassan*.—One death registered of a person aged 102 years, one 84, one 82, one 79, one 75, and one 72.

ATHLONE; *Moate*.—No epidemic.

BALLYMAHON; *Ballymore*.—Owing to the inclemency of the weather vaccinations are backward. There were two cases of scarlet fever of a mild type during quarter.

MULLINGAR; *Castletown Geoghegan*.—I know of no case of zymotic character occurring in this district during quarter. Sanitary condition fair.

MULLINGAR; *Miltown*.—During last quarter two deaths were registered at the ages of 90 and 92 years respectively. The medical officer reports that, notwithstanding the wet cold weather, grippe was conspicuous by its absence; but chest affections were more prevalent than usual.

MULLINGAR; *Mullingar, W*.—The death average during the past quarter has been almost unprecedented, principally amongst the aged. Two deaths from cancer; no history available.

Wexford County.

ENNISCORTHY; *Newtownbarry*.—There have been two deaths from diphtheria registered during the quarter. The death rate has been much higher than the birth rate.

GOREY; *Camolin*.—The sanitation of the district is fairly satisfactory. There have been no cases of any of the principal epidemic diseases. There is an increase in that fatal and infectious disease, phthisis, which is not notifiable.

NEW ROSS; *Fethard, No. 1*.—Children were not presented for vaccination, presumably because of the very wet weather which persisted throughout the quarter. Five deaths were registered from tubercular phthisis.

NEW ROSS; *New Ross, W*.—There were no vaccinations during quarter, owing probably to the inclemency of the weather. Sanitary state satisfactory, but some cases of whooping-cough among children.

WEXFORD; *Bannow*.—There was a rather severe epidemic of "sore throat" and tonsillitis pretty generally throughout the district during the quarter. A few cases of scarlatina.

WEXFORD; *Bridgetown*.—Vaccination not in proportion to population in consequence of severity of weather, and prevalence of scarlatina.

WEXFORD; *Broadway*.—Very few vaccinations, owing to inclemency of weather.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W*.—One death of a man aged 93 years registered during the quarter. Many vaccinations postponed in consequence of severe weather, and prevalence of diphtheria and influenza amongst children.

BALTINGLASS; *Kiltegan*.—Public health good. Of the eight deaths over 60, the average is 75 years.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—The health of the district has been fairly good. Six deaths out of eight registered were over 60 years.

RATHDOWN; *Powerscourt*.—Some cases of influenza in the district, owing to the severe weather.

RATHDRUM; *Annamore*.—District healthy during the quarter.

RATHDRUM; *Rathdrum, W*.—Owing to influenza no children have been vaccinated in this district during past quarter.

SHILLELAGH; *Tinahely*.—No epidemic disease within the last quarter. Sanitary condition of district good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—The average of half the deaths is 86 years; one, well authenticated, took place in the workhouse at 104 years. Vaccination postponed owing to severity of weather.

CORROFIN; Corrofin, W.—Notwithstanding the unusually bad weather the health of district was very fair. Two deaths from phthisis and one from epithelioma of face (recurrent) were registered during the quarter.

ENNIS; Crusheen.—Two severe cases of typhoid fever occurred in February; both removed to hospital, and now convalescent. Referring to the thirteen deaths registered during the quarter, the ages respectively are 95, 90, 89, 84, 83 (two), 82, 80 (three), 74, 58, and 30 years.

ENNIS; Newmarket.—The health of the district continues excellent. The inclement season brought with it a large share of bronchial troubles, but the district has been practically free from any form of zymotic disease. Sanitary measures have been well looked after.

ENNISTIMON; Ennistimon, W.—Influenza was very prevalent during the quarter; and in several cases pneumonic complication. Vaccination deferred owing to inclement weather.

ENNISTIMON; Roadford.—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT; Ballynacully, W.—One case died of cancer.

KILLADYSERT; Labasheeda.—District healthy. Sanitation satisfactory.

KILRUSH; Carrigaholt.—A few cases of mumps and influenza; otherwise health of district good.

KILRUSH; Kilmihil.—District in very healthy condition.

KILRUSH; Kilrush, W.—The health of the district has been fairly good. No epidemic disease.

LIMERICK; Bridgetown.—Vaccination rather slow, owing to severity of weather. One death registered aged 99 years.

LIMERICK; Coolacasey.—The district is very healthy, and its sanitary condition satisfactory.

SCARRIFF; Annacarriga.—District free from disease.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Mountshannon, W.—Vaccination very slow. District fairly healthy.

TULLA; Quin.—Sanitary arrangements in the district are very fair. None of the principal epidemic diseases are prevalent.

Cork County.

BANDON; Bandon, W.—There were a good number of vaccinations postponed owing to prevalence of bronchitis amongst children.

BANDON; Inishannon.—The constant inclement weather is probably the cause of no children being brought for vaccination during past three months. The health of

the district is fairly good. Influenza, bronchitis, and pneumonia being the chief serious diseases.

BANDON; Murragh.—Vaccination delayed owing to severity of the weather.

BANTRY; Bantry, W.—Health of district fair. Influenza prevalent during the quarter.

BANTRY; Durrus and Kilcrohane.—Measles very prevalent in Kilcrohane side of district, but now showing in Durrus, mild amongst children, but complicated with pneumonia amongst adults; also whooping-cough prevalent all over district. One case of phthisis registered, contracted from cold.

BANTRY; Kealkill.—The sanitary condition of the district is good. The district has been very free from infectious diseases.

CASTLETOWN; Castletown, W.—Vaccination has been much neglected of late.

CASTLETOWN; Kilcatherine.—Catarrh prevalent amongst children; also very inclement weather has much retarded vaccination.

CLONAKILTY; Timoleague.—Of the twenty deaths there was only one adult below the age of sixty years. That death was due to tubercle of lung got in United States of America. He lived for twelve months at home before he died. It is no unusual occurrence in this district of a person acquiring phthisis abroad, coming home to be rate-supported, and to die.

CORK; Carrigaline, No. 1.—Vaccination has been slack owing to the inclemency of the weather.

CORK; Carrignavar.—Children not brought in for vaccination owing to inclemency of weather. District healthy.

CORK; Dripsey.—I did not vaccinate any children for some time, as there is an epidemic of measles, especially in the Fir-mount division of the Dripsey dispensary district, also influenza lately; the weather was also very bad.

CORK; Queenstown, No. 2.—Whooping-cough very prevalent, which has interfered with vaccination.

CORK; Riverstown.—Vaccination suspended during the quarter, owing to the number of children suffering from chest affections.

DUNMANWAY; Ballineen.—I did not vaccinate any children during the past quarter.

DUNMANWAY; Coolmountain.—Vaccination postponed, owing to presence of whooping-cough and influenza in the district.

DUNMANWAY; Dunmanway, W.—Whooping-cough and bronchitis very prevalent during the quarter; the district otherwise healthy.

FERMOY; Ballynoe.—Four deaths were due to phthisis, two to enteric fever, two to influenza. Vaccination is backward on account of the excessively bad weather.

KANTURK; Kanturk, W. — District healthy.

KILMALLOCK; Charleville. — The district is fairly healthy. We had four cases of typhoid fever within the quarter. No other epidemic disease.

KINSALE; Ballyfeard. — Health of district good. One case of scarlatina treated at his own house; recovery.

MALLOW; Ballyclogh. — The sanitary conditions of village are being improved. Scarlatina has entirely disappeared from district.

MALLOW; Buttevant. — The district is in a sanitary state and free from contagious disease of any sort.

MALLOW; Kilshannig. — There was one death from cancer registered during the quarter. It was a case of cancer of stomach in an aged person. I could not trace cause. There was an epidemic of chest affections amongst children in the district, consequently I have not as many vaccinations as I should otherwise have.

MALLOW; Rahan. — Many cases of measles and also of mumps have occurred in the district during the past quarter. Both diseases are of the ordinary kind.

MIDDLETON; Aghada. — Pneumonia has been the most prevalent disease during the quarter.

MIDDLETON; Castlemartyr. — Deaths have been registered at the following ages, respectively, which appear to be correct from my personal knowledge of the cases, 70, 72, 75 (three), 80, 84, 91, 94 years. Sanitary arrangements fair, but manure cesspools and pigs are kept too close to dwelling-houses in general. Consumption is very prevalent in the district. Vaccination cases frequently not presented for inspection.

MIDDLETON; Middleton No. 2. — General health of district good.

MILLSTREET; Cullen. — One death registered with age given as 100 years. The age is fairly well authenticated.

SKIBBEREEN; Dromdaleague. — On account of the prevalence of measles during the quarter, vaccination was practically suspended.

SKIBBEREEN; Skibbereen, W. — District at present free from diseases of an infectious character.

SKIBBEREEN; Tullagh. — Vaccination backward in consequence of severity of the weather, and the prevalence of measles and whooping-cough during the first months of the quarter.

SKIBBEREEN; Unionhall. — One case of typhus fever during the quarter.

SKULL; Goleen. — During the early part of the quarter measles was very prevalent, but with a slight fatality. Influenza is now prevalent amongst children.

Kerry County.

CAHERSIVERN; Caher, W. — The district is in fairly good sanitary condition.

CAHERSIVEEN; Darrynane. — The sanitary condition of district is fairly satisfactory, and I had no cases of zymotic disease to record for the quarter just ended.

CAHERSIVEEN; Glanbehy. — One woman died of cancer of the lip, and her friends do not remember that any of her family had the disease before.

CAHERSIVEEN; Valencia. — There have been several cases of whooping-cough in the district during quarter. Two deaths from same have been registered, and one case of enteric fever. Inclement weather has retarded vaccination.

DINGLE; Anascaul. — Several old people suffer from diseases of the respiratory system. Children were not brought for vaccination during the quarter owing to severe weather.

DINGLE; Castlegregory. — The weather was most inclement this past quarter, and owing to many of the children suffering from chest affections, vaccination was not pressed, as usual. Whooping-cough is rather prevalent at present in this district.

DINGLE; Dingle, W. — There has been an epidemic of influenza in the district for the last month. One case of typhus fever was admitted to the hospital. Otherwise the district is healthy enough.

DINGLE; Ventry. — Influenza and catarrh prevalent during the quarter. District otherwise healthy.

KENMARE; Kilgarvan. — Vaccination had to be almost completely postponed owing to bad weather during the quarter. There were five cases of simple ill-defined fever in the district, occurring amongst the members of one family resident in the same dwelling-house.

KENMARE; Tuosist. — The deaths from pulmonary tuberculosis number three, from senile decay three, and one infant's death is registered from bronchitis, total seven; no medical attendant in any case.

KILLARNEY; Coom. — Eight cases of typhus fever since last report, confined to two families (relatives). Influenza prevalent during last month of quarter owing to severity of the weather. No vaccination performed during the quarter.

KILLARNEY; Killarney No. 1, W. — No vaccination done this quarter owing to severity of weather and prevalence of influenza.

KILLARNEY; Killarney No. 2. — Vaccination postponed because of the inclemency of the weather and influenza.

KILLARNEY ; Milltown.—District fairly healthy. Sanitary condition good. No contagious or infectious diseases prevailed.

LISTOWEL ; Ballybanion.—Health of district good. Vaccination backward this quarter on account of severe weather. Children not able to be brought to dispensary.

LISTOWEL ; Ballyhorghen.—Sanitary state of district good.

LISTOWEL ; Ballylongford.—District very healthy for quarter, and free from contagious disease. Vaccination backward in consequence of bad weather, but hope to have most of defaulters for June quarter. Sanitary state of district fairly good.

LISTOWEL ; Tarbert.—Vaccination postponed owing to the outbreak of enteric fever and bad weather. One death registered at the age of 106 years.

TRALEE ; Brosna No. 2.—Vaccinations postponed in consequence of bronchitis among young children, which assumed an epidemic form.

TRALEE ; Castlemaine.—Vaccination generally slow owing to measles in the village of Castlemaine.

TRALEE ; Kilgobban.—Severe weather and neglect on the part of parents prevented children from being vaccinated during the quarter.

TRALEE ; Tralee No. 2.—The decrease in the number of primary successful vaccinations is due to the prevalence of whooping-cough of a mild type in the district. The sanitary condition of the district, urban and rural, is good.

Limerick County.

CROOM ; Castletown.—Measles and whooping-cough are, I understand, in the district, but both are of so mild a type that medical aid has not been sought for.

KILMALLOCK ; Bruff.—Whooping-cough prevalent during the quarter. Vaccination postponed in consequence.

KILMALLOCK ; Bruree.—Had two cases of measles. Considering the severity and dampness of the weather there was very little sickness during the quarter.

KILMALLOCK ; Hospital.—District healthy.

KILMALLOCK ; Kilfinnane.—District healthy.

KILMALLOCK ; Kilmallock, W.—Epidemic catarrh and bronchitis of a mild type rather prevalent. District otherwise healthy.

LIMERICK ; Annacotty.—Sanitary arrangements fair. District healthy.

LIMERICK ; Limerick No. 3.—There has been an epidemic of whooping-cough of a very bad type in the district during the quarter, and seventeen deaths were registered from this disease. There were a good many cases of tubercular meningitis. Five deaths were registered from it. There were

nine deaths from broncho-pneumonia, eleven from bronchitis, five from phthisis, two from cancer of the breast, one from cancer of the kidney, one from malignant disease of the pylorus, two from paralysis, one from cerebral softening, and one from mumps.

LISTOWEL ; Glin.—In the first month of the quarter just ended there were three cases of enteric fever; the remainder of quarter was uneventful as far as infectious diseases were concerned. The sanitary condition of district is, as I write, fairly satisfactory.

MITCHELSTOWN ; Galbally.—Some typical cases of influenza in March. Pneumonia very prevalent during March. Phthisis is becoming very prevalent, and no means of isolation. Vaccination backward owing to the prevalence of a bronchial catarrh amongst young children, and the inclemency of the weather.

NEWCASTLE ; Ardagh.—The sanitary state of the district is pretty fair. No epidemic in district. Some cases of influenza.

NEWCASTLE ; Feenagh.—The health of the district is very good.

RATHKEALE ; Askeaton.—During the past quarter the district was entirely free from all contagious or epidemic diseases.

RATHKEALE ; Pallaskenry.—The sanitary arrangements are fairly good. There have been a couple of cases of scarlatina in the district during the quarter. Influenza has been prevalent during the present month.

RATHKEALE ; Rathkeale No. 1, W.—The mortality for the quarter was considerably above the average. Four-fifths were due to old age and its infirmities accelerated by a very inclement spring. The district was free from any contagious disease. There was very little sickness of any kind; still, in consequence of the severity of the weather, the mortality was nearly double the average, and almost entirely among the aged.

TIPPERARY ; Grean.—There were twenty deaths registered over sixty years, one reaching 102 years.

Tipperary County, North Riding.

BORRISOKANE ; CloghJordan.—District fairly healthy during past quarter. Of the thirteen deaths registered of persons aged sixty years and upwards, one was 90 years, one 80 years, and eight were well over 70.

BORRISOKANE ; Terryglass.—Whooping-cough is now very prevalent.

NENAGH ; Nenagh, W.—Influenza prevails very much in the district.

NENAGH ; Newport.—One case of enteric fever during past quarter. District otherwise healthy.

NENAGH ; Portroe.—District free from disease.

NENAGH; *Silvermines*.—Vaccination generally postponed owing to an epidemic of whooping-cough.

THURLES; *Templemore*.—Sanitary arrangements satisfactory. Owing to the severity of the weather children were not brought in for vaccination.

Tipperary County, South Riding.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good. No disease prevalent. Vaccination well attended to.

CARRICK-ON-SUIR; *Garrangibbon*.—Owing to the severity of the weather for the past three months, it was not desirable to expose the children in travelling long distances to the dispensary depôt for vaccination.

CASHEL; *Cashel, W.*—One death has been registered in which the age is stated to be 102 years.

CASHEL; *Killenaule*.—Very fatal year to old people. Deaths registered of people aged 94 (two), 90, 88, 81 and 80 (two) years. Two deaths from double pneumonia in same house. Very few vaccinations owing to severe weather.

CASHEL; *Kilpatrick*.—Vaccination postponed owing to very severe weather.

CASHEL; *Tullamaine*.—Of the eleven persons whose deaths were registered during the quarter, five attained an average age of 85 years.

CLOGHEEN; *Caher*.—No cases of an epidemic nature occurred during the past quarter. Owing to the severity of the weather, few brought children to be vaccinated.

CLOGHEEN; *Clogheen, W.*—District healthy, and free from all forms of zymotic diseases.

CLONMEL; *Clonmel, W.*—A very great prevalence of bronchitis amongst children, with some mortality.

CLONMEL; *Kilsheelan No. 1.*—A mild form of influenza prevalent.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Tipperary, W.*—The district has been in a healthy condition, and free from zymotic diseases.

URLINGFORD; *Kilcooly*.—The district was healthy during quarter. Sanitary arrangements good.

Waterford County.

CLONMEL; *Kilsheelan No. 2.*—No zymotic disease.

DUNGARVAN; *Dungarvan, W.*—Four cases of scarlatina of a mild type in urban portion of district during the quarter.

KILMACTHOMAS; *Bunmahon*.—The district is healthy, and free from zymotic diseases. Influenza very prevalent during the quarter.

LISMORE; *Ballyduff*.—Vaccination, sanitation, and general health of district satisfactory.

WATERFORD; *Woodstown*.—The health of district is good. Four cases of diphtheria and one of typhus fever occurred during quarter.

YOUGHAL; *Ardmore*.—District healthy.

YOUGHAL; *Clashmore*.—Vaccination postponed owing to inclemency of weather.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—The chief feature of the past quarter has been an extensive outbreak of whooping-cough, resulting in six deaths from collapse of lung and broncho-pneumonia.

ANTRIM; *Doagh*.—Influenza very prevalent in the district; also mumps.

ANTRIM; *Randalstown*.—Two deaths from cancer registered during the quarter; one was of a married female aged 50 years, no history of injury or hereditary cause could be traced; the other was of a married male, aged 51 years, no specific or hereditary history; but this man had suffered from eczema for over twenty years, the disease being especially irritable and persistent in the palm of the hand. Influenza, with gastro-enteric complications, followed by a very obstinate neuralgia, very prevalent. Deaths of persons of the following ages registered—100, 95, 94 (two), 93 (two), 92, and 90 years.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Diseases of respiratory organs very common.

BALLYMENA; *Ahoghill*.—Whooping-cough and mumps prevalent during the quarter; one death from whooping-cough. One death of a person aged 99 years registered.

BALLYMENA; *Ballymena, W.*—Town and district healthy, with the exception of a good many cases of mumps, influenza, and pertussis.

BALLYMENA; *Broughshane*.—Health of the district good, except an epidemic of mumps.

BALLYMENA; *Clogh*.—Whooping-cough was prevalent in this district during first two months of present quarter, but only one death has been registered from said cause; it has now to a very large extent disappeared. Otherwise the district has been fairly healthy.

BALLYMENA; Portglenone.—No epidemic during the quarter. One death was registered as due to diphtheria, and two from whooping-cough; otherwise the district is fairly healthy. One death of a person aged 100 years registered.

BALLYMENA; Toome.—The sanitary condition of the district is fairly good.

BALLYMONEY; Ballymoney, W.—The death of a person aged 101 years was registered. I knew the woman, and from her history, have no doubt the age given is about correct.

BALLYMONEY; Dirraw.—Whooping-cough prevalent over the district, and in consequence of which no children were presented for vaccination.

BALLYMONEY; Portrush.—District unusually healthy; average age for deaths 65 years.

BELFAST; Belfast Rural No. 4.—There has been an epidemic of influenza.

LARNE; Glenarm.—During the last two months of quarter mumps have been prevalent in the district. Several male adults have had severe orchitis after an attack of mumps.

LISBURN; Dunmurry.—The sanitary condition of this district is good; there is no epidemic of any kind.

LISBURN; Glenavy.—Diseases of the respiratory organs much in the ascendant this quarter as causes of death; no epidemic; much sickness with moderate fatality.

LISBURN; Knocknadona.—The sanitary condition of this district is good.

LISBURN; Lisburn, W.—One case of cancer occurred in the county infirmary which was admitted from the country. It appears a previous member of the family died from the same cause. Pertussis very prevalent, and seventeen deaths occurred from it.

Armagh County.

ARMAGH; Loughgall.—During the quarter lung trouble was very prevalent amongst old and young people.

ARMAGH; Markethill.—Whooping-cough and mumps have been epidemic in the district during the past quarter. I have registered the death of one person aged 90 years; five, aged 80 years and under 90; seven, aged 70 years and under 80; and eleven, aged 60 years and under 70.

ARMAGH; Tynan.—One death at the age of 117 years took place in the townland of Foyduff. The deceased stated to me sometime since that she was over 10 years old at the time of the Rebellion in 1798. She died of senile decay in December last.

CASTLEBLAYNEY; Newtownhamilton No. 1.—Pertussis has again appeared in this district.

LURGAN; Lurgan No. 1, W.—The district has been practically free from epidemic disease during the quarter.

LURGAN; Lurgan No. 2.—This district in a fairly healthy condition and free from any epidemic or infectious disease.

NEWRY; Mountnorris.—A very extensive and severe epidemic of whooping-cough has continued in greater part of the district during almost the entire quarter; three deaths occurred from it. Vaccination has been postponed in many cases owing to it.

NEWRY; Mullaghglass.—There has been a widespread epidemic of whooping-cough over the greater part of the district. I have registered six deaths from this cause and complications.

Belfast County Borough.

BELFAST; Belfast Urban No. 8.—Whooping-cough is epidemic in this district.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—The district is in a healthy condition.

BAILIEBOROUGH; Shercock.—Influenza prevalent during the quarter, complicated in many cases with chest and lung diseases, particularly pneumonia.

CAVAN; Ballyhaise.—District is in a good sanitary condition.

CAVAN; Belturbet.—There are cases of whooping-cough in the district, which with the inclement weather militated against vaccination.

CAVAN; Killeshandra.—One death from sporadic typhus fever was registered during the quarter. Influenza of a mild type prevailed during the quarter.

CAVAN; Stradone.—Enteric fever prevalent in district.

COOTEHILL; Drum, No. 2.—Bronchitis, influenza, and pertussis prevalent during the latter half of the quarter.

ENNISKILLEN; Holywell No. 2.—The sanitary arrangements of the district are satisfactory. Mumps have been prevalent during the quarter. There were two cases of typhoid fever, both were removed to hospital.

GRANARD; Scrabby No. 1.—Vaccination postponed on account of severe weather. District continues healthy.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; *Virginia*.—One death of a person aged 100 years registered, another aged 91 years. A woman confined of triplets all alive when born, but all died within two days of birth. Mother made good recovery.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary arrangements fairly good.

BALLYSHANNON; *Ballyshannon, W.*—Vaccination is backward.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely*.—Influenza prevalent, no other epidemic disease during quarter.

DONEGAL; *Pettigoe*.—Diseases of respiratory organs prevalent. A few cases of whooping-cough have appeared.

DUNFANAGHY; *Crossroads*.—Vaccination has been postponed during the quarter owing to illness amongst the children. A few cases of scarlatina occurred during the quarter of a mild type.

DUNFANAGHY; *Dunfanaghy, W.*—Influenza was very prevalent this quarter, and accounted for some of the deaths in the very old and very young.

DUNFANAGHY; *Tory Island*.—No vaccination during quarter. An outbreak of influenza occurred during the month of March, but so far has caused no death.

GLENTIES; *Ardara*.—The sanitary arrangements are fairly good.

GLENTIES; *Carrick*.—The sanitary arrangements are fair.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow No. 2*.—Influenza of a rather severe type has been prevalent during the quarter.

GLENTIES; *Killybegs*.—The sanitary state of the district is fairly good, and there has not been any outbreak of any infectious disease, with the exception of influenza and whooping-cough. The latter interfered with the practice of vaccination during the latter part of the quarter.

INISHOWEN; *Carndonagh, W.*—Several cases of influenza occurred throughout the district.

INISHOWEN; *Clonmany*.—Influenza prevalent during the quarter.

INISHOWEN; *Malin*.—District healthy; influenza prevalent.

INISHOWEN; *Moville*.—District is healthy.

LETTERKENNY; *Church Hill*.—Of the deaths registered one was aged 105 years, one 100 years, two 87, one 85, and five between 80 and 85 years. District healthy.

LONDONDERRY; *Killea*.—Influenza of a mild type prevalent; otherwise district healthy. Four of the fifteen deaths registered during the quarter were of persons aged over 80 years, one of them being aged 92 years.

MILLFORD; *Rathmullan*.—District has been healthy during quarter.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. Severe epidemic of parotitis. Two deaths registered of persons aged 100 and 95 years, respectively.

STRANOLAR; *Cloghan*.—Sanitary arrangements satisfactory. One death from cancer of the breast and one from cancer of the stomach; cause unknown.

STRANOLAR; *Killygordon*.—Health of district very good.

Down County.

BANBRIDGE; *Ballyward*.—Sanitary state of district fairly good. Chest diseases were common and fatal during the quarter, owing, I suppose, to the severe weather.

BANBRIDGE; *Crosegear*.—There were no cases of any notifiable infectious diseases during the quarter in the district. One death from diphtheria registered.

DOWNPATRICK; *Ballynahinch*.—There has been an outbreak of mumps in this district during the quarter, of which only a few cases came under treatment; also a large number of cases of influenza, and some cases of whooping-cough. There was one death registered at 95 years, two at 93 years, and seven between 80 and 90 years.

DOWNPATRICK; *Downpatrick, W.*—Three cases certified as having died from influenza; four cases as from dysentery.

DOWNPATRICK; *Killough*.—Of the twenty-eight cases registered during the quarter, twenty-one were over 60 years, averaging almost 79 years.

DOWNPATRICK; *Killyleagh*.—There has been an epidemic of mumps and whooping-cough in the Killyleagh division of the district during the quarter. I have registered the death of one child aged 11 months, due to whooping cough; otherwise the district has been exceptionally free from disease.

DOWNPATRICK; *Portaferry*.—Influenza was very prevalent during quarter. There was an epidemic of whooping-cough, which was confined to one division of the district; one death. One case of enteric fever and one of diphtheria occurred; both fatal.

LISBURN; *Ballylesson*.—Pneumonia has been prevalent, and in four cases fatal—three of the patients being aged persons and one an infant. There has been an unusual amount of sickness generally, probably owing to conditions of weather.

LISBURN; *Drumbeg*.—Whooping-cough has been prevalent during March, but, so far, no deaths.

LISBURN; *Saintfield*.—The health of the district has been good. A case of cancer of the breast was registered this quarter. I made inquiries, but could get no evidence of any near or distant relative of the deceased having had cancer; neither was there any history of a hurt.

LURGAN; *Moir*.—The last month of the quarter has swelled the death-rate above the average. Influenza is rife, and severe on old people; it accounted directly for at least one registered death, but there are others to be registered from the same cause. Pneumonia has been prevalent and severe. Two deaths from cancer; a small outbreak of diphtheria, quickly checked, eventuated in one death. One death from typhoid, of obscure origin, with no spread. Seven deaths due to tuberculosis. The birth-rate is also over the average.

LURGAN; *Waringstown*.—Thirteen cases of enteric fever were notified during the quarter. The most of them were removed to hospital. There were also some cases of scarlet fever. Of the 28 deaths, 19 were of persons over 60 years of age—a large proportion.

NEWRY; *Donaghmore*.—District very healthy, and sanitary matters good.

NEWRY; *Rathfriland*.—Births about, deaths over, average. Deaths of females much in excess—principally from chest affections.

NEWTOWNARDS; *Banqor*.—Sanitary arrangements good; urban district free from infectious disease. Four cases of diphtheria occurred in rural district. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Health of district very good; no epidemics, except a few cases of measles of a very mild type.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Whooping-cough present in two divisions; three deaths reported as due to it. Of the 28 deaths reported, fifteen were aged 70 years and upwards; eldest aged 88 years. Health of district generally good, and at present only a few cases of whooping-cough known about.

NEWTOWNARDS; *Newtownards, W.*—There is not, nor has there been during the past quarter, any particular disease prevalent. One case of enteric fever, one of diphtheria, two of scarlet fever, and two cases of erysipelas were notified.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

CLONES; *Newtown Butler*.—Of the deaths registered in this district during the past quarter, three were of persons 90 years of age, and three between 80 and 90 years.

CLONES; *Rosslea*.—Public health satisfactory.

ENNISKILLEN; *Ely*.—A few cases of diphtheria occurred in this district during the quarter.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Measles, scarlet fever, diphtheria, and varicella were prevalent amongst children throughout the district during the quarter. Two deaths occurred from diphtheria, and two from scarlet fever. As many as could be safely isolated were sent to the fever hospital, and the schools closed in the neighbourhood of the disease. The houses and clothing were disinfected. I think the disease is stamped out.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary arrangements are satisfactory. There was one case of typhoid fever, which was removed to hospital.

IRVINESTOWN; *Clonelly*.—Two cases of scarlatina during quarter. Influenza prevalent.

IRVINESTOWN; *Ederney*.—Whooping-cough prevalent, but no deaths. Deaths registered include persons aged 89, 88, 85, 84, 78, and 77 years respectively.

LISNASKEA; *Derrylin*.—Scarlatina (of severe type), mumps, and pertussis have been in the district during the quarter. There is plenty of room for improvement in the sanitary conditions of the dwellings.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district very good during quarter.

Londonderry County.

COLERAINE; *Aghadowey*.—District fairly healthy.

COLERAINE; *Coleraine, W.*—Three deaths were due to tubercular diseases, and one each from cancer of rectum, cancer of breast, cancer of intestines (small), cancer of face (epithelioma), cancer of pancreas, and rodent ulcer or epithelioma of face. There was no family history of malignancy to be discovered.

COLERAINE; *Garvagh*.—Sanitary state of the district good. A mild form of whooping-cough was prevalent during the quarter in some parts of the district, but no deaths occurred from it.

COLERAINE; *Kilrea*.—Of diseases requiring notification, there were three cases of scarlatina, one of typhoid fever, and three of erysipelas; but no further spread of any of them, and no deaths resulting therefrom. A child aged 2 years died of diphtheria, and no other case of the same disease has since occurred in the district. Proper sanitary precautions were taken in all the foregoing cases. The health of the district has been otherwise fairly satisfactory. Nearly one-half of the deaths registered during the quarter happened at ages ranging from 60 to 95 years.

COLERAINE; Portstewart.—Whooping-cough has been prevalent amongst children especially, but also in a few grown up people. Amongst the former it was chiefly responsible for two deaths. Towards the end of the quarter I saw some very severe cases of influenza amongst children, with threatened congestion of the lungs. These latter have all now made a good recovery.

LIMAVADY; Ballykelly.—Whooping-cough has been prevalent during quarter, and caused three of the deaths, two being delicate infants, and another aged 3 years having previously suffered from infantile paralysis; otherwise district very healthy.

LIMAVADY; Bellarena.—Of the deaths registered, one was of a woman aged 101 years.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory. Influenza and whooping-cough prevalent throughout the quarter. Mortality principally among the aged and very young.

LIMAVADY; Limavady, W.—Eleven deaths were registered at ages over 80 years, two of them being over 90 years. Two cases of deaths from cancer registered, one being of the tongue and throat, and the other of the omentum and liver; no family histories of the cases could be obtained.

LONDONDERRY; Claudy.—Of the seventeen deaths of persons aged 60 years and upwards, twelve were of persons aged 70 and upwards; including seven of persons aged 80 and upwards, of whom four were aged 90 and upwards. Two deaths were registered as due to cancer; in neither case could any facts bearing on the causation of the disease be elicited; one death was also registered as due to sarcoma, one to rodent ulcer, and three to pulmonary tuberculosis.

MAGHERAFELT; Draperstown.—An epidemic of whooping-cough prevailed during quarter.

MAGHERAFELT; Moneymore.—Death-rate high for quarter, exceeding the births. Three deaths from cancer, but no probable cause in any case. In the second month two cases of diphtheria occurred in the family of a farmer, with one death; cause seemed to be overcrowding in bedroom, and other insanitary conditions; disease has since disappeared. Whooping-cough with severe chest complications has been prevalent during quarter; three deaths from its effects, but only one yet registered.

Monaghan County.

CASTLEBLAYNEY; Ballybay.—Chest affections were very prevalent during the quarter; also whooping-cough. There was no outbreak of serious epidemic disease.

CASTLEBLAYNEY; Newtownhamilton, No. 2.—Pertussis has again appeared in the district.

COOTEHILL; Dawsonsgrove.—The sanitary arrangements in the district are fairly good. Pertussis (whooping-cough) was prevalent during the quarter.

COOTEHILL; Drum, No. 1.—Influenza and bronchitis prevalent during latter half of quarter.

MONAGHAN; Castleshane.—District sanitary.

MONAGHAN; Emyvale.—Whooping-cough is prevalent, but no deaths from it have been registered as yet.

MONAGHAN; Kilmore.—Vaccinations almost all postponed owing to influenza, whooping-cough, and bad weather.

MONAGHAN; Monaghan, W.—The sanitary condition of the district remains satisfactory. There are no special circumstances relating to vaccination or the prevalence or fatality of any of the principal epidemic diseases requiring particular notice.

MONAGHAN; Scotstown.—The sanitary condition of the district is satisfactory.

Tyrone County.

CASTLEBERG; Castleberg, W.—Sanitary state of district very satisfactory; slight epidemic of whooping-cough, but no deaths from it during the quarter. Death-rate below the average.

CASTLEBERG; Drumquin.—The sanitary state of the district is satisfactory, with no infectious diseases of any sort.

CASTLEBERG; Killeter.—State of district satisfactory.

CLOGHER; Aughnacloy.—Whooping-cough has been epidemic in this district especially during the month of March; but, so far, there has not been any mortality.

CLOGHER; Ballygawley.—One death of a person aged 100 years registered.

CLOGHER; Fivemiletown.—Influenza was prevalent during the quarter, but not of such a severe type as in some former years.

COOKSTOWN; Cookstown, W.—The district is very healthy.

COOKSTOWN; Pomeroy.—The district is in a sanitary state; there have been no epidemics.

COOKSTOWN; Stewartstown.—District in general healthy.

DUNGANNON; Caledon and Ballymagran.—Vaccination postponed in three cases owing to epidemic of whooping-cough.

DUNGANNON; Clonwaddy.—District fairly healthy; sanitary arrangements good.

DUNGANNON; Coal Island.—No infectious disease except two cases of diphtheria, one referred to in last report. I could not trace origin of second case, and do not believe it had any connection with the first.

The second case also terminated fatally; the usual sanitary precautions were taken. Influenza is rather prevalent at present. Deaths of persons aged 101, 98, 82, and 80 years respectively were registered during the quarter.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory; no epidemic or other diseases are at present prevalent in the district.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter; the sanitary arrangements are satisfactory.

OMAGH; *Omagh, No 1, W.*—Sanitary condition of district fair. Nine cases of scarlatina notified; no deaths. District otherwise healthy.

OMAGH; *Omagh, No. 2.*—District healthy for the past quarter, and free from epidemics.

OMAGH; *Sixmilecross*.—The district is in good sanitary order at present; no epidemic has occurred during the quarter; but we have some cases of influenza.

STRABANE; *Newtownstewart*.—Six cases of diphtheria, 3 scarlet fever, 4 erysipelas, and 14 typhoid fever in district during past twelve months.

STRABANE; *Plum Bridge*.—Pertussis was prevalent, but no deaths occurred from that cause.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Killaan*.—District is generally healthy, and free from any contagious disease.

BALLINASLOE; *Kiltormer*.—Vaccination is very backward in the district. Mothers will not bring out their children owing probably to the inclemency of the weather.

CLIFDEN; *Inishbofin*.—No epidemic occurred during the quarter. Health of district very good.

CLIFDEN; *Roundstone, No. 1.*—The district is free from epidemic disease.

CLIFDEN; *Roundstone, No. 2.*—There was an outbreak of typhus fever in this district during quarter. One case occurred about beginning of last quarter. From this house it spread to three other houses. Two deaths from it took place in one house. All the other patients in the four houses are now convalescent. I regret to say the medical officer contracted the disease on 8th January last, was removed to Clifden Hospital on 12th, and died there on 19th January. No vaccinations have been performed during quarter owing to the death of the medical officer and the epidemic of typhus fever. District is now free from any contagious or infectious disease.

GALWAY; *Galway No. 3 (Arran)*.—District fairly healthy.

GALWAY; *Oranmore*.—The general health of the district is very good, considering the cold, damp weather experienced.

GALWAY; *Turloughmore*.—There was an epidemic of influenza, also a few cases of cerebral meningitis following influenza, also a few cases of diphtheria.

GLENNAMADDY; *Dunmore*.—Vaccination was postponed generally owing to cases of scarlatina.

GLENNAMADDY; *Glenamaddy, W.*—There were two deaths registered from cancer.

GLENNAMADDY; *Williamstown*.—There have been two cases of typhus fever, one of which was fatal, in the district during the quarter. Owing to severity of weather no children were brought for vaccination.

GORT; *Gort, W.*—Two cases of typhoid fever have occurred during March in a country-house. I cannot trace source of infection. The health of district very good otherwise. The very severe weather has almost stopped vaccination.

GORT; *Kinvarra*.—The health of the district is good, but there have been some cases of influenza with a tendency to pneumonic symptoms. Vaccination not up to the mark owing to severity of weather.

LOUGHREA; *Athenry*.—The death-rate during past quarter is remarkable for the number of deaths that occurred to persons whose ages were over 60 years. Out of a total of twenty-three deaths registered, eighteen were over 60, and in two cases the ages were over 100 years. Weather most inclement, consequently very few vaccinations.

LOUGHREA; *Bullaun*.—Deaths were registered of old people, aged 62, 70, 73, 78 (two), 81, 85, and 89 years.

MOUNT BELLEW; *Mount Bellew, W.*—All vaccinations postponed owing to the prevalence of whooping-cough.

OUGHTERARD; *Cloonbur, No. 1.*—There was one death from scirrhus of breast during the quarter, and it is interesting to note that I also attended two sisters of deceased who also died of scirrhus of breast. The three sisters were married, but had no family. Influenza very prevalent.

OUGHTERARD; *Cloonbur, No. 2.*—Sanitary arrangements are good.

TUAM; *Abbey*.—There were five cases of secondary vaccination—a family going to America.

TUAM; *Dunmore*.—Vaccination was postponed generally owing to some scarlatina.

Leitrim County.

BALLYSHANNON; *Kinlough*.—One death registered from cancer.

BAWNBOY; *Ballinamore*.—The death of a centenarian has been registered—a woman who lived 101 years. Sanitary state of district fair. Vaccination has been postponed owing to the inclement weather.

CARRICK-ON-SHANNON; *Jamestown, W.* Influenza very prevalent. Vaccination backward owing to severity of weather.

MOHILL; *Carrigallen*.—There were a number of cases of influenza, and of scarlatina; no deaths from the latter. From both these causes, and the severity of the weather, vaccinations were few.

MOHILL; *Rinn*.—The district is healthy, and free from epidemic disease.

Mayo County.

BALLINA; *Crossmolina*.—The inclement weather has reduced the number of primary vaccinations to a minimum.

BALLINROBE; *Ballinrobe W.*—Vaccinations backward owing to the inclemency of the season.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements improved. A large number complaining from influenza.

BALLINROBE; *Cong.*—Health of district good. Of the deaths registered two were aged 70 years, two 75, one 76, three 80, one 82, one 87, one 90, and one 95 years.

BALLINROBE; *Hollymount*.—There were many cases of influenza with congestion of the lungs, and throat and bronchial affections. Amongst children a mild form of measles was epidemic in this district, owing to which and the severe weather vaccinations had to be postponed. There were three cases of scarlet fever of a mild form in one family.

BELMULLET; *Bangor*.—Health of district good during quarter.

BELMULLET; *Binghamstown, W.*—State of district healthy. Of the deaths registered during quarter one was aged 87 years, one 85, one 84, one 77, and two 70 years.

CLAREMORRIS; *Ballindine*.—Owing to prevalence of measles in district vaccination was generally postponed.

CLAREMORRIS; *Ballyhaunis*.—Throughout the quarter the health of the district has been fairly good, although the prevalence of whooping-cough and influenza has increased the mortality amongst the very young and aged. There were two deaths from cancer of the stomach. Sanitation is making rapid progress here.

KILLALA; *Killala, W.*—The health of the district was satisfactory during the quarter. There was only one case of diphtheria reported; there were no cases of influenza.

WESTPORT; *Achill*.—An epidemic of small-pox prevailed for past quarter; but is, I think, nearly over. General health of district otherwise good; sanitary state much improved, and vaccination thoroughly performed.

WESTPORT; *Ballycroy*.—Three deaths from diphtheria during quarter; influenza very prevalent; vaccination satisfactory.

WESTPORT; *Bundorragha*.—Sanitary arrangements in district good.

WESTPORT; *Louisburgh*.—Health of district good during past quarter.

WESTPORT; *Newport*.—Sanitary condition of district fairly good.

WESTPORT; *Westport, W.*—Of the 43 deaths registered, 26 were above 60 years, 17 above 70 years, 9 above 80 years, 4 above 90 years, and one was aged 104 years.

Roscommon County.

ATHLONE; *Brideswell*.—The sanitation and health of district are fairly satisfactory.

BOYLE; *Ballyfarnan, No. 1*.—No vaccinations in this district during quarter; parents think the weather too severe to bring out their children for vaccination. District very healthy.

BOYLE; *Boyle No. 1, W.*—Influenza has been very prevalent. Vaccination could not be pressed owing to the severity of the weather and the prevalence of sickness amongst children.

BOYLE; *Keadue*.—Sanitary arrangements fair. Vaccinations postponed owing to stormy weather.

CARRICK-ON-SHANNON; *Aughrim*.—The sanitary condition of the district is fairly good.

CASTLEREAGH; *Ballaghaderreen*.—Nothing of importance to advert to, except the total absence during the quarter of disease of an infectious or contagious character.

CASTLEREAGH; *Castleplunket*.—Severe outbreak of scarlet fever. Had schools closed; houses disinfected. Sanitary state of district fair.

ROSCOMMON; *Athleague*.—Rural sanitation greatly interfered with owing to heavy and continuous rainfall.

ROSCOMMON; *Roscommon, W.*—Influenza of a mild type prevalent. Two deaths of persons aged over 100 years registered.

STROKESTOWN; *Roosky*.—Sanitary condition of the district good. Vaccination postponed owing to the very severe weather. One accidental death from shooting, one death from tuberculosis, and three from cancer.

STROKESTOWN; *Strokestown, W.*—On account of the severity of the weather and an epidemic of influenza, there were no children vaccinated during the quarter. The sanitary condition of the district is good.

Sligo County.

BOYLE; *Ballyfarnan No. 2*.—No vaccinations in this district during quarter, in consequence of the severe weather. District healthy.

BOYLE; *Gurteen*.—Very few vaccinations owing to very inclement weather.

DROMORE WEST; *Skreen*.—No vaccination on account of an epidemic of influenza, generally attended by pneumonic complications.

SLIGO; *Ballymote*.—One case of enteric fever occurred in the district during the quarter; the district otherwise quite healthy.

SLIGO; *Carney, No. 1*.—Sanitary condition of district fairly good.

SLIGO; *Carney, No. 2*.—Health of district fairly good. There have been six cases of typhoid fever.

SLIGO; *Collooney*.—A good many cases of influenza during quarter. Three cases of whooping-cough.

TOBERCURRY; *Aclare*.—The health of the district continues good.

TOBERCURRY; *Coolaney*.—Sanitary arrangements fairly good.

TOBERCURRY; *Tobercurry, W.*—Influenza and pneumonia were very prevalent; there were a few cases also of acute rheumatism.

OLIVER AND BOYD, EDINBURGH.

Price One Shilling.

Marriages:—JAN., FEB., MAR., 1904. **Births & Deaths:**—APRIL, MAY, JUNE, 1904.

During the quarter ended 30th June last, there were registered in the 827 Registrars' Districts in Ireland 26,985 births—a number equal to an annual birth-rate of 24·5 in every 1,000 of the estimated population*—and 20,793 deaths, representing an annual rate of 18·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 14,883 persons emigrated.

In England last quarter, the birth-rate represented was 28·3 in every 1,000 of the estimated population, and the death-rate 14·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 over the average rate for the corresponding quarter of the ten years 1894–1903, and 0·4 over the rate for the second quarter of 1903. The deaths are 530 over those registered in the corresponding quarter of 1903; the death rate is 0·5 above the rate for that quarter, and equal to the average for the second quarter of the ten years 1894–1903.

* See page 174.

Compared with those for the corresponding quarter of 1903, the returns of pauperism, furnished by the Local Government Board, show an increase of 264 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 653 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1894-1903, the number of Workhouse inmates shows an increase of 939, and the number of persons on out-door relief shows a decrease of 3,933, the total under both heads being 2.9 per cent. below the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2.3 per cent.

The annual marriage-rate (6.3 per 1,000 of the population) represented by the marriages registered during the first quarter of 1904 is 0.2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 31st March, 1904, and by the Births and Deaths registered in the Quarter ended 30th June, 1904.

* The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast, are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 113.

MARRIAGES.

The marriages (6,950) registered in Ireland during the first quarter of 1904 are equivalent to an annual rate of 6·3 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of 1903, but 0·2 above the average rate for the first quarter of the ten years 1894–1903. Of the total number of marriages 5,574 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,376 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·8 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·3, but that under the latter a decrease of 0·3. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during the first quarter of 1904.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,985—13,820 boys and 13,165 girls—being equal to an annual ratio of 1 in every 40·8, or 24·5 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1894-1903 was 27,270, equivalent to an annual rate of 24·2 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24·4 per 1,000 of the population according to the Census of 1901; Munster, 23·6; Ulster, 25·6; and Connaught, 21·4.

The highest county birth-rate* is 33·6 for Belfast Co. Borough, and the lowest 18·8 for Leitrim. Of the intermediate rates the highest five are—Dublin Co. Borough, 33·5; Antrim, 25·6; Londonderry Co. and Co. Borough, 25·5; Kildare, 25·5; and Kerry, 25·3; and the lowest five are Roscommon, 19·0; Louth, 19·1; Cavan, 19·2; Tipperary, N.R., 19·4; and Meath, 19·5.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 20,793—10,413 males and 10,380 females—affording an annual ratio of 1 in every 52·9, or 18·9 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1894-1903 was also 18·9 per 1,000.

The death-rate in Leinster was 20·1 per 1,000 of the population according to the Census of 1901; in Munster, 18·2; in Ulster, 18·9; and in Connaught, 16·2.

The county death-rates* range from 13·7 in Leitrim to 24·3 in Dublin County Borough. Between these rates the lowest five are Mayo, 14·9; Fermanagh, 15·0; Donegal, 15·8; Kerry, 15·8; and Sligo, 16·3; and the highest five are—Carlow, 22·3; Queen's Co., 21·2; Belfast Co. Borough, 21·2; Wexford, 20·9; and Armagh, 20·4.

TABLE III.—Showing by Quarterly Periods the number of Births and Deaths registered in Ireland in each of the ten years 1894-1903, and the average number for that period; also the number registered during the first and second quarters of the year 1904:—

See note () on page 96.

Ages.—Of the 20,793 deaths registered last quarter, 2,414, or 11·6 per cent., were of children under 1 year old; and 8,888, or 42·7 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 89·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12·5 per cent. of the total deaths registered therein; in Munster, 11·3 per cent.; in Ulster, 12·4 per cent.; and in Connaught, 8·2 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 39·3 per cent.; in Munster, to 44·3 per cent.; in Ulster, to 40·6 per cent.; and in Connaught, to 53·4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 873, or greater by 49 than the number occurring in the corresponding quarter of 1903, and is equivalent to an annual rate of 0·8 per 1,000 living, being 0·1 over the rate for the second quarter of last year, but 0·1 under the average rate for the second quarter of the ten years 1894–1903.

Small-pox.—The Registrars of Achill,† Ballycarry, Lisburn, Belfast (Districts Nos. 11 and 12), Dunglow No. 2, and Bellarena have reported that small-pox occurred in their Districts during the quarter ended 30th June. There were, however, only two deaths registered from the disease, one in Achill, in the Superintendent-Registrar's District of Westport, and the other in Bellarena, in the Superintendent-Registrar's District of Linavady. In the former case the child was vaccinated two days prior to the appearance of the symptoms of the disease, and in the latter the cause of death was registered "most probably variola," and was uncertified. The deaths from small-pox registered in Ireland in the five quarterly periods preceding were 4, 29, 7, 0, and 4 respectively, and the average number of deaths for the corresponding period of the past 5 years is 6.

Measles.—Deaths registered from measles, which numbered 61 in the March quarter of the year, rose to 85 in the period now under notice. They are, however, considerably under the average number (192) for the corresponding quarter of the past 5 years. The 85 deaths represent an annual rate of 0·08 per 1,000 of the estimated population of Ireland. Of the total, 32 deaths were tabulated for the County Borough of Dublin (12 appertaining to the North City District No. 3), and 34 were registered in the County Borough of Belfast, of which number 11 appertained to Belfast Urban District No. 11, and 14 to Belfast Urban District No. 12.

Scarlet Fever.—The deaths from scarlet fever (45) represent an annual rate of 0·04 per 1,000 of the estimated population of the country, and are 7 under the number registered in the quarterly period preceding, but slightly exceed the average (44) for the corresponding quarter of the past 5 years. In 20 counties no death from this disease was recorded. Seven deaths were registered in Dublin County Borough and an equal number in Belfast County Borough; there were also 7 deaths from the disease in the Union of Lisburn.

Typhus.—Although the deaths registered from typhus (17) exceed the number recorded in the previous quarter by 4, they are considerably below the average (31) for the corresponding quarterly period of

* See note (f) on page 102.

† The Registrar of Achill reports that the disease has now entirely disappeared, and that there is no small-pox in the Island or anywhere in the vicinity, the last case having been discharged cured on 16th April.

the preceding 5 years. The deaths from typhus in the year 1903 were respectively for March quarter 21, for June quarter 14, for September quarter 15, and for December quarter 24. Three deaths were registered in Listowel Superintendent Registrar's District, two each in Kells and Westport, and one death was registered in each of the following Superintendent Registrars' Districts:—Banbridge, Belfast, Carlow, Cork, Granard, Kenmare, Mount Bellew, Newtownards, Skibbereen, and Waterford.

Whooping-cough.—The deaths registered from whooping-cough (431), are far in excess of the average (234) for the corresponding quarterly period of the past 5 years, but are slightly below the number (466) recorded in the preceding quarter of 1904. There were 287 deaths from the disease registered in the March quarter of 1903, 241 in the June quarter, 188 in the September quarter, and 252 in the December quarter of the year. The number of deaths from whooping-cough for the June quarter of 1904 represents an annual rate of 0·39 per 1,000 of the estimated population of Ireland. In eight counties no death from whooping-cough was recorded, namely:—Four in Leinster, Kildare, Kilkenny, Louth, and Wicklow; one in Munster, County Tipperary, S.R.; one in Ulster, County Fermanagh; and two in Connaught, namely, Leitrim and Sligo. Sixty-five deaths were registered in Dublin County Borough, 27 in Cork County and County Borough, 16 in Limerick County and County Borough, 109 in Belfast County Borough, and 24 in Londonderry County and County Borough; further, in Nenagh Registrar's District 14 deaths were registered, 9 in Turloughmore, 8 in Lisburn, 7 in New Ross, 6 deaths in Emyvale, 6 in Headford, and 5 in each of the following districts—Fermoy, Killyleagh, and Aughnacloy. The deaths registered from whooping-cough amount to 49 per cent. of the principal epidemic diseases registered during the quarter ended 30th June, 1904.

Diphtheria.—The fatalities caused by diphtheria show a marked decline, when compared with those occurring in the quarter preceding. In the period now under notice 47 deaths were registered, while in the March quarter of the year 79 deaths were registered—the numbers for the three quarterly periods preceding being respectively 71, 49, and 77, and the average number of deaths from diphtheria for the corresponding quarter of the past five years being 67. Nine of the deaths registered appertained to Dublin County Borough, 7 to Belfast County Borough, of which number 4 appertained to the District of Belfast Urban No. 4. Further, there were two deaths from diphtheria registered in each of the districts following:—Newtownbarry, Bandon, Galgorm, Waterside Urban, and Ballycroy.

Enteric Fever.—The deaths recorded from enteric fever numbered 96. In the three quarters preceding the deaths registered were respectively 98, 116, and 110—the average for the corresponding quarter of the preceding five years being 155. The 96 deaths represent a rate of 0·09 per 1,000 of the estimated population.

Of the deaths, 29 were registered for the Province of Leinster, 18 for Munster, 44 for Ulster, and 5 for Connaught. Fourteen appertained to Dublin County Borough, 8 to Cork County and County Borough, 4 to Limerick County and County Borough, and 20 to Belfast County Borough. Four deaths occurred in the Registrar's District of Naas and Carragh, and three deaths were registered in each of the following districts:—Charleville, Lisburn, and Cavan.

In addition to the 17 deaths directly attributed to typhus, and 96 deaths directly attributed to enteric fever, ten deaths were returned in the quarterly period now under notice as being due to simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—The deaths attributed to diarrhoeal diseases, which amounted to 420 in the September quarter of 1903, fell to 200 in the December quarter of that year, and further declined to 99 in the March quarter of 1904, rose in the following quarter, now the subject of review, to 140, which figure represents a rate of 0·13 per 1,000 of the estimated population of the country. Of the deaths from diarrhoeal diseases, 29 were tabulated for the County Borough of Belfast, 12 for the County Down, 11 for Cork County and County Borough, and 7 for Dublin County Borough.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 7 districts, measles in 11 districts, scarlet fever in 17, whooping-cough in 50, diphtheria in 11, fever in 27 (typhus, 10, enteric, 14, and simple or ill-defined fever, 3), influenza in 13; chicken-pox in one, and mumps in 4.

Inquests.—There were 467 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 45 of the total deaths registered.

In Leinster there was 1 inquest to every 42 deaths registered, in Munster 1 to 55, in Ulster 1 to 35, and in Connaught 1 to 110.

Deaths in Public Institutions.—Of the 20,793 deaths registered, 3,990, or 19·2 per cent., occurred in public institutions. In Leinster the percentage was 26·7, in Munster 22·6, in Ulster 13·3, and in Connaught 13·1.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1904, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of total population of the country, was 21·0, and the birth-rate 30·6 per 1,000 of the population according to the Census of 1901; in the remainder of the country the death-rate was 14·5 and the birth-rate 21·5 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·4 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1904, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 2nd July, 1904.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1904, there were 28,718 persons successfully vaccinated; in 2,547 cases the operation was postponed, 21 children were reported as insusceptible of vaccination, and the deaths of 1,471 unvaccinated children under 3 months old were registered, making a total of 32,757 children with regard to whom particulars as to vaccination were ascertained.

† See note (†), page 102.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 14,883 (7,118 males and 7,765 females), being 3,715 less than in the corresponding quarter of the year 1903, and 3,494 under the average number for the second quarter of the ten years 1894–1903.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1903 and 1904:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.
April,	3,777	3,611	—	166	4,325	3,830	—	495	8,102	7,441	—	661

June,	1,306	1,222	—	144	1,383	1,207	—	176	2,749	2,429	—	320
Total,	8,772	7,118	—	1,654	9,826	7,765	—	2,061	18,598	14,883	—	3,715

* Including 12,784 emigrants to the United States of America, viz.:—6,640 in the month of April, 4,279 in May, and 1,865 in June. The passages of 5,241 of these emigrants were paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1903 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1894 it was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being $6d.$ under the average for the corresponding quarter of the year 1903. In the second quarter of 1894 the average price was $14s. 9d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $4s. 7d.$ to $5s. 6d.$ In the second quarter of 1903 the average prices were $3s. 11d.$ to $5s. 1d.$, and the prices for the corresponding quarter of 1894 were $2s. 10d.$ to $4s. 2d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $52s. 6d.$ to $61s.$ per cwt. In the corresponding quarter of 1903 the average prices were from $56s. 6d.$ to $60s. 6d.$, and in the second quarter of 1894 they were from $46s.$ to $59s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $19s.$ to $18s.$ per ton nett.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 90\frac{11}{16}$, and the lowest $\pounds 86\frac{1}{2}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 4 per cent., to which it was lowered from $4\frac{1}{2}$ per cent. on the 14th April.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1904 was 43,095, or 264 over the average for the corresponding quarter of 1903.

The average weekly number of persons receiving out-door relief during the quarter was 56,388, being 653 under the average for the second quarter of 1903.

Of the persons receiving in-door relief during the second quarter of 1904, an average number of 1,423 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1903 the average weekly number was 1,432.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1904, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second quarter of the years 1899–1904, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 108):—

The mean height of the barometer during the second quarter of 1904 was 29.943 inches, being 0.013 inch under the average for the corres-

* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1899–1903; the highest reading (30·408 inches) was on the 22nd June, at 9 A.M., wind W.; and the lowest (29·101 inches) on the 13th April, at 9 A.M., wind S.

The mean temperature of the air during the quarter was $52\cdot1^{\circ}$, or $2\cdot3^{\circ}$ above the average for the second quarter of the five years 1899–1903.

The maximum temperature of the air during the quarter was $70\cdot1^{\circ}$ and the minimum $32\cdot1^{\circ}$. The maximum heat in sun was $125\cdot6^{\circ}$, and the minimum on the grass $25\cdot8^{\circ}$.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 5·165 inches, being 0·531 inch under the average for the second quarter of the five years 1899–1903. The greatest monthly rain-fall was in May, when 2·339 inches were registered.

The wind blew on 32 days from W., on 19 days from E., on 12 days from S.W., on 7 days from S., on 6 days from N.W., on 4 days each from N.E. and S.E., on 3 days from N., and the air was calm on 4 days at 9 A.M.

April—The mean height of the barometer during this month was 29·896 inches; the highest reading (30·323 inches) was on the 21st at 9 A.M., wind W.; and the lowest (29·101 inches) on the 13th, at 9 A.M., wind S. The mean temperature of the air was $46\cdot8^{\circ}$, the maximum registered was $60\cdot7^{\circ}$, and the minimum $32\cdot1^{\circ}$. The 29th was the warmest day, and the 19th the coldest night. The mean of the dry bulb was $47\cdot7^{\circ}$, and of the wet bulb $44\cdot2^{\circ}$. The maximum heat in sun was $120\cdot9^{\circ}$, and the minimum on the grass $26\cdot1^{\circ}$. The minimum on the grass was below 32° on 9 nights. The total amount of sunshine recorded was 170·2 hours, the greatest daily amount being 12·2 hours on the 18th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain or snow fell on 18 days. The rain-fall measured 1·351 inches; the greatest amount in 24 hours was ·260 inches on the 3rd.

May.—The mean height of the barometer during this month was 29·896 inches; the highest reading (30·239 inches) was on the 19th at 9 P.M., air calm, and the lowest (29·505 inches) on the 1st, at 9 P.M., wind S.S.W. The mean temperature of the air was $49\cdot8^{\circ}$, the maximum registered was $67\cdot0^{\circ}$, and the minimum $33\cdot1^{\circ}$. The 12th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was $52\cdot3^{\circ}$, and of the wet bulb $48\cdot3^{\circ}$. The maximum heat in sun was $124\cdot5^{\circ}$, and the minimum on the grass $25\cdot8^{\circ}$. The minimum on the grass was below 32° on 12 nights. The total amount of sunshine recorded was 207·5 hours, the greatest daily amount being 14·7 hours on the 29th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain fell on 18 days. The rain-fall measured 2·339 inches; the greatest amount in 24 hours was 1·140 inches on the 31st.

June.—The mean height of the barometer during this month was 30·037 inches; the highest reading (30·408 inches) was on the 22nd, at 9 A.M., wind W.; and the lowest (29·291 inches) on the 14th, at 9 A.M., wind S. The mean temperature of the air was $59\cdot8^{\circ}$; the maximum registered was $70\cdot1^{\circ}$, and the minimum $36\cdot4^{\circ}$. The 29th was the warmest day, and the 27th the coldest night. The mean of the dry bulb was $57\cdot2^{\circ}$, and of the wet bulb $52\cdot6^{\circ}$. The maximum heat in sun was $125\cdot6^{\circ}$, and the minimum on the grass $32\cdot4^{\circ}$. The total amount of sunshine recorded was 231·1 hours, the greatest daily amount being 14·8 hours on the 5th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain fell on 10 days. The rain-fall measured 1·475 inches; the greatest amount in 24 hours was ·285 inch on the 9th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared under the direction of the Meteorological Council.

In compiling the following Table (pp. 110, 111), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	The Meteorological Council.
Donaghadee,	The Meteorological Council.
Belfast, Queen's College, . .	John Wylie, B.A.
Armagh, The Observatory, . .	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blackrod Point,	The Meteorological Council.
IRELAND, SOUTH:—

(*) See note (*), page 113.

† The Registrars' Districts (897 in number) are Sub-divisions of the Union or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary District of the same name formed under the Medical Charities Act.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 125 and 126 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 3rd April, to 2nd July, 1904. With the exception of 124 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

† Exclusive of 9 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which they have been assigned

NOTE.—This table has been constructed for the years 1830 and 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1904—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901, respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars, to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW ; *Bagenalstown*. — No death from cancer District healthy.

CARLOW ; *Clonegall*. — There were five cases of diphtheria during the quarter ; no death resulting therefrom.

CARLOW ; *Leighlinbridge*. — District healthy.

CARLOW ; *Tullow*. — District is in a very healthy state.

Dublin County.

BALROTHERY ; *Holmpatrick, W*. — There was one death registered during the quarter at 100 years.

DUBLIN, NORTH ; *Blanchardstown and Castleknock*. — District very healthy. One case of diphtheria due to direct contagion.

DUBLIN, SOUTH ; *Rathfarnham*. — One case of cancer (of pancreas).

Dublin County Borough.

DUBLIN, NORTH ; *North City No. 1 East*. — District in healthy condition, but a few cases of measles have occurred lately, which I sent to hospital to prevent if possible an outbreak.

Kildare County.

CELBRIDGE ; *Celbridge, W*. — District very healthy.

CELBRIDGE ; *Maynooth*. — District exceptionally healthy.

EDENDERRY ; *Carbury*. — Three cases of enteric fever, now well. A large number of cases of whooping-cough, but as the

people are getting educated up to leaving them constantly in the open air none of the children were very ill.

EDENDERRY ; *Rathangan, No 1*. — A death — of a farmer, aged 37 years, from consumption — duration of illness, three years. Deaths from consumption in same house and family had occurred previously.

NAAS ; *Clane and Timahoe North*. — I have registered the death of a woman in this quarter at the age of 105 years. Never unwell during her lifetime, and only confined to bed before her death for two days.

NAAS ; *Kildare*. — Condition of district good.

NAAS ; *Naas and Carragh, W*. — A few cases of scarlatina in the urban district.

NAAS ; *Robertstown and Kilmeage*. — I registered the death of one person aged 99 years during the quarter.

Kilkenny County.

CALLAN ; *Callan, W*. — District very healthy.

CARRICK-ON-SUIR ; *Pilltown*. — A low form of influenza was very prevalent during the quarter.

CASTLECOMER ; *Ballyragget*. — Sanitary arrangements very fair. All the principal epidemic diseases absent. Influenza with pulmonary complications prevalent.

CASTLECOMER ; *Castlecomer, W*. — Deaths below the average this quarter.

KILKENNY ; *Tullaroan*. — District in general healthy.

NEW ROSS ; *Dysartmoon, No. 1*. — District healthy. No sickness heard of.

URLINGFORD ; *Urlingford, W*. — Three cancer cases registered. Health of district good.

WATERFORD; Kilmakeeoge.—No deaths from cancer. Deaths registered of four persons aged 70, 80, 67, and 66 years; the first two cases were those of females, and the latter two of males.

King's County.

BIRR; Fərbane.—Epidemic of scarlet fever during the quarter; two deaths. Sanitary arrangements fair.

BIRR; Killyon.—Health of the district good during the quarter.

BIRR; Kinnitty.—District fairly healthy.

EDENDERRY; Rathangan, No. 2.—A death occurred from whooping-cough, a child 2 months old. One death of a woman aged 83 years from carcinoma; duration, two years.

MOUNTMELICK; Clonygowan, No. 2.—Whooping-cough prevalent. District healthy.

ROSCREKA; Shinrone.—The sanitary condition of district good. A few cases of whooping-cough occurred during month of May, but were of a mild type. One death of a person aged 95 years registered.

TULLAMORE; Clara.—During quarter I registered the death of a man whose age was stated to be 100 years. I have known the man; he retained all his faculties to the last, and he was walking about the day before the night he died.

TULLAMORE; Killoughy.—Sanitation of district fairly good.

Longford County.

BALLYMAHON; Abbeyshrule.—District healthy.

BALLYMAHON; Ballymahon, W.—The sanitary arrangements in the district are satisfactory. Two persons whose deaths were registered were aged 95 and 98 years, respectively.

GRANARD; Ballinallee.—The district is in fairly good sanitary condition, and free from contagious disease.

GRANARD; Granard, W.—Sanitary arrangements good. No infectious diseases, except one case of typhus, which was admitted to the fever hospital from another district.

Louth County.

ARDEE; Castlebellingham.—District very healthy, and in a fairly good sanitary state.

ARDEE; Dunker.—District healthy.

DROGHEDA; Termonfeckin.—District healthy. Sanitary condition good. No epidemic of any kind.

DUNDALK; Barronstown.—The district is in an exceptionally healthy state at present. During the beginning of the quarter there were three cases of scarlatina in one family. I had these removed to fever hospital, the house, clothes, &c., disinfected, and there has been no recurrence of the disease.

DUNDALK; Dundalk, W.—The quarter has been an exceptionally healthy one. Two cases of typhoid fever occurred in members of the same family in May, and they were immediately removed to hospital as they occurred. The district is at present free from all zymotic disease.

DUNDALK; Ravensdale.—Health of district very good. A mild epidemic of measles. Sanitary condition very good. The people seem to appreciate the handbills, &c., on phthisis. It appears to me to be less common in this district than twenty years ago. I attribute this to improved conditions of living, and in a measure to my constant preaching the danger of contact and the necessity of sunlight and ventilation and the danger of overcrowding at night.

Meath County.

DROGHEDA; St. Mary's.—The sanitary arrangements and health of the district are good.

DROGHEDA; Stamullen.—The district has been healthy during the quarter. Sanitary state and water supply fairly good.

DUNSHAUGHLIN; Ratoath, W.—The sanitary arrangements of the district are good, and any defect is immediately attended to on its being reported.

KELLS; Kells, W.—The district is unusually healthy.

KELLS; Kilskeer.—District very healthy.

KELLS; Moynalty.—Typhus fever occurred in one house at the beginning of the quarter. The mother of the family alone contracted the disease.

KELLS; Nobber.—Sanitary arrangements in the district are, I believe, up to date.

NAVAN; Painestown.—Two deaths from tubercular disease and two deaths from malignant disease.

OLDCASTLE; Oldcastle, W.—The district continues in a satisfactory condition. Two cases of typhus fever from another district were treated in the fever hospital and discharged cured.

TRIM; Athboy.—Sanitary condition of district is good.

TRIM; Innfield.—Two girls from the same house (a labourer's cottage) died during the quarter—one from tubercular meningitis, and the other from pulmonary phthisis. A brother has also gone to hospital suffering from phthisis.

TRIM; Summerhill.—District unusually healthy during past quarter. No cases of infectious diseases recorded.

TRIM; Trim, W.—District particularly free from epidemic disease. The patient whose death is registered as having been caused by fever, came from another Dispensary District, and was admitted to Trim fever hospital.

Queen's County.

ABBEYLEIX; Ballinakill.—District remains in a good state of health.

MOUNTMELICK; Clongowan, No. 1.—Whooping—cough prevalent. District otherwise healthy.

MOUNTMELICK; Coolrain.—One death registered during quarter of a person aged 103 years.

MOUNTMELICK; Mountmellick, W.—A very large number of cases of pneumonia prevalent in the month of June.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the quarter, but the number of deaths registered is very large. They are chiefly old people.

Westmeath County.

ATHLONE; Glassan.—I registered the following deaths of old people at ages—92, 88, 80, 76, 70, and 69 years.

DELVIN; Delvin, W.—The sanitary arrangements are fairly good.

MULLINGAR; Ballynacarrigy.—District in normal state.

MULLINGAR; Castletown Geoghegan.—The sanitary state of the district is satisfactory. No case of zymotic disease occurred in the district during the quarter.

MULLINGAR; Milltown.—Pulmonary phthisis and tuberculous meningitis accounted for four of the deaths registered during last quarter. Three of these deaths were of males aged 9, 16, and 52 years respectively. The medical officer reports that the loss through emigration was greater than in any of the June quarters since 1901. No deaths from cancer.

MULLINGAR; Mullingar, W.—The health of this district has been fairly good during past quarter. No deaths from cancer.

MULLINGAR; Multyfarnham.—Whooping cough is at present prevalent amongst the children of the district. The aggregate age of the four persons whose deaths have been registered totals 315 years.

Wexford County.

ENNISCORTHY; Enniscorthy, W.—Vaccination was postponed in twenty cases as the children were suffering from pertussis.

ENNISCORTHY; Newtownbarry.—There were four cases of diphtheria with two deaths during the quarter. One death of a person aged 103 years was registered.

GOREY; Camolin.—The health of the district is very fair. A few cases of a low type of gastro-intestinal influenza and of simple recurrent fever came under notice. That pulmonary tuberculosis is infective is dawning upon the public here, a thing which augurs well for the more radical treatment of that disease.

NEW ROSS; Dysartmoon, No. 2.—District very healthy. No sickness prevalent.

NEW ROSS; New Ross, W.—Whooping-cough, which was prevalent a short time since, is now disappearing. There were a couple of cases of typhoid fever during the quarter, but no death from it; otherwise the district is healthy.

WEXFORD; Bridgetown.—Scarlatina was prevalent during the quarter.

WEXFORD; Taghmon and Glynn.—The deaths (7) are below the average (13) for the corresponding quarter of the four preceding years.

Wicklow County.

BALTINGLASS; Kiltegan.—The sanitary arrangements in one village are imperfect, many of the houses having no closet accommodation. The doctor is having some trouble in enforcing the necessary improvements. However, we have had no outbreak of serious disease lately. The preponderance of lung diseases is, I think, attributable to the small care farmers give themselves at fairs and when attending to cattle and sheep on their farms and on the mountains. Two deaths were of men over 80 years old, two of children 16 and 22 months old, constitutionally weak from birth, and I am satisfied the absence of medical attention in both cases was not caused by any sinister motives on the part of the parents. I beg to add the 26 vaccination cases consist of children over three months old when vaccinated.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The district has been healthy.

RATHDRUM; Annamoe.—District healthy during quarter.

RATHDRUM; Arklow.—Deaths were registered during the quarter at the ages of 83, 84, 86, and 89 years respectively.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—District continues very healthy.

CORROFIN; Corrofin, W.—Health of district good.

ENNIS; *Ennis, No. 2.*—The health in this district continues very good.

ENNIS; *Newmarket.*—The health of the district was generally good. Whooping-cough prevailed through the entire district, but no case ended fatally.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. I had six cases of scarlet fever in the district during the quarter. All terminated satisfactorily. I registered one death at 112 years, the informant being nephew of deceased.

ENNISTIMON; *Roadford.*—District very free from any contagious disease.

KILLADYSERT; *Ballynacally, W.*—A death at 81, and two deaths at 91, are registered, and one at the age of 101 years. As is my custom, I enquired for evidence of this age. The informant, who is himself a grandfather for many years past, is the youngest of the family of deceased. He says he is 51, but I should think he is older. There were five elder than he of the family. He thinks his eldest brother would, if alive, be twenty years older than he is. Deceased worked and earned a man's wages at the building of Goulbourne Bridge, on the road from Ennis to Kilrush. The date engraved on this bridge is 1823. Informant thinks it likely that his father was really older than he stated to the Registrar. Many of his old cronies put him at 110 years.

KILLADYSERT; *Labasheeda.*—Influenza, of a mild type, very prevalent in district.

KILRUSH; *Carrigaholt.*—Influenza was prevalent during the past quarter. Otherwise health of district very good.

KILRUSH; *Craggaknock.*—The district is in a very healthy state at present, and has been for past quarter.

KILRUSH; *Kilmihil.*—District still continues in a healthy condition. Eleven of the twenty deaths registered for the quarter were of persons over 60 years of age, of whom 5 were over 80 years.

KILRUSH; *Kilrush, W.*—There have been a considerable number of cases of influenza and pneumonia during the quarter. Otherwise district has been healthy.

LIMERICK; *Bridgetown.*—Sanitary condition of district good.

LIMERICK; *Coolacasey.*—The sanitary condition of the district is satisfactory.

SCARRIFF; *Anacarriga.*—District healthy.

SCARRIFF; *Feakle.*—Whooping-cough in portion of district. One death registered therefrom. Health of district otherwise good.

SCARRIFF; *Mountshannon, W.*—Chin-cough very prevalent during past quarter, otherwise district healthy.

TULLA; *Kilkishen.*—There was one well-marked case of scarlet fever in the early

part of the quarter, but the disease did not spread. Whooping-cough (pertussis) of a mild type is prevalent at present in one end of the district. Four deaths at 80 (two) 82 and 96 years were registered.

TULLA; *Quin.*—The sanitary condition of the district is very fair.

Cork County and County Borough.

BANDON; *Inishannon.*—The district is free from infectious disease, and in a fairly sanitary condition.

BANTRY; *Bantry, W.*—Sanitary state of district very good.

BANTRY; *Durrus and Kilcrohane.*—Measles and pertussis very prevalent for first two months of quarter, but now nearly disappeared. District otherwise healthy.

BANTRY; *Kealkill.*—The sanitary condition of district is fairly good. There was no case of cancer.

CASTLETOWN; *Castletown, W.*—The district is in a fairly healthy condition.

CASTLETOWN; *Kilcatherine.*—Catarrh prevalent among children retarding vaccination, also an odd case of pertussis. District otherwise healthy.

CLONAKILTY; *Rossacabery.*—District perfectly healthy.

CLONAKILTY; *Timoleague.*—There was an epidemic of whooping-cough in this district during the quarter.

CORK; *Douglas.*—No case of cancer has been reported since last quarter.

DUNMANWAY; *Dunmanway, W.*—District at present healthy.

FERMOY; *Ballynoe.*—Two of the deaths were due to cancer, and five to tuberculosis. All deaths under 60 years were due to the latter disease.

FERMOY; *Rathcormack.*—Five of the ten deaths registered during the quarter were of persons of the following ages:—65, 72 (two) 76 and 101 years.

KANTURK; *Kanturk, W.*—I registered the death of a person aged 100 years, and of another aged 103 years during the quarter.

KILMALLOCK; *Charleville.*—The district is healthy.

KINSALE; *Ballyfeward.*—Health of district good. One death registered at 90, another at 72 years. Three cases of scarlet fever treated during quarter—one accompanied with serious throat complications and bronchitis—in the house of a farmer. All recovered. As they were well cared at home, and I was not called in for some days after the appearance of the disease, I considered it inadvisable to have them removed. The house was limewashed, cleansed, fumigated, &c., and bedclothes thoroughly aired.

MACROOM; *Inchigeelagh.*—The district was exceptionally free from disease, epidemic or otherwise, during the quarter.

MALLOW; Ballyclogh.—District healthy. No infectious diseases were notified during quarter.

MALLOW; Buttevant.—Sanitary state of district satisfactory.

MALLOW; Kilshannig.—There was no death from cancer registered during the quarter.

MALLOW; Rahan.—A good many cases of measles have occurred in the district during the past quarter. Otherwise the district has been healthy, and free from infectious diseases.

MIDDLETON; Middleton No. 2.—General health of district good.

SKIBBEREEN; Skibbereen, W.—District free from infectious diseases.

SKIBBEREEN; Unionhall.—One case of typhus fever registered. District at present free from infectious disease.

SKULL; Goleen.—Whooping-cough was prevalent in the district. This prevented parents from bringing their children for vaccination.

SKULL; Skull, W.—There were five deaths from phthisis registered during the quarter. Of the fifteen deaths of persons over 60, three were over 80, and one over 90 years of age.

Kerry County.

CAHERSIVEEN; Caher, W.—The district is in good sanitary condition.

CAHERSIVEEN; Darrynane.—The sanitary condition of district is fairly satisfactory, and there has been no case of zymotic disease during the quarter just ended.

CAHERSIVEEN; Glanbehy.—The fourteen deaths registered for this quarter include those of two women each aged 90 years.

CAHERSIVEEN; Valencia.—There are two deaths registered from whooping-cough.

DINGLE; Anascaul.—Pertussis prevalent during the quarter. District otherwise healthy.

DINGLE; Castlegregory.—Owing to the prevalence of pertussis, vaccination was backward.

DINGLE; Dingle, W.—A good many people suffered from chest affections caused by the cold and wet weather we have had all the year, and several old people died from acute attacks supervening on chronic affections of the lungs.

KENMARE; Tuosist.—No epidemic. District in good sanitary condition, and exceptionally free from disease.

KILLARNEY; Coom.—An unusual number of deaths occurred during the quarter, principally amongst elderly persons. One case of typhus fever. Vaccination normal. Sanitary condition of district fairly good.

KILLARNEY; Killarney, No. 1, W.—One case of scarlatina during quarter.

KILLARNEY; Killarney, No. 2.—District fairly healthy—few cases of influenza.

KILLARNEY; Milkbown.—District healthy. Sanitary condition good. No contagious or infectious diseases.

LISTOWEL; Ballyunion.—Public health is good.

LISTOWEL; Ballyhorgan.—Sanitary state of district good.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. One case of typhus fever which was prevented from spreading by precautions. Vaccination very good for quarter, with advent of fine weather. Death and birth rate normal.

TRALEE; Castlemaine.—Sanitary state of the district good. Vaccination going on at present.

TRALEE; Kilgobban.—The district is healthy.

TRALEE; Tralee No. 2.—The epidemic of whooping-cough, which is abating, is the reason for the considerable falling-off of primary vaccinations, and has been the cause of four deaths registered. Three deaths registered have been from cancer, and one from diphtheria. The sanitary condition of the district, urban and rural, is good.

Limerick County and County Borough.

CROOM; Castletown.—Save for whooping-cough, the district has been healthy.

KILMALLOCK; Bruff.—There were three deaths registered during the quarter, of persons aged 90 years, 86 years, and 85 years respectively. Whooping-cough, influenza, and chicken-pox were prevalent during the quarter. Vaccination postponed in consequence. Sanitary condition of district good.

KILMALLOCK; Bruce.—Registered the deaths of a male and a female each aged 90 years. District very healthy.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinnane.—District particularly healthy.

KILMALLOCK; Kilmallock, W.—Bronchitis and broncho-pneumonia prevalent during last month of quarter amongst infants and young children. District otherwise healthy.

LIMERICK; Annacotty.—Sanitary arrangements fair. District healthy.

LIMERICK; Limerick No. 3.—During the quarter there were registered seven deaths from bronchitis, one from bronchitis and gastritis, eight from pulmonary phthisis and tuberculosis, six from pertussis, five from convulsions, five from tubercular meningitis, two from cerebral hæmorrhage,

one from cerebral softening, two from debility, one from influenza, one from Bright's disease, one from jaundice, one from rheumatism with debility, one from heart disease, one from lupus and stomatitis, one from tubercular disease of hip, one from shock from accident in which an inquest was held, one from inanition, and one from senile decay. Pertussis has now almost entirely disappeared from the district. There have been a few cases of scarlatina during the quarter—no death from it. Health of district is now fairly good.

LIMERICK; Moroe.—District in good sanitary condition.

LISTOWEL; Glia.—I am pleased to be in a position to report that the district enjoyed, during the quarter just ended, perfect immunity from infectious disease.

MITCHELSTOWN; Galbally.—District exceptionally healthy, save for a few cases of pneumonia, which were not fatal.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair.

NEWCASTLE; Newcastle, W.—District healthy.

RATHKEALE; Askeaton.—Four of the deaths registered were caused by phthisis. During the quarter the district was very healthy and free from epidemic diseases, except two cases of whooping-cough.

RATHKEALE; Pallaskerry.—The sanitary arrangements are fairly good. Influenza has been prevalent during the quarter.

RATHKEALE; Rathkeale No. 1, W.—Nearly half the deaths were due to pulmonary affections—eight from tuberculosis, and four from bronchitis. The district was healthy and free from any form of contagious disease. One case of enteric fever and one of puerperal septicaemia from outside districts died in the union hospital. There was one case of cancer (epithelioma of ear), and one of suicide by hanging.

Tipperary County, North Riding.

BIRR; Riverstown.—District healthy. No epidemic.

BORRISOKANE; CloghJordan.—Whooping-cough has been very prevalent during past quarter; no deaths. There was also an outbreak of scarlatina, confined to one house. Otherwise, this district is healthy.

BORRISOKANE; Terryglass.—District healthy. No epidemic.

NENAGH; Nenagh, W.—Whooping-cough was very prevalent during the quarter, and of a rather severe type, also a good many cases of mumps have turned up during the past month, not very severe so far.

NENAGH; Newport.—District healthy. No epidemic of any infectious disease.

NENAGH; Portroe.—District healthy.

THURLES; Littleton.—No case of death from cancer registered during the quarter.

THURLES; Templemore.—Sanitary arrangements satisfactory.

Tipperary County, South Riding.

CALLAN; Mullinahone.—Sanitary state of district fairly good. No infectious or contagious disease prevalent except influenza during month of April and part of May, usually complicated with lung troubles. Of the ten deaths registered all were of persons aged 60 years or upwards, including one woman aged 96 years.

CASHEL; Killenale.—The district is in a very healthy condition, and free from diseases of all kinds. Nearly all the deaths registered are of old people.

CASHEL; Kilpatrick.—The death is registered of one spinster aged 100 years.

CLOGHEEN; Caher.—No cases of an epidemic character occurred during the past quarter. District healthy.

CLOGHEEN; Clogheen, W.—District wholly free from zymotic diseases.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—Five cases of enteric fever during the quarter. Otherwise the district is healthy.

TIPPERARY; Tipperary, W.—The district has been in a healthy condition during the quarter.

URLINGFORD; Kilcooly.—Sanitary state of district good so far as being free from the principal zymotic diseases, but influenza (with lung complication) was very prevalent.

Waterford County and County Borough.

DUNGARVAN; Dungarvan, W.—There were a few cases of scarlatina of a mild type in urban portion of district during the quarter. Vaccination was well attended to.

DUNGARVAN; Whitechurch.—District healthy.

KILMAGTHOMAS; Bunmahon.—The district is healthy, and free from zymotic disease.

LISMORE; Ballyduff.—Sanitation, vaccination, and general health of district very satisfactory.

LISMORE; Cappoquin.—A mild type of whooping-cough prevailed more or less throughout the district during the quarter.

LISMORE; Lismore W.—Two deaths of persons over 100 years registered during the quarter, one stated to be 105 and the other 108 years.

YOUGHAL; Ardmore.—District healthy.

YOUGHAL; Clashmore.—One case of death due to cancer of cervical glands registered; a sister of this person died last year of cancer of pylorus.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.*—Vaccination is well performed in the district.

ANTRIM; *Crumlin.*—Whooping-cough prevalent during the quarter.

ANTRIM; *Doagh.*—There has been very little infectious disease in the district during the quarter, with the exception of influenza and whooping-cough.

ANTRIM; *Templepatrick.*—The sanitary arrangements of the district are fairly good; no epidemic, and nothing of special interest.

BALLYMENA; *Ballymena, W.*—Town and district healthy.

BALLYMENA; *Broughshane.*—An epidemic of mumps still lingers in the district, but very few of the cases come for medical treatment. Otherwise the district is very healthy.

BALLYMENA; *Clogh.*—A few cases of enteric fever during last week of quarter. Otherwise district fairly healthy.

BALLYMENA; *Galgorm.*—The district has been free from infectious disease during the quarter, except in the case of one family where diphtheria occurred, with two deaths. The water supply is found polluted.

BALLYMENA; *Portglenone.*—The health of the district is good. The sewerage system of one village requires to be remodelled, as the drinking water might be polluted from this source.

BALLYMENA; *Toome.*—Sanitary condition of district good.

LARNE; *Ballycarry.*—Sanitary state of district fairly good. No extension of small-pox arising from cases which occurred in the district during last quarter. One isolated case of typhoid fever occurred which ended fatally.

LARNE; *Waterfoot.*—There has been one case of enteric fever in the district this quarter. At present the sanitary arrangements of the district are very good.

LISBURN; *Dunmurry.*—The sanitary condition of this district is good; there is no epidemic of any kind.

LISBURN; *Glenavy.*—Measles and whooping-cough very prevalent. The latter responsible for two fatalities; the former none.

LISBURN; *Knocknadona.*—The sanitary condition of this district is good. One death of a male from cancer of pylorus was registered. His mother had a cancer-wart on her face; she died at the age of 80 years.

LISBURN; *Lisburn, W.*—Three cases of small-pox occurred during the quarter, but all are recovering. There were five deaths registered as having been caused by cancer, two (of persons admitted from the country) occurring in hospital; the informant knew nothing of the family history; a third

came to Lisburn recently on account of her husband's death; nothing is known of her history; the remaining two belong to Lisburn, and their relatives deny that there is any history of cancer in the family.

LURGAN; *Aghalee.*—Of the 12 deaths registered during quarter, 4 were due to pulmonary phthisis at average age of 21½ years. One malignant case registered at 71 years.

Armagh County.

ARMAGH; *Armagh, W.*—There were five cases births of twins registered—a most unprecedented number in one quarter.

ARMAGH; *Blackwatertown.*—Two deaths occurred from cancer.

ARMAGH; *Markethill.*—Whooping-cough is dying out in this district; it, however, caused three deaths during the quarter.

CASTLEBLAYNEY; *Newtownhamilton No. 1.*—There were two deaths from whooping-cough and two from cancer.

LURGAN; *Lurgan No. 1, W.*—The health of the district has been very good during the quarter.

LURGAN; *Lurgan No. 2.*—There was no epidemic in the district; sanitary condition good; no infectious disease during the quarter.

NEWRY; *Mountnorris.*—Severe epidemic of whooping-cough continued from previous quarter; mumps also epidemic.

NEWRY; *Mullaghglass.*—District healthy, except for some cases of whooping-cough.

Belfast County Borough.

BELFAST; *Belfast Urban No. 4, W.*—Four cases insusceptible of vaccination; this number is correct, a certificate from a private medical practitioner having been received in each case.

BELFAST; *Belfast Urban No. 11.*—There have been two cases of small-pox in the district during the quarter.

BELFAST; *Belfast Urban No. 12.*—A large number of cases of small-pox have occurred during the past month. Every means both by disinfection, etc., and re-vaccination are being used to prevent its spread.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District is in a very healthy condition.

CAVAN; *Ballyhaise.*—District in good sanitary condition.

CAVAN; *Killeshandra.*—Four deaths from tuberculosis registered during the quarter. District healthy.

COCHEHILL; *Tullyvin*.—District remarkably healthy.

ENNISKILLEN; *Holywell No. 2*.—The sanitary arrangements of the district are fairly good.

OLDCASTLE; *Ballyjamesduff*.—District healthy; a few cases of typhus fever were imported, or the disease contracted in another district. I had them removed to hospital, where they recovered, and the disease did not spread.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary arrangements fairly good.

DONEGAL; *Dunkineely*.—No epidemic during quarter.

DONEGAL; *Mountcharles*.—There has been no epidemic during the quarter. District healthy, and in fair sanitary condition.

DONEGAL; *Pettigoe*.—A few cases of whooping-cough occurred in the district.

DUNFANAGHY; *Crossroads*.—The district has been free from any form of infectious disease during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District very healthy. Of the twenty deaths registered, the ages of ten were, one at 60 years, three at 70, and one each at 76, 80, 81, 83, 84, and 87 years, respectively.

GLENTIES; *Ardara*.—The sanitary arrangements in this district are good.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow No. 2*.—There were three cases of small-pox during the quarter, also an epidemic in Aranmore Island, amongst children, of simple fever, complicated in a number of cases with pneumonia or bronchitis.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Carndonagh, W.*—District fairly healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District is healthy at present.

LETTERRKENNY; *Church Hill*.—District healthy.

MILFORD; *Fanad*.—Sanitary arrangements fairly good, and district very healthy at present.

MILFORD; *Rathmullan*.—District has been healthy during quarter.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. Scarlatina of a mild type prevalent in the district, but no deaths reported therefrom.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—One isolated case of typhoid fever—source unknown; otherwise district healthy.

Down County.

BANBRIDGE; *Ballyward*.—The sanitary state of district fair. One death from typhus, two from cancer of stomach, one from tumour of spleen, probably malignant, four from heart disease.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are on the whole fairly good.

DOWNPATRICK; *Ballymahinch*.—There have been a number of cases of whooping-cough (with two deaths therefrom) in the district during the quarter, but no other epidemic disease.

DOWNPATRICK; *Clough*.—No deaths from infectious diseases.

DOWNPATRICK; *Killyleagh*.—There has been an epidemic of whooping-cough in some divisions of the district; the cases were amongst infants too young to attend school. Five deaths have been attributed to the disease and its complications; otherwise the district is healthy, and the death-rate lower than usual. Of the thirty-five deaths registered during the quarter just ended, sixteen were aged 60 years and upwards.

DOWNPATRICK; *Portaferry*.—Whooping-cough is still in the district; two deaths from it in the first month of the quarter; otherwise the health of the district was good. Vaccination very well attended to.

KILKEEL; *Rosstrevor*.—Public health excellent.

LISBURN; *Drumbeg*.—Births and deaths above the average. Whooping-cough has been prevalent, and four deaths have been caused by it.

LISBURN; *Saintfield*.—The health of district for the quarter was very good.

LURGAN; *Moir*.—One death from cancer. Whooping-cough is the only zymotic disease in the district, which is particularly healthy at present. Deaths, average; births, above average, being exactly double the deaths.

LURGAN; *Waringstown*.—During the quarter there were 19 cases of scarlet fever and 3 cases of enteric fever in the district. Six of the former and all of the latter were removed to hospital. There was no death registered from either. Dr Clibborn made a report on the sanitary state of the district; he recommended the deepening of wells and the erection of pumps.

NEWRY; Donaghmore.—Sanitary arrangements good.

NEWRY; Rathfriland.—No epidemics.

NEWTOWNARDS; Bangor.—Sanitary arrangements excellent; no disease prevalent; vaccination well attended to.

NEWTOWNARDS; Comber.—Measles and whooping-cough were very prevalent in the district, not of a severe type; most country schools had to be closed for a time, and vaccination had generally to be postponed for a time.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Whooping-cough present in two divisions; two deaths registered as due to it. No epidemic at present in the district; general health fairly good. Three deaths registered aged over 80 years, one aged 92, and another aged 95 years.

NEWTOWNARDS; Newtownards, W.—During the past quarter 15 cases of scarlet fever have been reported; two cases of typhus fever have also been reported. One of the cases died. The typhus cases and nearly all the scarlet fever cases were taken to hospital.

Fermanagh County.

CLORES; Rosslea.—The district is in a fair sanitary condition.

ENNISKILLEN; Enniskillen, W.—Sanitary arrangements fairly good.

ENNISKILLEN; Florenocourt.—One death from diphtheria took place in a family of five; the remainder recovered. Precautions as to isolation and disinfection were observed.

ENNISKILLEN; Holywell, No. 1.—The sanitary arrangements of the district are fairly good.

IRVINESTOWN; Clonelly.—A few cases of whooping-cough; otherwise district healthy.

IRVINESTOWN; Ederney.—District healthy; whooping-cough declining; owing to whooping-cough, vaccination not up to average.

LISNASKEA; Derrylin.—Sanitary condition primitive.

LISNASKEA; Lisnaskea, W.—Death-rate very low during quarter. Seven of the persons whose deaths were registered were aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—District has been very healthy during the quarter.

COLERAINE; Coleraine, W.—Four deaths from tuberculous diseases in urban district, and one in the rural district. One case of cancer of stomach occurred in the rural district, and another case of cancer of pelvic organs (abdominal) in the urban district.

COLERAINE; Garvagh.—Health of district good; no epidemic.

COLERAINE; Kilrea.—Health of the district satisfactory, which is at present free from infectious disease. In the middle of May there was one case of typhoid fever, which was removed to hospital, but strict precautionary measures were taken, and there is no further spread of the disease. Of the deaths registered during the quarter more than the half occurred at ages from 60 to 93 years.

COLERAINE; Portstewart.—District is healthy.

LIMAVADY; Bellarena.—An epidemic of smallpox occurred in the district during the past quarter; ten cases were removed to hospital for treatment. The disease was conveyed from Glasgow; no fresh cases since 16th June.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory; mortality about average, principally among the aged. One death from whooping-cough, complicated with chest affection; two from phthisis; in one a history of heredity; other not. Mumps with severe pyrexia, and whooping-cough with pulmonary complications prevailed during quarter in certain parts of district. Vaccinations about the average.

LIMAVADY; Limavady, W.—One death registered at 100 years, and two at 90 years. One case of cancer of the stomach, no family history.

LONDONDERRY; Cloudy.—One death from carcinoma of liver was registered; no fact throwing light on causation was elicited. Of 15 deaths registered, 11 were of persons aged 60 years and upwards, and the other four were due to tuberculosis.

LONDONDERRY; Eglinton.—No case of cancer.

LONDONDERRY; Waterside Urban W.—Two deaths from cancer, one of stomach and the other of forearm.

MAGHERAFELT; Moneymore.—Births of males almost double that of females. Whooping-cough of a very severe type, with its chest complications, caused six deaths; the disease has now almost disappeared. No other infectious disease prevalent at present; district otherwise healthy.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—District healthy.

CASTLEBLAYNEY; Ballybay.—Vaccination was well up to the average, the lymph supplied from the Vaccine Department giving good results in nearly all cases.

COOTEHILL; Dawsonsgrove.—The sanitary condition of the district is fairly good.

COOTEHILL ; Drum, No. 1.—The district is in a healthy state, and sanitary arrangements good, with the exception of one village.

MONAGHAN ; Castleshane.—District sanitary. An epidemic of scarlet fever has broken out among children attending a national school; have had cases removed to fever hospital, given instructions to have houses and clothes disinfected, and requested Manager to have school closed for six weeks.

MONAGHAN ; Emyvale.—There were six deaths due to whooping-cough registered; it is still prevalent. The sanitary condition of the district is satisfactory.

MONAGHAN ; Kilmore.—Two deaths from whooping-cough, both under one year old.

MONAGHAN ; Monaghan, W.—The sanitary arrangements of the district are satisfactory; there has been no epidemic. There has been one death from scarlatina.

MONAGHAN ; Scotstown.—The health and sanitary condition of the district are satisfactory.

Tyrone County.

CASTLEDERG ; Castlederg, W.—Sanitary state of district satisfactory; no epidemics of any kind.

CASTLEDERG ; Drumquin.—The sanitary arrangements of the district are very satisfactory, with no infectious diseases.

CASTLEDERG ; Killeter.—State of district healthy.

CLOGHER ; Aghnacloy.—The epidemic of whooping-cough, which began last quarter, continued in a severe form throughout this quarter; it is now on the wane.

CLOGHER ; Fivemiletown.—The health of the district was good during the quarter.

COOKSTOWN ; Cookstown, W.—The district is very healthy.

COOKSTOWN ; Pomeroy.—The district is in a sanitary state and healthy condition.

COOKSTOWN ; Stewartstown.—District at present very healthy.

DUNGANNON ; Caledon and Ballymagran.—Whooping-cough has been prevalent during the quarter; two deaths registered from this disease as a primary cause. General health of the people good. Sanitary arrangements fairly good.

DUNGANNON ; Clonavaddy.—District healthy.

DUNGANNON ; Coalisland.—Health of district satisfactory; no epidemic of any kind.

IRVINSTOWN ; Trillick.—Of the persons whose deaths were registered during the quarter one reached the age of 90 years, two died at the age of 85 years, one at 84, one at 81, one at 80, one at 78, two at 76, one at

75, three at 74, one at 73, and one at 69 years. The strong and healthy are leaving the district, and the deaths registered are of old people principally. The houses of the poor are not what they should be, and there were a few deaths from phthisis. There is no suitable place in the county for the treatment of such cases.

OMAGH ; Drumquin.—The sanitary arrangements in the district are satisfactory, No epidemic or other diseases are prevalent.

OMAGH ; Fintona.—The health of the district has been good during the quarter; the sanitary arrangements are satisfactory.

OMAGH ; Omagh, No 1, W.—Sanitary condition of rural district satisfactory. Sanitary condition of urban district in some parts unsatisfactory. In two localities there were seventeen cases of typhoid fever notified; the outbreak was due to water contaminated with sewer gas, owing to defective drainage; no fatal cases. The cause has been temporarily remedied. There were seven cases of scarlatina during the quarter, one of a malignant type which proved fatal.

OMAGH ; Omagh, No. 2.—District in good sanitary condition; no epidemic of any kind.

OMAGH ; Sixmilecross.—The district is in a very good sanitary condition at present; two cases of scarlatina occurred during the quarter.

STRABANE ; Newtownstewart.—One death of a man registered aged 100 years or over. Typhoid fever not so prevalent during this quarter as previously, owing to smaller rainfall. There will probably be an increase in the number of cases in the autumn and winter.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE ; Ballinasloe, W.—Whooping-cough prevalent in the district.

BALLINASLOE ; Kiltormer.—The general health of the district is good.

CLIFDEN ; Roundstone, No. 1. The district is quite free from epidemic disease.

GALWAY ; Galway, No. 3 (Arran).—District healthy except that there are a good many persons who have chest complaints accompanied with sore throats in some cases.

GALWAY ; Oranmore.—This district is free from any disease at present, and has been most remarkably so for a very considerable period.

GALWAY; Turloughmore.—A very severe epidemic of pertussis. One case of measles (recovered). One case of cancer of spleen.

GLENNAMADDY; Glennamaddy, W.—No deaths from small-pox have been registered in the district during the quarter. One certified death from cancer of the rectum was registered. An epidemic of measles and whooping-cough occurred in a portion of the district, necessitating the closing of the schools. The sanitary condition of the district is not very good.

GLENNAMADDY; Williamstown.—There have been three cases of enteric fever during quarter. The district has been otherwise in a sanitary condition.

GORT; Gort, W.—With the exception of about a dozen cases of influenza, the health of the district was good during the quarter.

GORT; Kinvarra.—The district is in a good sanitary condition.

LOUGHREA; Bullawn.—Of the deaths registered, three were between 80 and 90 years, and one had attained the age of 98 years.

OUGHTERARD; Cloonbur, No. 1.—Influenza was prevalent during the quarter.

OUGHTERARD; Oughterard, W.—No deaths from cancer.

Leitrim County.

BALLYSHANNON; Kinelough.—Number of deaths above the average. Eight persons aged 80 years and upwards.

BAWNBOY; Ballinamore.—Sanitary state of district good. No epidemics. The death of a centenarian is recorded at the age of 103 years, and the deaths of two other persons were registered who lived to be 90 years respectively.

MANORHAMILTON; Lurganboy.—Of the sixteen deaths registered, thirteen were over 60 years of age. Three cases of enteric fever were dealt with during the quarter, and measles is at present prevalent.

MOHILL; Carrigallen.—The sanitary state of the district is fairly good. There were a few cases of scarlatina in April. At present there is no zymotic disease.

MOHILL; Rinn.—The district is healthy, and free from epidemic disease.

MOHILL; Rowan.—The sanitary arrangements in the district are satisfactory. There was one case of enteric fever which proved fatal, the death having occurred in a public hospital outside the district. There was also a case of supposed diphtheria, which proved fatal, and one case of croup. Bronchitis, both in children and old people, was prevalent. The only thing which, in my opinion, deserves attention regarding the public health, is the filthy state of some premises adjoining dwellinghouses.

Mayo County.

BALLINA; Ballina, W.—Several cases of diphtheria, confined to one locality, during last ten days.

BALLINROBE; Ballinrobe, W.—Sanitary condition of district fair.

BALLINROBE; Cappaghduff.—Sanitary arrangements good.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Measles epidemic throughout the district, so vaccinations are under the average.

BELMULLET; Bangor.—During past quarter health of district satisfactory. There has been one case of diphtheria, but disease rapidly subsided under the influence of the antitoxine, and did not extend. The births and deaths registered during quarter below normal. Owing to the recent epidemic of small-pox at Achill, re-vaccinations much increased.

BELMULLET; Binghamstown, W.—Of the deaths registered two were of persons 86 years of age, one 82, and one 70 years. State of district healthy.

BELMULLET; Knocknalower.—One case of suspected typhoid fever occurred here during the last quarter. The patient was removed to the hospital, and recovered.

CASTLEBAR; Castlebar, No. 1, W.—Health of the district exceptionally good. Vaccination Act satisfactorily complied with.

CLAREMORRIS; Ballindine.—There were some cases of whooping-cough during the quarter.

CLAREMORRIS; Ballyhaunis.—Health of district during the quarter has been good. No epidemics. Registered triple births on 13th June,—two of the children are doing well, the third died five days after its birth. Sanitation progressive.

KILLALA; Killala, W.—The health of the district was satisfactory, there being no cases of infectious disease, with the exception of one case of diphtheria.

WESTPORT; Achill.—Sanitary state and general health of district good. No epidemic present. No children presented for vaccination. There were but three deaths from small-pox, two registered during March quarter, and one for quarter ending 30th June. There was no person attacked or had small-pox this quarter, our last case being 5th March, and all were discharged from hospital cured on 18th April last. From beginning to end forty-three patients had small-pox, or a modified form of it.

WESTPORT; Ballycroy.—Diphtheria, which existed at beginning of quarter, has disappeared. District perfectly healthy.

WESTPORT ; *Louisburgh*. — General health of district during quarter very good.

WESTPORT ; *Newport*. — Sanitary condition of district good.

WESTPORT ; *Westport, W.* — Nine deaths from phthisis, one from cancer of jaw, two from typhus fever. Fourteen deaths of persons aged 80 years and upwards, 2 aged 90 and upwards, and 1 aged 100 years.

Roscommon County.

ATHLONE ; *Brideswell*. — The district is fairly healthy.

BOYLE ; *Ballyfarnan, No. 1.* — Measles is very prevalent in this district. Vaccinations had to be stopped in consequence of the above epidemic. District otherwise healthy.

BOYLE ; *Boyle No. 1, W.* — The district was fairly healthy.

BOYLE ; *Keedaw*. — Measles very prevalent in this district during the quarter. Two deaths registered at 94 and 91 years. Two deaths due to cancer and two to phthisis. Sanitary condition fair.

CARRICK-ON-SHANNON ; *Aughrim*. — The sanitary condition of the district is satisfactory. The number of deaths registered during the quarter is, unfortunately, considerably in excess of the number of births. The severe weather in the early part of the year induced a severe form of bronchitis, which carried off a large number of the old and weakly.

STROKESTOWN ; *Roosky*. — The health and sanitation of district are fairly satisfactory. Of the deaths registered one was of a person aged 96 years, one 95, one 94, two 84, one 83, one 82, one 79, one 78, one 76, one 75, and one 73.

STROKESTOWN ; *Strokestown, W.* — The sanitary condition of the district is good.

Sligo County.

BOYLE ; *Ballyfarnan No. 2.* — Measles is very prevalent in this district. Vaccinations had to be postponed in consequence thereof. District otherwise healthy.

BOYLE ; *Gurteen*. — Whooping-cough was prevalent during the quarter. This disease prevented a great number of children from being presented for vaccination.

SLIGO ; *Ballymote*. — District is perfectly healthy and free from all contagious diseases.

SLIGO ; *Carney, No. 1.* — Sanitary condition of the district good.

SLIGO ; *Carney, No. 2.* — The health of the district is pretty good. No prevalent disease in it.

SLIGO ; *Riverstown*. — District healthy.

TOBERCERRY ; *Coolaney*. — Sanitary arrangements good. Two deaths registered during past quarter at 84 and 86 years, respectively.

TOBERCERRY ; *Tobercurry, W.* — There were three cases of diphtheria; one, in an advanced stage when admitted, died in the Union Hospital.

Marriages:—APR., MAY, JUNE, 1904. **Births & Deaths:**—JULY, AUG., SEPT., 1904

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 25,598 births—a number equal to an annual birth-rate of 23·3 in every 1,000 of the estimated population*—and 16,296 deaths, representing an annual rate of 14·8 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 11,784 persons emigrated.

In England last quarter, the birth-rate represented was 28·1 in every 1,000 of the estimated population, and the death-rate 15·8 per 1,000.

The birth-rate in Ireland for the quarter is 0·6 over the average rate for the corresponding quarter of the ten years 1894–1903, and 0·6 over the rate for the third quarter of 1903. The deaths are 461 over those registered in the corresponding quarter of 1903; the death rate is 0·4 above the rate for that quarter, and equal to the average for the third quarter of the ten years 1894–1903.

* See page 266.

Compared with those for the corresponding quarter of 1903, the returns of pauperism, furnished by the Local Government Board, show a decrease of 75 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 498 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1894-1903, the number of Workhouse inmates shows an increase of 573, but the number of persons on out-door relief shows a decrease of 875, the total under both heads being 0·3 per cent. below the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·3 per cent.

The annual marriage-rate (4·8 per 1,000 of the population) represented by the marriages registered during the second quarter of 1904 is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 30th June, 1904, and by the Births and Deaths registered in the Quarter ended 30th September, 1904.

* The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 205.

MARRIAGES.

The marriages (5,337) registered in Ireland during the second quarter of 1904 are equivalent to an annual rate of 4·8 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1903, and 0·2 above the average rate for the second quarter of the ten years 1894–1903. Of the total number of marriages 3,736 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,601 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·6 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·5, but that under the latter a decrease of 0·5. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during the first and second quarters of 1904.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 25,598—12,923 boys and 12,675 girls—being equal to an annual ratio of 1 in every 43·0, or 23·3 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1894–1903 was 25,598, equivalent to an annual rate of 22·7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·7 per 1,000 of the population according to the Census of 1901; Munster, 21·9; Ulster, 24·2; and Connaught, 20·4.

The highest county birth-rate* is 32·9 for Dublin Co. Borough, and the lowest 17·1 for King's Co. Of the intermediate rates the highest five are—Belfast Co. Borough, 31·1; Londonderry Co. and Co. Borough, 25·0; Limerick Co. and Co. Borough, 24·5; Antrim, 23·8; and Down, 23·7; and the lowest five are Monaghan, 17·1; Sligo, 17·6; Cavan, 18·1; Clare, 18·5; and Longford, 18·9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 16,296—8,157 males and 8,139 females—affording an annual ratio of 1 in every 67·5, or 14·8 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1894–1903 was also 14·8 per 1,000.

The death-rate in Leinster was 16·7 per 1,000 of the population according to the Census of 1901; in Munster, 13·0; in Ulster, 15·2; and in Connaught, 12·1.

The county death-rates* range from 10·5 in Leitrim to 23·4 in Dublin County Borough. Between these rates the lowest five are Clare, 10·8; Mayo, 10·9; Cavan, 11·1; Kilkenny, 11·5; and Louth, 11·6; and the highest five are—Belfast, 17·8; Wexford, 17·5; Armagh, 16·4; Monaghan, 15·9; and Carlow, 15·6.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during the first, second, and third quarters of the year 1904:—

1904.	24·3	24·5	23·3	.	.	22·2	18·9	14·8	.	.

See note () on page 188.

Ages.—Of the 16,296 deaths registered last quarter, 2,420, or 14·9 per cent., were of children under 1 year old; and 6,310, or 38·7 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 94·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 17·8 per cent. of the total deaths registered therein; in Munster, 13·0 per cent.; in Ulster, 15·2 per cent.; and in Connaught, 9·8 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 34·1 per cent.; in Munster, to 40·8 per cent.; in Ulster, to 39·2 per cent.; and in Connaught, to 44·9 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 1,173, or greater by 265 than the number occurring in the corresponding quarter of 1903, and is equivalent to an annual rate of 1·1 per 1,000 living, being 0·3 over the rate for the third quarter of last year, but 0·2 under the average rate for the third quarter of the ten years 1894–1903.

Small-pox.—Four deaths from small-pox, equal to an annual rate of 0·004 per 1,000 of the estimated population were registered during the quarter; these, with 4 deaths in the March quarter, and 2 deaths in the June quarter, make a total of 10 deaths registered in Ireland from small-pox up to the 30th September of the present year. Two of the deaths occurred in the Registrar's District of Armagh, in the Union of Armagh; one in the Registrar's District of Irvinestown, in the Union of Irvinestown; and one in the Registrar's District of Ballylesson, in the Union of Lisburn. With respect to the condition of the deceased persons, as regards vaccination, the two deaths which occurred in Armagh are reported as of persons who were "never vaccinated." The Registrar of Irvinestown reports that "no marks of previous vaccination" existed, and the Registrar of Ballylesson states that "one indistinct vaccination mark" was observed on the person whose death was registered in the District. The Registrars in their notes report that small-pox occurred in the following Districts during the September quarter of the year:—Armagh, Ballinamore, Ballycarry, Barronstown, Belfast Urban No. XII., Ederney, Galway No. 3, Irvinestown, Keady, Killeshandra, Monaghan, Mountcharles, Omagh No. 1., Ravensdale, Drogheda, No. 3, and Trim.

Measles.—The deaths from measles (87) are less than one-half of the average number for the corresponding quarterly period of the five preceding years; in the December quarter of 1903, and the March and June quarters of 1904, the deaths from measles were 60, 61, and 85 respectively. The 87 deaths for the September quarter are equal to an annual rate of 0·08 per 1,000 of the estimated population of Ireland. Of the total deaths 39 were registered in the County Borough of Dublin, 21 in the County Borough of Belfast, and 6 in Cork County and County Borough.

Scarlet Fever.—Although slightly above the average for the September quarter of the past five years, the deaths (41) from scarlet fever are 4 below the number registered in the June quarter of the present year, and are equal to an annual rate of 0·04 per 1,000 of the population.

* See note (f) on page 194.

In the December quarter of 1903, and the March and June quarters of 1904, the deaths registered were respectively 56, 52, and 45. Five deaths were registered in Belfast County Borough, 4 in Mayo County, and 3 each in Westmeath, Cork County and County Borough, Donegal, Down, and Tyrone, and 2 each in Dublin County and in Dublin County Borough.

Typhus.—The deaths from typhus (18), although below the average for the September quarter of the five years, 1899-1903, exceed those registered in the June quarter by one death, and are equal to an annual rate of 0·02 per 1,000 of the population. The deaths registered in December quarter, 1903, and March and June quarters, 1904, were respectively 24, 13, and 17. Two deaths occurred in the Province of Leinster, 3 in Munster, 8 in Ulster, and 5 in Connaught.

Whooping-cough.—The fatalities which occurred from whooping-cough during the quarter amount to 21 per cent. of the total of the *principal epidemic diseases*, and number 249, a figure which is considerably in excess of the average number of deaths which occurred from whooping-cough in the September quarter of the five years preceding. The deaths registered are equal to an annual rate of 0·23 per 1,000 of the population of Ireland estimated to the 30th June of the present year, the deaths registered in the three quarters preceding being 252, 466, and 431 respectively. The only Counties in which no death from whooping-cough was registered were Carlow, Kilkenny, and Fermanagh. In the County Borough of Dublin 34 deaths were registered, in Belfast County Borough 25 deaths, in Galway 20, in Kerry and Down each 18, in Cork County and County Borough and Armagh each 15, and in Limerick County and County Borough and Tyrone each 10.

Diphtheria.—The deaths from diphtheria registered during the quarter (56), are equal to an annual rate of 0·05 per 1,000 of the population of the country, and are 9 in excess of the mortality from this disease in the quarter preceding. The deaths registered in the December quarter of 1903, and the March and June quarters of the present year were 77, 79, and 47 respectively, and the average number of deaths from diphtheria for the corresponding September quarter of the past five years was 64. Twenty-two deaths were registered in the Province of Leinster, including 8 in Dublin County Borough; 18 were registered in the Province of Ulster, including 4 in Belfast County Borough, and 4 in the County of Down; 9 deaths were registered in the Province of Munster, of which 6 appertained to Cork County and County Borough; and 7 deaths were registered in Connaught, 5 of these appertaining to the County Mayo.

Enteric Fever.—Deaths from enteric fever, which numbered 116 in the December quarter of 1903, fell to 110 in the March quarter of 1904, and fell further to 96 in the June quarter, in the period under notice numbered 104, being considerably under the average (187) for the corresponding September quarter of the preceding five years, and equal to an annual rate of 0·09 per 1,000 of the estimated population of the country.

Of the deaths, 31 appertained to Belfast County Borough (including 11 in Belfast Urban No. 4 District); 12 to Dublin County Borough; 8 to Cork County and County Borough, and 7 to County Tyrone. There were 4 deaths each in Ballymena and Dungannon Registrars' Districts, and 3 each in Waterford Urban No. 2 and Killygordon.

Seven deaths were returned by the Registrars for the quarter ending 30th September as being due to simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—The September quarter of the year furnishes an accession to the mortality of the country from diarrhoeal diseases, the deaths recorded being 607, equal to an annual rate of 0·55 per 1,000. In the corresponding period of the preceding 5 years, the deaths from diarrhoeal diseases were respectively 1,112 in 1899, 577 in 1900, 795 in 1901, 358 in 1902, and 420 in 1903. There were 205 deaths from diarrhoeal diseases during the quarter registered in Dublin County Borough, 163 in Belfast County Borough, 50 in the County of Dublin, 22 in Cork County and County Borough, Waterford County and County Borough, and Londonderry County and County Borough respectively; 15 in Limerick County and County Borough, 15 in the County Antrim, and 10 deaths each in the Counties of Down and of Galway.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in 16 districts, measles in 20 districts, scarlet fever in 19, whooping-cough in 33, diphtheria in 10, fever in 24 (typhus, 2, enteric, 21, and simple or ill-defined fever, 1), diarrhoeal diseases in 5, influenza in 1, and chicken-pox in 1.

Inquests.—There were 468 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 35 of the total deaths registered.

In Leinster there was 1 inquest to every 35 deaths registered, in Munster 1 to 35, in Ulster 1 to 30, and in Connaught 1 to 61.

Deaths in Public Institutions.—Of the 16,296 deaths registered, 3,051, or 18·7 per cent., occurred in public institutions. In Leinster the percentage was 24·9, in Munster 23·0, in Ulster 13·7, and in Connaught 11·4.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1904, and in each of the eight quarters immediately preceding with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple Continued Fever.	Enteric Fever.	Diarrheal Diseases.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V. The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 17·8, and the birth-rate 28·8 per 1,000 of the population according to the Census of 1901; in the remainder of the country the death-rate was 1 and the birth-rate 20·5 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 2·3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1904, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathfarnham, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ended Saturday, 1st October, 1904.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1904, there were 25,383 persons successfully vaccinated; in 2,404 cases the operation was postponed, 37 children were reported as insusceptible of vaccination, and the deaths of 1,415 unvaccinated children under 3 months old were registered, making a total of 29,239 children with regard to whom particulars as to vaccination were ascertained.

† See note (i), page 194.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 11,784 (4,996 males and 6,788 females), being 590 more than in the corresponding quarter of the year 1903, and 1,075 above the average number for the third quarter of the ten years 1894-1903.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1903 and 1904:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.

* Including 10,157 emigrants to the United States of America, viz.:—1,677 in the month of July, 2,864 in August, and 5,616 in September. The passages of 3,218 of the steerage passengers were paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{3}{4}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1903 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1894 it was $4\frac{3}{4}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being $6d.$ under the average for the corresponding quarter of the year 1903. In the third quarter of 1894 the average price was $14s. 6d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 8d.$ to $3s. 5d.$ In the third quarter of 1903 the average prices were $3s. 6d.$ to $4s. 2d.$, and the prices for the corresponding quarter of 1894 were $3s. 7d.$ to $4s. 10d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $51s. 6d.$ to $59s.$ per cwt. In the corresponding quarter of 1903 the average prices were from $53s. 6d.$ to $58s.$, and in the third quarter of 1894 they were from $45s.$ to $57s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $18s.$ to $19s.$ per ton nett.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 90\frac{7}{16}$, and the lowest $\pounds 87\frac{1}{2}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 4 per cent., to which it was lowered from $4\frac{1}{2}$ per cent. on the 14th April.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average weekly number of persons receiving out-door relief during the quarter was 55,682, being 498 under the average for the third quarter of 1903.

Of the persons receiving in-door relief during the third quarter of 1904, an average number of 1,420 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1903 the average weekly number was 1,394.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1904, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third quarter of the years 1899–1904, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 200):—

The mean height of the barometer during the third quarter of 1904 was 29·988 inches, being 0·016 over the average for the corres-

* Latitude 53° 21' 44·65" north; longitude 6° 21' 6·35" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1899-1903; the highest reading (30.321 inches) was on the 23rd September, at 9 P.M., wind N.E.; and the lowest (29.458 inches) on the 14th August, at 9 P.M., wind S.W.

The mean temperature of the air during the quarter was 56.7° , or 0.2° under the average for the third quarter of the five years 1899-1903.

The maximum temperature of the air during the quarter was 74.8° and the minimum 34.6° . The maximum heat in sun was 131.4° , and the minimum on the grass 28.2° .

Rain fell on 51 days during the quarter. The rain-fall measured 5.773 inches, being 3.820 inches under the average for the third quarter of the five years 1899-1903. The greatest monthly rain-fall was in August, when 2.795 inches were registered.

The wind blew on 26 days from S.W., on 20 days from W., on 11 days from E., on 7 days each from S.E. and S., on 5 days from N.E., on 2 days from N.W., on 1 day from N., and the air was calm on 13 days at 9 A.M.

July.—The mean height of the barometer during this month was 29.977 inches; the highest reading (30.294 inches) was on the 9th at 9 A.M., wind W.S.W.; and the lowest (29.640 inches) on the 1st, at 9 A.M., wind S.W. The mean temperature of the air was 58.6° , the maximum registered was 72.0° , and the minimum 42.4° . The 20th was the warmest day, and the 7th the coldest night. The mean of the dry bulb was 60.2° , and of the wet bulb 56.3° . The maximum heat in sun was 128.5° , and the minimum on the grass 36.4° . The total amount of sunshine recorded was 207.0 hours, the greatest daily amount being 15.2 hours on the 7th. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.3. Rain fell on 16 days. The rain-fall measured 1.440 inches; the greatest amount in 24 hours was .365 inch on the 25th.

August.—The mean height of the barometer during this month was 29.975 inches; the highest reading (30.260 inches) was on the 8th at 9 A.M., wind S.W., and the lowest (29.458 inches) on the 14th, at 9 P.M., wind S.W. The mean temperature of the air was 57.5° , the maximum registered was 74.8° , and the minimum 39.3° . The 3rd was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 58.9° , and of the wet bulb 54.9° . The maximum heat in sun was 131.4° , and the minimum on the grass 33.0° . The total amount of sunshine recorded was 189.0 hours, the greatest daily amount being 11.0 hours on the 7th. The maximum ozone was 0.9, the minimum 0.1, and the mean 0.4. Rain fell on 19 days. The rain-fall measured 2.795 inches; the greatest amount in 24 hours was .700 inch on the 30th.

September.—The mean height of the barometer during this month was 30.012 inches; the highest reading (30.321 inches) was on the 23rd, at 9 P.M., wind N.E.; and the lowest (29.584 inches) on the 5th, at 9 P.M., wind S.W. The mean temperature of the air was 54.0° ; the maximum registered was 69.2° , and the minimum 34.6° . The 16th was the warmest day, and the 29th the coldest night. The mean of the dry bulb was 56.3° , and of the wet bulb 52.8° . The maximum heat in sun was 121.8° , and the minimum on the grass 28.2° . The total amount of sunshine recorded was 166.0 hours, the greatest daily amount being 12.0 hours on the 3rd. The maximum ozone was 0.9, the minimum 0.0, and the mean 0.4. Rain fell on 16 days. The rain-fall measured 1.538 inches; the greatest amount in 24 hours was .520 inch on the 12th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared under the direction of the Meteorological Council.

In compiling the following Table (pp. 202, 203), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	The Meteorological Council.
Donaghadee,	The Meteorological Council.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	The Meteorological Council.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	W. J. Roe, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	The Meteorological Council.
Roche's Point,	The Meteorological Council.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee. Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m., and where also Greenwich time at Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them.

† The Averages used are based on observations as follows:—Rainfall 35 years, 1866-1900; Temperature 30 years of Moderate and Strong winds (force 4-7), the number of observations of Calms, and the number of days of Gales.

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park and the

^a Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted.

^b Including accidental deaths, homicides, and suicides.

^c The Returns for Tory Island District, in Donegal Union, and Killaen District, in Ballinasloe Union, not having been received in time for Press, the numbers of Births and Deaths registered in the corresponding Quarter of 1903 have been adopted.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area. in Statute Acres.	Popu- lation in 1901.	Mar- riages.		Deaths		The Deaths registered during the Quarter as stated by the Registrars to include												Vaccination Return for the Quarter ending 30th Sept., 1904.						
			Registered in the Quarter ending 30th June 1904.	Registered in the Quarter ending 30th Sept., 1904.	Averages in the Quarter ending 30th Sept., in the 4 years, 1900-1903.	Registered in the Quarter ending 30th Sept., 1904.	Deaths of												Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons inaccessible of Vac- cination.	Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the Quarter.	Total of the foregoing.		
							Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Measles.	Scarlet Fever.	Typhus Fever.	Whooping-cough.	Diphtheria.	Simple continued Fever.	Fatalic Fever.	Dysentery.	Violence.						Inquests.	Deaths in Public Insti- tutions.

[illegible]

(a) See note(*), page 205.

* The Registrars' Districts (897 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary District of the same names formed under the Medical Charities Act.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 217 and 218 are extracted from the Weekly Returns made by the Registrars, and relate to the weeks extending from 3rd July, 1934 to 1st October, 1934. With the exception of 83 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

+ Exclusive of 7 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.
I. PROVINCE OF LEINSTER—continued.

No.	Registrars' Districts.	Area, in Statute Acres.	Popu- lation in 1901.	Births. Registered in the Quar- ter ending 30th Sept., 1904.	Deaths. Registered in the Quar- ter ending 30th Sept., 1904.	The Deaths registered during the Quarter are stated by the Registrars to include										Vaccination Return for the Quarter ending 30th Sept., 1904.						
						Average in the Quarter ending 30th Sept. in the 4 years, 1900-1903.	Deaths of		Deaths from								Deaths in Public Insti- tutions.	Number of successful Primary Vaccinations. NOTE.—This table has been constructed for the years 1830 and 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1904—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901, respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Carlow, No. 1, W.*—A large percentage of children were re-vaccinated. The success of calf lymph was remarkable; nearly everyone re-vaccinated, of about 800, was successful. I have never met a case of insusceptibility to calf lymph.

CARLOW; *Leighlinbridge.* — District healthy.

Dublin County.

DUBLIN, SOUTH; *Clondalkin.*—Public health of district good.

DUBLIN, SOUTH; *Tallaght.*—The district free from all contagious diseases for the quarter. Sanitary work improving, owing to new labourers' cottages.

Kildare County.

CELBRIDGE; *Celbridge, W.* — District healthy.

CELBRIDGE; *Kilcock.*—There are a number of poor families very much in need of better dwellinghouses, as the houses at present occupied by these people are of the worst possible type.

CELBRIDGE; *Maynooth.* — District healthy.

EDENDERRY; *Rathangan No. 1.*—Measles has been epidemic during summer, a disease of a mild type. Mothers and children have been ailing at the same time. Many youths of 16 and 17 years have been attacked by the disease. Happily no deaths have occurred from this cause, owing to the very mild weather. Vaccination postponed. A death from tuberculosis of lung occurred during quarter, a girl aged 18 years. She had been nursing her sister who died from same disease a twelvemonth ago. A death registered during quarter, a woman aged 99 years.

NAAS; *Kildare.*—Measles very prevalent in this district during the quarter. Sanitary condition good.

NAAS; *Naas and Carragh, W.* — The health of the rural part of this district is very good.

Kilkenny County.

CALLAN; *Callan, W.* — One death registered as caused by cancer in which no hereditary trace is known. The number of deaths in the district during the quarter is lowest on record.

CASTLECOMER; *Ballyragget.* — Sanitary arrangements very good. All the principal epidemic diseases absent, except whooping-cough (four cases in the town).

CASTLECOMER; *Castlecomer, W.* — Deaths below the average this quarter.

KILKENNY; *Freshford.*—The sanitary condition of the district is fairly good.

KILKENNY; *Tullaroan.* — Health of district good.

URLINGFORD; *Balleen.*—The sanitary condition of the district is fairly good.

URLINGFORD; *Urlingford, W.*—Health of district good. Three deaths from diphtheria (not yet registered) occurred, but epidemic attacked only one family.

WATERFORD; *Kilmakewege.* — No deaths from cancer. District very healthy. Deaths registered over 60 years:—Males, 67, 68, 72, 78, and 90 years; females, 90 and 93 years.

WATERFORD; *Ullid.*—A form of epidemic jaundice, mostly of a mild type, ran through the schools of the district during the quarter.

King's County.

BIRR; Banagher.—District very healthy.

BIRR; Ferbane.—Sanitary condition of district fair.

BIRR; Frankford.—Deaths of people registered at the respective ages of 90, 85, 72, and 70 years.

BIRR; Kinnitty.—One case of axillary cancer in man aged 56 years. No history obtainable.

EDENDERRY; Rathangan, No. 2.—An epidemic of measles during quarter; no deaths occurred therefrom. Vaccination postponed in consequence thereof.

EDENDERRY; Rhode.—Health of district good.

MOUNTMELICK; Clonygowan, No. 2.—District very healthy.

ROSCREA; Roscrea, No. 2.—There has been measles in two families in the early part of the quarter, and one case of typhoid fever has been reported. Otherwise the district is healthy.

ROSCREA; Shinrone.—Sanitary condition of district good.

TULLAMORE; Killoughy.—Sanitation of district fairly good. District is free from disease.

Longford County.

BALLYMAHON; Abbeyshrule.—Whooping-cough prevalent. Sanitary arrangements good.

BALLYMAHON; Ballymahon, W.—The sanitary arrangements in the district are satisfactory.

GRANARD; Ballinalee.—The sanitary arrangements in the district are fairly good. There was no case of infectious disease.

GRANARD; Granard, W.—Sanitary arrangements good. No infectious disease.

GRANARD; Scrabby, No. 2.—The sanitary state of district good. No epidemic.

GRANARD; Street, No. 2.—Whooping-cough was prevalent in this district during this quarter; in one case, that of a male infant, proving fatal.

LONGFORD; Drumlish.—Vaccination has gone ahead during last month of quarter. A slight epidemic of whooping-cough prevailed during quarter, and some cases of diphtheria. Health of this district good. Sanitary state of district fairly good.

Louth County.

ARDEE; Castlebellingham.—District very healthy, and in a fairly good sanitary state.

ARDEE; Dunleer.—District healthy.

DROGHEDA; Drogheda, No. 3, W.—Small-pox was brought here from Armagh by police constables, who were drafted there for special duty in July. Active precautionary measures were taken by the sanitary authority in all cases, which completely stamped out the disease.

DROGHEDA; Termonfeckin.—The district has been exceptionally healthy during the quarter. No epidemic of any kind.

DUNDALK; Barronstown.—Case of small-pox occurred at beginning of the quarter. The patient and all contacts were at once removed to hospital. Clothes, etc., were burned. House disinfected. There has been no recurrence of the disease. This man is a fowl dealer, and it is supposed he brought the disease from Armagh, where it was prevalent. The district is in a very healthy state at present, and free from zymotic disease.

DUNDALK; Ravensdale.—Health of district very good. One case of modified variola and nine contacts sent to hospital. Patient, *et.* 54, had vaccination mark from infancy half-inch square.

Meath County.

DROGHEDA; St. Mary's.—The sanitary state is good, and the district free from any disease.

DROGHEDA; Stamullen.—The district very healthy during the quarter.

DUNSHAUGHLIN; Ratoath, W.—Sanitary arrangements of the district good.

EDENDERRY; Ballybogan.—Of the three deaths one was 82 years, another 72, and the other 71. Health of the district remarkably good.

KELLS; Kells, W.—The district is unusually healthy.

KELLS; Kilskeer.—District very healthy.

KELLS; Nobber.—The sanitary condition is, to my knowledge, very satisfactory, no epidemic or infectious diseases having made an appearance in the district. Water generally is rather good, and the union pumps are fairly well attended to in cases where they are out of order.

NAVAN; Painsstown.—One death from tubercular disease, and two from malignant disease during quarter.

OLDCASTLE; Crossakeel.—The sanitary condition of the district is on the whole satisfactory.

OLDCASTLE; Oldcastle, W.—Although some cases of measles occurred in outlying portions of the district, it is on the whole in a satisfactory condition.

TRIM; Summerhill.—District has been in very healthy condition.

TRIM; *Trim, W.*—A policeman who was on duty in Armagh on 27th July developed small-pox on the 12th August. He had been re-vaccinated on the 1st of August, and the operation was most successful, so that he suffered from a modified form of the disease. His wife and one child, who had been also previously re-vaccinated, had a mild form of the disease. All are now convalescent.

Queen's County.

ABREYLEIX; *Ballinakill*.—Health of district good.

MOUNTMELICK; *Clonygowan, No. 1.*—District very healthy.

ROSCREA; *Borris-in-Ossory.*—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; *Glassan.*—I registered the deaths of nine people aged, respectively, 94, 91, 85, 83, 80 (2), 78, 72, and 64 years.

MULLINGAR; *Ballynacarrigy.*—Sanitary state of district is good.

MULLINGAR; *Castletown Geoghegan.*—The district is in a sanitary condition. No case of infectious disease occurred during the quarter to my knowledge.

MULLINGAR; *Milltown.*—The children were all vaccinated early this quarter on account of the small-pox scare. No deaths from cancer.

MULLINGAR; *Mullingar, W.*—The health of district has been fairly good during the past quarter. No deaths from cancer.

Wexford County.

ENNISCORTHY; *Newtownbarry.*—Whooping-cough was very prevalent during quarter, but no deaths occurred.

GOREY; *Camolin.*—Health of district satisfactory. Eleven out of seventeen deaths registered were over 60 years.

NEW ROSS; *Fethard, No. 1.*—A mild type of scarlet fever was epidemic during the quarter in part of the district; no death occurred from the disease.

NEW ROSS; *Old Ross.*—Whooping-cough was prevalent. Three cases of enteric fever appeared—the patients came into the district from an adjoining one, where enteric was prevalent.

WEXFORD; *Bridgetown.*—Scarlatina has been prevalent in the district during the quarter.

WEXFORD; *Broadway.*—Whooping-cough very prevalent.

WEXFORD; *Taghmon and Glynn.*—No deaths from scarlet fever or measles, and no fresh cases of either. Whooping-cough on the decline, and no fresh case.

Wicklow County.

BALTINGLASS; *Kiltegan.*—Of one family the mother and two children have died of diphtheria (children died in workhouse hospital), attributed, I think, to damp, low-lying position of their dwellinghouse. Vaccination is proceeding satisfactorily.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDRUM; *Annamoe.*—District healthy during the quarter.

RATHDRUM; *Arklow.*—There is at present a severe epidemic of whooping-cough in the town and district of Arklow.

RATHDRUM; *Aughrim.*—A mild form of whooping-cough exists throughout the district.

RATHDRUM; *Wicklow.*—Measles very prevalent for past fortnight.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—District preeminently healthy.

CORROFIN; *Corrofin W.*—Health of district good.

ENNIS; *Crusheen.*—Four cases of typhoid fever occurred in the months of August and September; all were removed to fever hospital in the early stage, and have now nearly recovered.

ENNIS; *Newmarket.*—In the early part of the quarter a mild type of whooping-cough prevailed, otherwise the district has been very healthy.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Vaccination not attended to. Only a few children in last defaulters' list are as yet vaccinated.

ENNISTIMON; *Roadford.*—District healthy.

KILLADYSERT; *Ballymacally, W.*—Two deaths from cancer—one of the lower maxilla, and one of the rectum. There was also a case of stricture of the rectum which I did not consider malignant. There was a death from diphtheria which is not yet registered.

KILLADYSERT; *Labasheeda.*—District healthy.

KILRUSH; *Carrigaholt.*—The health of district very good.

KILRUSH; *Craggaknock.*—The district was in a very healthy state during past quarter.

KILRUSH; *Kilrush, W.*—The health of the district has been good.

LIMERICK; *Bridgetown.*—The sanitary condition of the district is good.

LIMERICK; *Coolacasey*.—The district is very healthy, and its sanitary condition most satisfactory.

SCARRIFF; *Annacarriga*.—District free from disease.

SCARRIFF; *Feakle*.—Whooping-cough in portion of district. Sanitary arrangements fairly good.

SCARRIFF; *Mountshannon, W.*—District healthy. Vaccination slow.

TULLA; *Quin*.—The sanitary arrangements in the district are very fair. None of the principal epidemic diseases are prevalent.

Cork County.

BANDON; *Inishannon*.—So far, I am not aware of any further cases of scarlet fever having occurred since the last cases reported. Health of district good.

BANDON; *Kilbrittain*.—A few cases of scarlatina of a very mild form.

BANTRY; *Bantry, W.*—Health of district very good. Some cases of whooping-cough and measles; both of a mild character.

BANTRY; *Durrus and Kilcrohane*.—District fairly healthy for past quarter. No cases of infectious diseases. Some cases of pneumonia.

BANTRY; *Kealkill*.—The sanitary condition of district is fairly good. No cases of infectious disease during quarter.

CASTLETOWN; *Castletown, W.*—District healthy.

CASTLETOWN; *Kilcatherine*.—District at present healthy.

CLONAKILTY; *Rosscarbery*.—District perfectly healthy.

CORK; *Carrigaline, No. 1*.—There has been very little illness. Vaccination has been under the mark, but is improving.

CORK; *Carrignavar*.—District healthy.

CORK; *Cork Urban, No. 4*.—Diarrhoea prevalent.

DUNMANWAY; *Dunmanway, W.*—District healthy. No epidemic prevalent. Two deaths from tuberculosis. One from cancer. The death of a man stated to be 97 years registered.

FERMOY; *Kilworth*.—One village requires draining.

KINSALE; *Ballygeard*.—Health of district good. One death occurred from mucocenteritis in an infant two months old.

MALLOW; *Ballyclogh*.—Measles becoming prevalent, district otherwise healthy.

MALLOW; *Buttevant*.—Measles prevalent during last month of quarter, otherwise district healthy.

MALLOW; *Kilshannig*.—District healthy.

MALLOW; *Rahan*.—One case of scarlatina occurred during the past quarter. The district has been healthy.

MIDDLETON; *Aghada*.—An outbreak of scarlatina occurred in a village. Nine cases were noted, which were, with one exception, of a mild type. The disease appears to have died out.

MIDDLETON; *Middleton No. 2*.—General health good.

SKIBBEREEN; *Skibbereen, W.*—District free from disease of an infectious character.

SKULL; *Skull, W.*—Births above and deaths below the average. District healthy during the past quarter.

Kerry County.

CAHERSIVEEN; *Caher, W.*—The district is in good sanitary condition.

CAHERSIVEEN; *Darrynane*.—The sanitary condition of the district is fairly satisfactory, and there has been no case of zymotic disease during the quarter just ended.

CAHERSIVEEN; *Valencia*.—District very healthy during the quarter.

DINGLE; *Anascaul*.—An epidemic of whooping-cough prevented vaccination in a few cases during the quarter.

DINGLE; *Castlegregory*.—Whooping-cough was very prevalent in district; a great many of the children are still suffering from same. Even two of my own children had it very severely.

DINGLE; *Dingle, W.*—The district has been very healthy for the last three months. There are a few cases of pertussis, but of a mild type.

DINGLE; *Ventry*.—Whooping-cough prevalent in the district, except the electoral divisions of Ventry and Dunquin.

KENMARE; *Kenmare, W.*—Vaccination very backward.

KILLARNEY; *Coom*.—Measles prevalent during the quarter; also four cases of diphtheria occurred. Sanitary condition of district fairly good. No vaccination performed during the quarter.

KILLARNEY; *Killarney, No 1, W.*—No infectious disease during quarter. District very healthy.

KILLARNEY; *Milltown*.—District healthy. Sanitary condition good. No contagious or infectious disease prevalent.

LISTOWEL; *Ballybunion*.—Health of district very good.

LISTOWEL; *Ballyduff*.—Health of district was good during quarter.

LISTOWEL; *Ballyhorgan*.—Sanitary state of district good.

LISTOWEL; Ballylongford.—District healthy for quarter. Small number of primary vaccinations. Sanitary condition of district requires improvement.

TRALEE; Castlemaine.—No outbreak of any kind during the quarter. The health of the district very good.

TRALEE; Tralee No. 2.—Sanitary condition of district satisfactory. Cases of whooping-cough now very few, and of a milder form than that experienced in the early part of the year.

Limerick County.

CROOM; Castletown.—District healthy.

KILMALLOCK; Bruree.—The death-rate was unprecedentedly low, only one death being recorded, and, as far as I am aware, there is but one outstanding to be registered. The district is very healthy.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinnane.—A few cases of enteric fever have occurred in district.

KILMALLOCK; Kilmallock, W.—Bronchitis prevalent amongst children during last month of quarter. District otherwise healthy and free from zymotic disease.

LIMERICK; Annacotty.—Sanitary arrangements fair. District healthy.

LISTOWEL; Glm.—I had one case of enteric fever, and as soon as I recognised it I had the girl removed to the Listowel fever hospital. Having made due inquiry as to milk and water supply and sanitary surroundings, I failed to trace the source of the disease. I am very pleased to add that there was no other case of infectious disease in district during the quarter.

MITCHELSTOWN; Galbally.—Whooping-cough of a mild form prevalent. Otherwise district exceptionally healthy.

NEWCASTLE; Ardagh.—The sanitary state of the district pretty fair. Measles in western part of district during quarter. No death from same.

NEWCASTLE; Feenagh.—The health of the district is very good.

NEWCASTLE; Newcastle, W.—District healthy.

RATHKEALE; Askeaton.—During the last quarter I removed a case to Union hospital which turned out to be typhoid fever.

RATHKEALE; Pallaskeyry.—The sanitary arrangements of the district are fairly good.

RATHKEALE; Rathkeale No. 1, W.—The district was free from any communicable, that is, zymotic disease for the past quarter. Of the 22 deaths registered 12 died in the Union hospital, which included 1 death from typhoid fever. 12 deaths

were of persons 60 years of age and upwards. There were only 4 deaths amongst persons aged 1 year and under 60 years. Tuberculosis caused 3 deaths.

TIPPERARY; Grean.—During the quarter one death at 100 years was registered.

Tipperary County, North Riding.

BORRISOKANE; Cloghjordun.—Whooping-cough continued to be very prevalent during the earlier period of the quarter; however, I believe it has now abated. Otherwise, this district is fairly healthy.

BORRISOKANE; Terryglass.—District healthy. No epidemic.

NENAGH; Nenagh, W.—No epidemic. District healthy. Notification of Infectious Diseases Act to be in force here November 1st, 1904.

NENAGH; Newport.—District healthy. Slight outbreak of diphtheria, which has been kept to one locality.

NENAGH; Portroe.—District healthy.

THURLES; Moyne.—There are no diseases of any kind in my district, and the sanitary arrangements are all right.

Tipperary County, South Riding.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No disease of any kind prevalent. District exceptionally healthy. Vaccination well attended to.

CASHEL; Kilpatrick.—District healthy.

CLOGHEEN; Caher.—No cases of an epidemic nature have occurred during the past quarter. District is healthy.

CLOGHEEN; Clogheen, W.—District healthy with the exception of the occurrence of one case of enteric fever, probably due to unsanitary surroundings.

CLONMEL; Kilsheelan, No. 1.—One death is registered from cancer of the appendix at the age of 50 years. Two aunts of the man were said to have died of cancer. Two cases of influenzal pneumonia. No other zymotic disease.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—Whooping-cough prevalent in the district.

TIPPERARY; Golden.—The district is healthy.

URLINGFORD; Kilcooly.—The district has been healthy during quarter, and sanitary arrangements are good.

Waterford County.

CARRICK-ON-SUIR; Rathgormuck.—The health of the district is satisfactory.

CLONMEL; Kilsheelan, No. 2.—No zymotic disease.

DUNGARVAN; Dungarvan, W.—There were some cases of enteric fever of a mild type, chiefly in the urban portion of the district, during the past quarter.

DUNGARVAN; Whitechurch.—Slight epidemic of whooping-cough. Sanitary condition of district good.

KILMACTHOMAS; Bunmahon.—The district is healthy, and free from zymotic disease. One death registered for the quarter at 100 years.

WATERFORD; Waterford Urban, No. 1., W.—Epidemic enteritis has been prevalent during the quarter amongst infants, and the mortality has been considerable.

WATERFORD; Woodstown.—The health of district is good.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Doagh.—With the exception of a few cases of mild gastric fever, the district has been free from any infectious disease during the quarter.

ANTRIM; Randalstown.—One case of scarlet fever reported. Gastro-enteric catarrh common. Otherwise health of the district good.

ANTRIM; Templepatrick.—The sanitary arrangements of the district are fairly good, with few exceptions. Health of district satisfactory; birth-rate high; death-rate low.

BALLYCASTLE; Cushendall.—The sanitary arrangements of one village are not very good, owing to defective sewerage, but it is the intention of the sanitary authorities to improve matters by the introduction of a new sewerage scheme and water supply.

BALLYMENA; Ahoghill.—District free from infectious disease.

BALLYMENA; Ballymena, W.—Town and district on the whole healthy. Two or three cases of enteric fever have lately appeared in the urban district.

BALLYMENA; Broughshane.—The health of the district has been excellent during the quarter. One case of typhoid fever reported.

BALLYMENA; Clogh.—I have at present three cases of typhoid fever. Otherwise the district is very healthy, as there have been only twelve deaths registered during quarter, and eight are over 60 years of age. Sanitary arrangements fair.

BALLYMENA; Galgorm.—An epidemic of typhoid fever has broken out in one village, with one death up to the present.

BALLYMENA; Glenwhirry.—Health of district exceptionally good, only four deaths being registered during quarter.

BALLYMENA; Portlengone.—Health of district is good.

BALLYMENA; Toome.—The sanitary state of the district is good.

BALLYMONEY; Bushmills.—Ten of the deaths out of twelve were among the aged, their united ages being 765 years, giving an average of $76\frac{1}{2}$ years each, and no deaths of children under one year.

LARNE; Ballycarry.—Sanitary condition of district good. No epidemic. Small-pox did not spread. Seven deaths registered during quarter of people aged over 80 years; one death of a man registered aged 98 years.

LARNE; Waterfoot.—The sanitary arrangements in the district are fairly good.

LISBURN; Dunmurry.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN; Glenavy.—The death average this quarter is high. This is not due to any zymotic influence, from which the district is at present free.

LISBURN; Knocknadona.—The sanitary condition of this district is good. Two deaths from cancer (one intestinal tumour, malignant, another obstruction of pylorus, malignant.) No record in either of the two deaths.

LURGAN; Aghalee.—One death due to malignant disease, and three to phthisis registered during quarter. Several cases of vaccination postponed owing to pertussis.

Armagh County.

ARMAGH; Armagh, W.—Twenty-five cases of small-pox occurred in district, and notified by us, but I believe that there were at least nine others.

ARMAGH; Keady.—Whooping-cough has been prevalent during the quarter. Five cases of small-pox occurred, and four of enteric fever.

ARMAGH; Loughgall.—Whooping-cough prevalent in the district during the quarter.

ARMAGH; Markethill.—District healthy.

ARMAGH; Rich Hill.—Owing to the prevalence of small-pox in neighbouring districts 314 re-vaccinations were performed.

CASTLEBLAYNEY; Newtownhamilton, No. 1.—Four cases of death from cancer registered.

LURGAN; Lurgan No. 1, W.—The district has been remarkably free from disease during the quarter, zymotic or otherwise.

LURGAN; Lurgan, No. 2.—The district is free from any epidemic or infectious disease.

NEWRY; Forkill.—The death of a woman whose age was stated to be 100 years was registered. One death from cancer. The health and sanitary condition of the district are satisfactory.

NEWRY; Mullaghglass.—District healthy.

Belfast County Borough.

BELFAST; Belfast Urban, No. 12.—Two cases of small-pox occurred during the quarter in the district.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—There were two cases of typhoid fever which were sent to hospital, where one of them died. District otherwise healthy.

BAILIEBOROUGH; Kingscourt.—The death of a male, aged 65 years, from cancer of tongue was registered; there is no history of cancer in the family. The deceased was addicted to smoking.

BAILIEBOROUGH; Shercock.—District healthy.

CAYAN; Killashandra.—One death from malignant disease of right kidney, and one of cancer of the breast, were registered during the quarter. One case of small-pox, confluent, occurred at Derry, which was sent to workhouse hospital. The man had been working at Armagh. No other cases occurred in district, owing to isolation and re-vaccination.

COOTEHILL; Drum, No. 2.—The district is in good sanitary condition. During the last month I have had a good many cases of diarrhoea in children, which disease, I think, was caused by eating too freely of unripe fruit.

COOTEHILL; Tullyvin.—The district remarkably healthy.

ENNISKILLEN; Holywell No. 2.—The sanitary arrangements of the district are fairly good. Of the seven deaths registered during the quarter one was of a child two days old; five were over 60 years, one of whom (a widow) had attained the age of 106 years.

GRANARD; Scrabby, No. 1.—The sanitary state of the district continues satisfactory.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary arrangements fairly good,

DONEGAL; Donegal, W.—Three cases of typhus during the quarter. District otherwise healthy.

DONEGAL; Dunkineely.—Sanitary condition improving.

DONEGAL; Mountcharles.—There have been three cases of smallpox in the district during the quarter. No other cases of any infectious disease.

DONEGAL; Pettigoe.—Owing to a case of smallpox in Ederney district vaccination has been above average. A large number were re-vaccinated.

DUNFANAGHY; Crossroads.—The district was free from any infectious diseases during the quarter.

DUNFANAGHY; Dunfanaghy, W.—Health of district very satisfactory.

GLENTIES; Ardara.—The sanitary arrangements in this district are good.

GLENTIES; Carrick.—The water supply in one village is very inadequate, being principally surface water, and consequently very impure.

GLENTIES; Doocherry.—District healthy.

GLENTIES; Dunglow, No. 1.—The deaths include that of a woman, 106 years old.

GLENTIES; Dunglow, No. 2.—This district has been healthy during the quarter.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Carndonagh, W.—The district is fairly healthy.

INISHOWEN; Clonmany.—District healthy.

INISHOWEN; Malin.—District healthy.

INISHOWEN; Moville.—District healthy at present. Called on 29th September to see a girl with scarlet fever. Sent her to hospital. House and bedding thoroughly disinfected. No other case in district.

LETTERKENNY; Church Hill.—District healthy. No epidemic.

LONDONDERRY; Burt.—District free from infectious diseases.

MILFORD; Fanad.—District healthy. No outbreak of infectious disease during quarter.

MILFORD; Rathmullan.—District has been healthy during the quarter.

STRABANE; Raphoe.—Sanitary arrangements satisfactory.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory. The majority of the deaths are of persons of advanced ages.

Down County.

BANBRIDGE; Ballyward.—Sanitary state of district good. No epidemic disease in the district.

BANBRIDGE; Loughbrickland.—The sanitary arrangements in the district are fairly good.

DOWNPATRICK ; Ballynahinch.—There has been no epidemic disease in the district during the quarter.

DOWNPATRICK ; Killyleagh.—Measles was prevalent during the quarter just ended. There have also been 13 cases of diphtheria, confined to three families. There were two fatal cases, one complicated with measles, and the other was moribund when the disease was recognised. Twelve of the sufferers were treated with the antitoxic serum, and all have made most satisfactory recoveries except the one that was complicated with measles.

DOWNPATRICK ; Portaferry.—The health of this district has been very good during the quarter. No case of infectious disease.

KILKEEL ; Kilkeel, No. 2.—Health of district good.

KILKEEL ; Rosstrevor.—Public health excellent. No epidemic disease.

LISBURN ; Drumbeg.—Several cases of scarlatina occurred during July and August. All the patients were sent to hospital, the outbreak being limited to three houses. No other infectious disease in the district.

LISBURN ; Saintfield.—Health of district very good.

LURGAN ; Moira.—Two deaths from whooping-cough, which, with a little measles, has been in the district for some time.

LURGAN ; Waringstown.—One death was registered from scarlet fever; the death occurred in last quarter. The district is healthy, the death-rate being very low—the lowest for the last 30 years of which I have kept a record.

NEWRY ; Donaghmore.—District very healthy. Sanitary matters in a good state.

NEWRY ; Rathfriland.—Deaths below the average. Whooping-cough prevailed to a great extent during quarter, but is now on the decline.

NEWTOWNARDS ; Bangor.—Sanitary arrangements very good. Health of entire district good. Vaccination well carried out.

NEWTOWNARDS ; Comber.—Health of district very good. No epidemics.

NEWTOWNARDS ; Greyabbey.—Births and deaths about average. Of the 12 deaths over 60 years, 6 were over 80 years, one of them 98 years, and one 91 years. No epidemic in the district. Two cases of measles seen last month (September) in Ballywalter, origin unknown. General health of district good.

Fermanagh County.

BALLYSHANNON ; Church Hill.—District healthy.

CLONES ; Rosslea.—Owing to cases of small-pox in neighbouring districts, there were more re-vaccinations than usual.

ENNISKILLEN ; Enniskillen, W.—Sanitary arrangements fairly good.

NEWTOWNARDS ; Newtownards, W.—Forty-eight cases of scarlatina have been notified to me during the past quarter. Forty-six were removed to hospital. The two cases which were not taken to hospital were isolated, and the sanitary sub-officers requested to keep a careful watch over them. Two of the cases proved fatal. Every possible means were used by the sanitary authorities to prevent the spread of the disease. Disinfection of the houses, clothing, bedding, and of everything likely to carry infection has been carried out. Since the schools were closed, a fortnight ago, only four cases have been notified. Apart from the scarlatina, the district is in a healthy condition.

ENNISKILLEN ; Florencecourt.—The district is in a fairly good sanitary condition.

ENNISKILLEN ; Holywell, No. 1.—The sanitary arrangements are fairly good.

IRVINESTOWN ; Clonelly.—A large number re-vaccinated owing to case of small-pox in Ederney Dispensary District.

IRVINESTOWN ; Ederney.—A case of small-pox occurred. The patient was removed to the Irvinestown fever hospital and died there. I took the usual precautions and no further cases have turned up in the district.

IRVINESTOWN ; Irvinestown, W.—One death from small-pox in fever hospital. This case came from Ederney district. Every care has been taken to prevent the spread of the disease.

LISNASKEA ; Derrylin.—Sanitary condition primitive.

LISNASKEA ; Lisnaskea, W.—Sanitary state of district fair. No infectious disease prevalent.

Londonderry County.

COLERAINE ; Aghadowey.—District healthy, save for mild epidemic of whooping-cough.

COLERAINE ; Coleraine, W.—Five deaths from tuberculous diseases recorded, and two deaths from cancer (one of chest and one of bowels). No family history of cancer to be obtained.

COLERAINE ; Garvagh.—District particularly healthy. Only nine deaths registered during quarter, five of these being of persons over 60 years of age.

COLERAINE ; Kibrea.—District healthy. Exceptionally low death-rate during the quarter. The patient whose death was registered as having been caused by enteric fever came from another district, but strict sanitary precautions were taken, and there is no further spread of the disease.

COLERAINE; Portstewart.—The health of the district has been good.

LIMAVADY; Ballykelly.—Among the deaths registered during the quarter is that of one old lady who had reached the age of 104 years, still retaining all her senses, except partial failure of hearing, until very soon before death, and also able to walk about. As is common in such cases, she belonged to a long-lived family, her mother having reached the age of 99 years, and three of her brothers were over 80 years when they died, and the fourth, having passed that age, is still alive and active.

LIMAVADY; Bellarena.—The district has been free during the quarter from contagious disease.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory. Mortality slightly above the average and principally from senility. Three deaths from phthisis—one of them had an hereditary history and two not. Two deaths from cancer were recorded (one of intestines and the other of stomach). In either case no hereditary history could be elicited. There were three cases of scarlet fever which recovered—two in one family and one quite remote. There seems to have been no relation to each other as regards origin.

LIMAVADY; Limavady, W.—Two cases of cancer; no family histories. No fresh cases of small-pox have occurred in this or the neighbouring districts during the last quarter.

LONDONDERRY; Claudy.—One death from cancer of the throat was registered. No facts bearing on the causation of the disease were elicited.

MAGHERAFELT; Moneymore.—One death registered from diphtheria, which belonged to March quarter, and one death from whooping-cough, which took place in June quarter. There were a few cases of the latter disease during present quarter in one division of the district, but no deaths apparently. One death took place from cancer of stomach. No cause known, except alcoholism.

Monaghan County.

CARRICKMACROSS; Donaghmoyne.—Scarlatina of a mild type in district during quarter, but has now disappeared.

CASTLEBLAYNEY; Ballybay.—A few cases of diphtheria and of scarlatina were treated during the quarter. One case of the former infection proved fatal.

COOTEHILL; Dawsonsgrove.—The sanitary arrangements in the district are fairly good.

COOTEHILL; Drum, No. 1.—With the exception of one village the district is in a fairly good sanitary condition. This village has no proper supply of drinking water, which condition, in my opinion is

dangerous to the public health—besides being a great hardship to the inhabitants. By a not very large expenditure this could be remedied.

MONAGHAN; Castleshane.—District sanitary. There has been an occasional case of scarlet fever, resulting from epidemic of last quarter.

MONAGHAN; Emyvale.—The sanitary condition of the district is fair.

MONAGHAN; Monaghan, W.—The sanitary condition of the district continues satisfactory. The district has been threatened with an epidemic of small-pox. There are three cases at present in the County Fever Hospital, and the relations of these patients are at present isolated in workhouse. Throughout the district, and in the public institutions, re-vaccination has been extensively carried out. In the latter all inmates and officials have been re-vaccinated. Otherwise the general health in the district is satisfactory.

MONAGHAN; Scotstown.—There has been no epidemic in the district, the sanitary condition of which is satisfactory.

Tyrone County.

CASTLEBERG; Castleberg, W.—Sanitary state of district very satisfactory. Two deaths from scarlatina of malignant type registered. Sanitary laws strictly carried out, which prevented the spread of the disease.

CASTLEBERG; Killeter.—State of district healthy.

CLOGHER; Aughnacloy.—The sanitary condition of the district is satisfactory. In view of the prevalence of small-pox in neighbouring districts re-vaccination has been done in a number of cases.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter. There were no cases of small-pox, but a good many persons were re-vaccinated owing to its prevalence in neighbouring counties.

COOKSTOWN; Cookstown, W.—The district is very healthy.

COOKSTOWN; Pomeroy.—This district is sanitary and healthy.

COOKSTOWN; Stewartstown.—District at present very healthy.

DUNGANNON; Caledon and Ballymagran.—There were six cases of typhoid fever in the district during current quarter. All were removed to Union fever hospital, where three succumbed to the disease. No other infectious disease in district.

DUNGANNON; Clonavaddy.—District fairly healthy. Sanitary arrangements good.

DUNGANNON; Coal Island.—An epidemic of measles at beginning of quarter, imported from Scotland. One death—a girl aged 20 years. No cases during the last two months. One death from cancer. No history in the family or in the house. On the whole, the district has been unusually healthy.

IRVINESTOWN; Trillick.—District at present healthy. One death registered at the age of 89 years, two at 80, one at 75, one at 65, and two at 60 years.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No 1, W.—During the quarter five cases of scarlatina (one proved fatal), six cases of typhoid (one death registered as typhoid), and one case of small-pox were notified. The sanitary condition of the rural district is satisfactory.

OMAGH; Omagh, No. 2.—This district is in good sanitary condition; no epidemic of any kind.

OMAGH; Sixmilecross.—The district is at present in very good sanitary state. Five cases of scarlatina during the quarter.

STRABANE; Dunnamanagh.—I registered the death of a man 100 years of age during the quarter.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Kiltormer.—The health of the district is very good.

CLIFDEN; Inishbofin.—Sanitary conditions fair. No infectious disease prevalent.

CLIFDEN; Roundstone, No. 1.—The district is free from epidemic disease.

CLIFDEN; Roundstone, No. 2.—The district is free from contagious disease.

GALWAY; Galway, No. 3 (Arran).—One case of small-pox during the first week of September. No spread of the disease so far.

GALWAY; Oranmore.—District remarkably healthy.

GORT; Gort, W.—Health of district very good.

GORT; Kinvarra.—One case of scarlatina has come under my notice; the disease did not spread. The sanitary condition of the district is fair.

LOUGHREA; Athenry.—The general sanitary condition of the district is good. There was no epidemic prevalent during the quarter.

LOUGHREA; Bullaun.—Of the deaths registered, five were between 64 and 80 years, and one person had attained the age of 99 years.

PORUMNA; Portumna No. 1. W.—The sanitary arrangements of the district are good, and there are no cases of infectious disease to my knowledge.

TUAM; Abbey.—Sanitary arrangements fairly good; room for improvement.

TUAM; Tuam, No. 2.—Whooping-cough of a mild type prevalent.

Leitrim County.

BAWNBOY; Ballinamore.—One case of small-pox, sent to hospital when rash appeared.

MANORHAMILTON; Drumahaire.—The public health of this district has been very good, and compares favourably with corresponding quarters in previous years. The number of emigrants re-vaccinated during the quarter is much in excess of that for any quarter during the past twenty years.

MANORHAMILTON; Lurganboy.—The district is fairly healthy. Vaccinations are going forward well. Small-pox has, so far, not invaded the district.

MOHILL; Carrigallen.—The sanitary condition of the district is fairly good. Nine of the ten deaths registered were of persons over 60 years old, one being from cancer of the palate fauces and all the structures of the throat.

MOHILL; Rinn.—The district is healthy, and free from epidemic disease.

MOHILL; Rowan.—Sanitary arrangements are favourable. Epidemic diseases are not prevalent.

Mayo County.

BALLINROBE; Cappaghduff.—Sanitary arrangements good.

BALLINROBE; Cong.—Health of district very good.

BALLINROBE; Hollymount.—Births and deaths are under the average. Measles and whooping-cough were epidemic during the quarter.

BELMULLET; Bangor.—Health of district has been good during quarter. The deaths registered were due to phthisis, pneumonia, puerperal eclampsia, old age, etc. I consider there would be a still greater reduction in death-rate if sanitary laws were more generally enforced. Registration and vaccination satisfactory. It appears from time immemorial the people here have been

in the habit of housing all kinds of domestic animals in their respective dwellings, with the result that they are looked upon now as ornamental and quite necessary additions to the household. It is to be hoped such primitive ideas of sanitation will soon be abolished, and others more scientific take their place.

BELMULLET ; Knocknallower.—The health of the district has been good.

CASTLEBAR ; Castlebar, No. 1, W.—Health of district good.

CLAREMORRIS ; Ballyhamis.—During the quarter whooping-cough prevailed extensively throughout the district, occasioning four deaths. Malignant scarlatina also appeared in one family, occasioning three deaths. Happily the prompt preventive measures adopted have confined the disease to the family primarily affected. Sanitation progressive.

KILLALA ; Ballycastle.—Two deaths from membranous croup (no medical attendant), and two from carcinoma of lower jaw (certified) were registered. I sent four cases of enteric fever to Killala Union Hospital, and one case of diphtheria. I performed tracheotomy in two cases of laryngeal diphtheria—recovery in both cases.

KILLALA ; Killala, W.—Whooping-cough and chicken-pox were prevalent in most parts of the district. In other respects the health of the people was good.

WESTPORT ; Achill.—Sanitary state and general health of district good, and no epidemic present. Burial ground of Slievemore very much overcrowded, and well much wanted at Pullagh and Sound.

WESTPORT ; Ballycroy.—The prevalence of a very severe epidemic of whooping-cough prevented vaccination. District otherwise healthy.

WESTPORT ; Louisburgh.—District healthy during quarter. Sanitary condition good.

WESTPORT ; Newport.—Sanitary condition fairly good. Cattle still kept in houses.

WESTPORT ; Westport, W.—One death from typhus fever. Eight deaths (out of 26) from tuberculous diseases (phthisis, &c.)

Roscommon County.

BOYLE ; Ballyfarnam, No. 1.—Vaccination in the district postponed during quarter. Epidemic of measles now practically over in the district.

BOYLE ; Boyle No. 1, W.—There was a mild epidemic of enteric fever due to drinking polluted waters.

BOYLE ; Keadew.—Two deaths registered during quarter, aged respectively 90 years. Measles very prevalent over the district.

CARRICK-ON-SHANNON ; Aughrim.—The sanitary condition of the district continues good. There has been no case of infectious disease, and in fact no case of serious illness of any kind during the quarter.

STROKESTOWN ; Roosky.—The sanitary condition of the district is pretty good. Of the deaths registered, eleven were of persons aged 60 years or upwards—one man reached the advanced age of 97 years, and another man 93 years.

STROKESTOWN ; Strokestown, W.—District healthy. There has not been a death from any infectious disease.

Sligo County.

BOYLE ; Ballyfarnam No. 2.—Vaccination postponed in the district, owing to the prevalence of measles. The epidemic is now over.

BOYLE ; Gurteen.—Vaccination progressing. District healthy.

DROMORE WEST ; Skreen.—One typhoid case recovered well; its origin not traceable. Sanitary arrangements good. District healthy.

SLIGO ; Ballymote.—The district is in a very healthy condition and free from all contagious disease.

SLIGO ; Carney, No. 1.—The health of the district has been good during the past quarter. A few cases of enteric fever occurred. Tuberculous disease is common in some localities, notably in one village.

SLIGO ; Carney, No. 2.—Sanitary condition of the district fairly good. No deaths from infectious diseases.

SLIGO ; Riverstown.—District healthy. A few mild cases of measles during September.

TOBERCERRY ; Coolaney.—Sanitary arrangements satisfactory.

TOBERCERRY ; Tobercurry, W.—The district is in a fairly good sanitary condition. Some cases of diphtheria.

1904.]
4th Quarter.

[No. 164.]

QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

K. PONSONBY, 116, GRAFTON-STREET, DUBLIN; or
WYMAN AND SONS, LTD., FETTER LANE E.C.; or
OLIVER AND BOYD, EDINBURGH.

Price One Shilling.

Marriages:—JULY, AUG., SEPT., 1904. **Births & Deaths:**—OCT., NOV., DEC., 1904.

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 24,475 births—a number equal to an annual birth-rate of 22·2 in every 1,000 of the estimated population*—and 18,145 deaths, representing an annual rate of 16·5 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 6,748 persons emigrated.

In England last quarter, the birth-rate represented was 27·1 in every 1,000 of the estimated population, and the death-rate 16·4 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 over the average rate for the corresponding quarter of the ten years 1894–1903, and 0·1 over the rate for the fourth quarter of 1903. The deaths are 75 over those registered in the corresponding quarter of 1903; the death rate is equal to the rate for that quarter, but 0·1 below the average for the fourth quarter of the ten years 1894–1903.

* See page 362.

Compared with those for the corresponding quarter of 1903, the returns of pauperism, furnished by the Local Government Board, show a decrease of 89 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 200 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1894-1903, the number of Workhouse inmates shows an increase of 845, and the number of persons on out-door relief shows an increase of 761, the total under both heads being 1.6 per cent. above the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2.3 per cent.

The annual marriage-rate (4.8 per 1,000 of the population) represented by the marriages registered during the third quarter of 1904 is 0.1 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 30th September, 1904, and by the Births and Deaths registered in the Quarter ended 31st December, 1904.

* The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 301.

MARRIAGES.

The marriages (5,328) registered in Ireland during the third quarter of 1904 are equivalent to an annual rate of 4·8 per 1,000 of the estimated population, being 0·1 under the rate for the corresponding quarter of 1903, but 0·1 above the average rate for the third quarter of the ten years 1894–1903. Of the total number of marriages 3,506 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,822 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·3 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·4 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·4, but that under the latter a decrease of 0·4. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during the first, second, and third quarters of 1904.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,475—12,620 boys and 11,855 girls—being equal to an annual ratio of 1 in every 45·0, or 22·2 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1894–1903 was 24,482, equivalent to an annual rate of 21·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22·0 per 1,000 of the population according to the Census of 1901; Munster, 21·0; Ulster, 23·3; and Connaught, 20·1.

The highest county birth-rate* is 30·8 for Belfast Co. Borough, and the lowest 16·4 for Cavan. Of the intermediate rates the highest five are—Dublin Co. Borough, 30·2; Limerick, 23·3; Kerry, 23·1; Mayo, 22·7; and Down, 22·7; and the lowest five are Longford, 16·7; King's, 16·7; Tipperary N.R., 16·9; Westmeath, 17·5; and Roscommon, 18·3.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,145—8,936 males and 9,209 females—affording an annual ratio of 1 in every 60·7, or 16·5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1894–1903 was 16·6 per 1,000.

The death-rate in Leinster was 18·5 per 1,000 of the population according to the Census of 1901; in Munster, 15·4; in Ulster, 16·7; and in Connaught, 12·9.

The county death-rates* range from 10·7 in Roscommon to 25·7 in Dublin County Borough. Between these rates the lowest five are—Kerry, 11·9; Mayo, 12·1; Clare, 13·2; Leitrim, 13·7; and Galway, 13·8; and the highest five are Belfast Co. Borough, 20·2; Wexford, 18·8; Tipperary S.R., 18·6; Armagh, 18·2; and Monaghan, 17·9.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1894–1903, and the average number for that period; also the number registered during each quarter of the year 1904:—

See note () on page 280.

Ages.—Of the 18,145 deaths registered last quarter, 2,461, or 13·6 per cent., were of children under 1 year old; and 7,454, or 41·1 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 190·6 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 15·7 per cent. of the total deaths registered therein; in Munster, 13·6 per cent.; in Ulster, 13·0 per cent.; and in Connaught, 9·9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 37·9 per cent.; in Munster, to 41·6 per cent.; in Ulster, to 40·6 per cent.; and in Connaught, to 49·8 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 1,060, or greater by 263 than the number occurring in the corresponding quarter of 1903, and is equivalent to an annual rate of 1·0 per 1,000 living, being 0·3 over the rate for the fourth quarter of 1903, but equal to the average rate for the fourth quarter of the ten years 1894–1903.

Small-pox.—The six deaths which were registered during the quarter from small-pox, represent a rate of 0·01 per 1,000 of the estimated population of Ireland. They occurred in the province of Ulster, 5 appertaining to the County Borough of Belfast, took place in the Small-pox Hospital, Purdysburn, in the Registrar's District of Ballylessan, (Lisburn Union), and one death was registered in the District of Lurgan No. 1, in the Armagh portion of Lurgan Union. In the preceding quarterly periods of the year 1904, deaths registered from small-pox were 4, 2, and 4, respectively, and the average for the December quarter of the preceding 5 years is 0·4.

The condition as regards vaccination of the persons who died is reported as following:—of the 5 deaths appertaining to Belfast County Borough which occurred in the Small-pox Hospital, Purdysburn, one was vaccinated, and 4 were not vaccinated, and the death which occurred in Lurgan was that of an unvaccinated child.

Measles.—The deaths due to measles which were registered during the quarter amount to 262, and represent a rate of 0·24 per 1,000 of the estimated population of the country. The deaths registered are in excess of those registered during the 6 preceding quarters, but are below the number registered (291), in the March quarter of 1903, and are nearly equal to the average deaths (264) from measles for the December quarter of the 5 years which precede 1904. Of the total deaths registered from measles, 90 appertain to the County Borough of Dublin, and 120 (nearly one half of the total) to the County Borough of Belfast. Of the 90 deaths in Dublin, 81 were tabulated for South City Districts, 45 appertaining to the District of South City No. 1; and of the deaths in Belfast County Borough 35 appertained to the District of Belfast Urban No. 3, 26 to Belfast Urban No. 10, and 15 to Belfast Urban No. 4.

Scarlet Fever.—The deaths from scarlet fever (62) are in excess of the numbers registered in any one of the preceding quarters of the year, namely:—52 in March quarter, 45 in June quarter, and 41 in September quarter, but are slightly below the average (67) for the corresponding period of the preceding 5 years. The deaths from scarlet fever registered during the quarter represent a rate of 0·06 per 1,000 of the estimated population.

Eight deaths from scarlet fever were registered in the Registrar's District of New Ross, in which district the Workhouse Hospital is situated, and 4 deaths were registered in the Registrar's District of Castlebar No. 2.

* See note (f) on page 286.

Typhus.—The deaths from typhus registered during the quarter were only 5 in number, being 21 under the average for the corresponding quarterly period of the past 5 years. In the three preceding quarters of 1904, 13, 17, and 18 deaths were registered, respectively, from this disease.

Of the deaths from typhus one was assigned to each of the following Unions:—Galway, Kilkenny, Lismore, Tobereurry, and Tuam.

Whooping-cough.—The mortality from whooping-cough (235 deaths), although less than that recorded in any one of the preceding quarters of the year 1904, namely 466, 431, and 249, respectively, is above the average for the December quarter for the five years ending with 1903 by 42 deaths; the total deaths represent a rate of 0·21 per 1,000 of the estimated population.

One or more deaths from whooping-cough were registered in each County in Ireland, during the quarter under notice, with the exceptions of Louth, Cavan, Fermanagh, and Monaghan. In the Unions of Belfast and Lurgan 15 deaths were respectively registered; in South Dublin Union 13, and in each of the Unions of Armagh, Dingle, and Wexford 11 deaths from whooping-cough were registered.

Diphtheria.—The annual rate represented by deaths from diphtheria (92), is equal to 0·08 per 1,000 of the estimated population. The 92 deaths are in excess of the number registered in any preceding quarterly period, as far back as the March quarter of 1903 when 115 deaths from diphtheria were recorded. The deaths in the three quarters immediately preceding that under notice, were respectively 79, 47, and 56, the average number of deaths for the December quarter of the five preceding years being 108.

In 39 of the 159 Unions or Superintendent Registrar's Districts into which Ireland is divided, either one or more deaths from diphtheria were registered. In each of sixteen Unions one death was registered, in each of nine Unions 2 deaths were registered, in each of eight Unions 3 deaths were registered, in Ballymena, Dublin (North), and Lurgan Unions 4 deaths were registered in each; in Belfast Union 6 deaths were registered, in Downpatrick Union 7 deaths were registered, and in Longford Union 9 deaths were reported. The 7 deaths in Downpatrick Union were all registered in the Registrar's District of Killyleagh, and 7 of the 9 deaths in Longford Union were registered in the Registrar's District of Drumlish; the figures for the respective Registrars' Districts were equivalent to an annual death-rate of 3·8 and 3·2 per 1,000 of the population.

Enteric Fever.—Although the deaths referred to enteric fever (which number 133), are in excess of the number registered in the previous quarter, and also of the number registered in the December quarter of 1903, they are below the average (183) for the corresponding quarterly period of the years 1899-1903. The deaths represent an annual rate of 0·12 per 1,000. Referring to the distribution of the disease it may be seen from Abstract I., page 300, that no deaths from enteric fever were reported from the following Counties—Carlow, Dublin (not including the County Borough of Dublin), Kilkenny, Louth, Meath, Queen's County, Wicklow, Kerry, Tipperary, N. R., Donegal, Leitrim, and Roscommon.

Of the deaths, 14 were in Dublin County Borough, 24 in Cork County and County Borough, and 43 in Belfast County Borough; it further appears from Abstract III. that 4 deaths from enteric fever were registered in the District of New Ross, and 3 deaths in the District of Tullamore.

Diarrhoeal Diseases.—In the March quarter of 1904, the deaths which were classified to the diarrhoeal diseases, namely, epidemic or zymotic

enteritis, dysentery, diarrhoea, etc., numbered 99; in the second or June quarter the number rose to 110; and in the September quarter further rose to 607. In the quarter under notice the deaths declined to 255, a number which although below the average (292) for the corresponding quarterly period of the five years preceding, is above the number (200) of deaths recorded during the December quarter of 1903. The deaths (255) equal a rate of 0·23 per 1,000 of the estimated population of Ireland.

Nearly 60 per cent. of the deaths (255) from diarrhoeal diseases were registered in the unions of Belfast (56), Cork (11), Dublin North (25), Dublin South (40), and Waterford (10). Of the 56 deaths in Belfast Union, all appertained to Belfast County Borough; of 25 deaths in North Dublin Union, 24 appertained to Dublin County Borough; of 40 deaths in South Dublin Union, 34 appertained to Dublin County Borough; and of 10 deaths in Waterford Union, 8 appertained to the County Borough of Waterford.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in 3 districts, measles in 24 districts, scarlet fever in 35, whooping-cough in 44, diphtheria in 25, fever in 24 (typhus, 2, enteric, 21, and simple or ill-defined fever, one), influenza in 16, and chicken-pox in one.

Inquests.—There were 470 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 39 of the total deaths registered.

In Leinster there was 1 inquest to every 34 deaths registered, in Munster 1 to 46, in Ulster 1 to 34, and in Connaught 1 to 72.

Deaths in Public Institutions.—Of the 18,145 deaths registered, 3,484, or 19·2 per cent., occurred in public institutions. In Leinster the percentage was 25·6, in Munster 23·5, in Ulster 13·4, and in Connaught 12·8.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1904, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple Continued Fever.	Enteric Fever.	Diarrhoeal Diseases.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 20.1, and the birth-rate 27.2 per 1,000 of the population according to the Census of 1901; in the remainder of the country the death-rate was 14 and the birth-rate 19.7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1.8 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0.6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1904, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathfarnham, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 31st December, 1904.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1904, there were 21,450 persons successfully vaccinated; in 3,193 cases the operation was postponed, 29 children were reported as insusceptible of vaccination, and the deaths of 1,479 unvaccinated children under 3 months old were registered, making a total of 26,151 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 6,748 (3,056 males and 3,692 females), being 904 more than in the corresponding quarter of the year 1903, and 793 above the average number for the fourth quarter of the ten years 1894–1903.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1903 and 1904:—

MONTHS	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.	1903.	1904.	In-crease.	De-crease.
October,	1,417	1,861	444	-	2,205	2,551	346	-	3,622	4,412	790	-
November	689	804	115	-	823	821	-	2	1,512	1,625	113	-
December,	393	391	-	2	317	320	3	-	710	711	1	-
Total,	2,499	3,056	557	-	3,345	3,692	347	-	5,844	6,748*	904	-

* Including 5,534 emigrants to the United States of America, viz.:—3,509 in the month of October, 1,201 in November, and 424 in December. The passages of 1,913 of the steerage passengers were paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1903 the average price was 5½d., and in the corresponding quarter of 1894 it was 4½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., the same as the average for the corresponding quarter of the year 1903. In the fourth quarter of 1894 the average price was also 14s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 6d. to 3s. 0d. In the fourth quarter of 1903 the average prices were 3s. 3d. to 3s. 10d., and the prices for the corresponding quarter of 1894 were 3s. 2d. to 3s. 11d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 45s. 6d. to 53s. per cwt. In the corresponding quarter of 1903 the average prices were from 50s. to 55s., and in the fourth quarter of 1894 they were from 43s. to 51s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 18s. per ton nett.

The highest price of 2¾ per cent. Consols at the Dublin Stock Exchange for the quarter was £88½, and the lowest £87⅙. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 4 per cent., to which it was lowered from 4½ per cent. on the 14th April.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average weekly number of persons receiving out-door relief during the quarter was 55,907, being 200 over the average for the fourth quarter of 1903.

Of the persons receiving in-door relief during the fourth quarter of 1904, an average number of 1,425 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1903 the average weekly number was 1,399.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1904, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM	
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			NUMBER OF PERSONS RELIEVED

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE. The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth quarter of the years 1899–1904, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 296):—

The mean height of the barometer during the fourth quarter of 1904 was 30·011 inches, being 0·144 over the average for the corres-

* Latitude 53° 21' 44·65" north; longitude 6° 21' 6·35" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1899-1903; the highest reading (30·562 inches) was on the 18th December, at 9 P.M., air calm; and the lowest (28·961 inches) on the 12th December, at 9 A.M., wind W.

The mean temperature of the air during the quarter was 44·6°.

The maximum temperature of the air during the quarter was 63·5° and the minimum 23·1°. The maximum heat in sun was 110·0°, and the minimum on the grass 14·8°.

Rain or snow fell on 41 days during the quarter. The rain-fall measured 3·600 inches, being 4·521 inches under the average for the fourth quarter of the five years 1899-1903. The greatest monthly rain-fall was in December, when 1·535 inches were registered.

The wind blew on 34 days from W., on 17 days from S.W., on 6 days from N.W., on 5 days from E., on 4 days from S.E., on 2 days each from N. and S., and the air was calm on 22 days at 9 A.M.

October.—The mean height of the barometer during this month was 30·087 inches; the highest reading (30·505 inches) was on the 12th at 9 P.M., air calm; and the lowest (29·422 inches) on the 5th, at 9 P.M., wind W. The mean temperature of the air was 49·3°, the maximum registered was 63·5°, and the minimum 27·8°. The 21st was the warmest day, and the 13th the coldest night. The mean of the dry bulb was 50·3°, and of the wet bulb 48·1°. The maximum heat in sun was 110·0°, and the minimum on the grass 22·0°. The minimum on the grass was below 32° on 12 nights. The total amount of sunshine recorded was 90·9 hours, the greatest daily amount being 9·9 hours on the 1st. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain or snow fell on 10 days. The rain-fall measured ·650 inch; the greatest amount in 24 hours was ·330 inch on the 16th.

November.—The mean height of the barometer during this month was 30·079 inches; the highest reading (30·540 inches) was on the 16th at 9 A.M., wind W., and the lowest (29·440 inches) on the 7th, at 9 A.M., wind W. The mean temperature of the air was 43·0°, the maximum registered was 57·5°, and the minimum 23·1°. The 15th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 43·3°, and of the wet bulb 41·9°. The maximum heat in sun was 89·5°, and the minimum on the grass 14·8°. The minimum on the grass was below 32° on 17 nights. The total amount of sunshine recorded was 56·2 hours, the greatest daily amount being 6·9 hours on the 12th. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain or snow fell on 14 days. The rain-fall measured 1·415 inches; the greatest amount in 24 hours was ·585 inch on the 6th.

December.—The mean height of the barometer during this month was 29·866 inches; the highest reading (30·562 inches) was on the 18th, at 9 P.M., air calm; and the lowest (28·961 inches) on the 12th, at 9 A.M., wind W. The mean temperature of the air was 41·6°; the maximum registered was 57·0°, and the minimum 25·9°. The 16th was the warmest day, and the 8th the coldest night. The mean of the dry bulb was 41·2°, and of the wet bulb 40·0°. The maximum heat in sun was 91·4°, and the minimum on the grass 18·3°. The minimum on the grass was below 32° on 18 nights. The total amount of sunshine recorded was 56·8 hours, the greatest daily amount being 6·2 hours on the 18th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain or snow fell on 17 days. The rain-fall measured 1·535 inches; the greatest amount in 24 hours was ·325 inch on the 9th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared under the direction of the Meteorological Council.

In compiling the following Table (pp. 298, 299), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	The Meteorological Council.
Donaghadee,	The Meteorological Council.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	The Meteorological Council.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	W. J. Roe and J. H. Skerrett, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	The Meteorological Council.
Roche's Point,	The Meteorological Council.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee, Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m., and where also Greenwich time is Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them.

† The Averages used are based on observations as follows:—Rainfall 35 years, 1866-1900; Temperature 30 years, of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days of Gale

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park and the

1-1900; Sunshine 20 years, 1881-1900. Wind Force.—Beaufort Scale (0-12) is used. The number of observations given in the table.

Earth Temperatures at Trinity College.

[illegible]

Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898. In some cases it is not at present practicable to give the average numbers of Births and Deaths for the corresponding Quarters of previous years in the Unions and Districts as now constituted including accidental deaths, homicides, and suicides.

† The Bureau also includes deaths, homicides, and suicides, including accidental deaths,

put

§ The deaths of 5 persons from Small-pox, residents of Belfast, took place in the Small-pox Hospital, Purdyburn, in the Registrar's District of Ballylesson, in the Union of Lisburn.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1901.	Mar- riages.		Births.		Deaths		The Deaths registered during the Quarter as stated by the Registrars to include												Vaccination Return for the Quarter ending 31st December, 1904					Total of the foregoing.
			Registered in the quar- ter ending 31st Decem- ber, 1904.	Registered in the quar- ter ending 31st Decem- ber, 1904.	Averaged in the quarters ending 31st Decem- ber, 1900-1903.	Registered in the quar- ter ending 31st Decem- ber, 1904.	Registered in the quar- ter ending 31st Decem- ber, 1904.	Children under 1 year of age.	Persons aged 60 years and up- wards.	Deaths from								Inquest Cases.	Deaths in Public Insti- tutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons insusceptible of Vac- cination.	Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the quarter.			
										Small-pox.	Measles.	Scarlet Fever.	Typhus Fever.	Whooping-cough.	Diphtheria.	Simple continued Fever.	Enteric Fever.							Diarrhœal Diseases.	Violence.

NOTE.—This table has been constructed for the years 1830 and 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1904—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1831, 1891, and 1901, respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—The district is in a healthy condition.

CARLOW; *Bagnalstown*.—The most of the deaths have been of persons under 50 years of age, from lung trouble. There has been no delay in having the children vaccinated, owing, I suppose, to the extraordinary mildness of the weather.

CARLOW; *Carlow, No. 1, W*.—The prevalence of consumption (pulmonary) is marked in the district, and, as a rule, its progress is rapid. It would be an advantage to have some better means of isolating advanced and incipient cases.

CARLOW; *Leighlinbridge*.—Whooping-cough in the district.

Dublin County.

CELBRIDGE; *Lucan*.—District healthy, save for a mild epidemic of mumps. Water supply very defective.

DUBLIN, NORTH; *Blanchardstown and Castleknock*.—A few cases of measles during the past week, otherwise district very healthy.

DUBLIN, NORTH; *Clontarf and Howth, No. 2*.—Whooping-cough very prevalent in the district, also some cases of diphtheria.

DUBLIN, NORTH; *Coolock and Drumcondra, No. 2*.—Whooping-cough prevalent at end of quarter.

Kildare County.

ATHY; *Castledermot*.—District healthy during quarter.

BALTINGLASS; *Baltinglass, No. 2*.—Most vaccinations postponed on account of influenza amongst the children.

CELBRIDGE; *Celbridge, W*.—District healthy.

CELEBRIDGE; *Kilcock*.—This district is in a very healthy state, considering the season and the weather.

CELBRIDGE; *Maynooth*.—District healthy. Slight epidemic of whooping-cough in one division.

EDENDERRY; *Carbury*.—Vaccination postponed owing to great prevalence of measles and whooping-cough early in quarter; former still prevalent. A great many cases of pneumonia in October.

EDENDERRY; *Rathangan, No. 1*.—One death from measles registered during quarter, a boy, aged one year—the only death during the recent visitation of measles. The disease was rather mild, but very prevalent. Men of 35 years, who had escaped heretofore, were attacked. Three deaths from tuberculosis of lungs—two young girls, aged 17, 21, and 21 years respectively. Duration of illness from eleven months to three years. One had been sewing on the very day she died. One death from typhoid fever of a young man aged 22 years. Complaining of weakness, he left off work, went home, never rallied, death ensuing on the twenty-first day afterwards. No cause for the disease can be assigned, as the locality has been remarkably free from all zymotic diseases.

NAAS; *Kildare*.—Sanitary condition good.

Kilkenny County.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair. Whooping-cough prevalent in the town of Ballyragget. The two deaths from whooping-cough were due to complication of bronchitis.

CASTLECOMER; *Castlecomer, W*.—Two deaths were registered this quarter at the respective ages of 92 and 95 years. Both people lived nearly all their lifetime in the district.

KILKENNY; *Tullaroan*.—District healthy. Sanitation good.

NEW ROSS; *Dysartmoon, No. 1*.—District in a very healthy condition, and sanitary arrangements fairly good.

URLINGFORD; *Urlingford, W.*—Three deaths from diphtheria have been registered, also two deaths from cancer. Health of district fairly good.

WATERFORD; *Kilmakeloge.*—Deaths of two males, aged 65 and 82 years respectively, and one female, aged 85 years, were registered.

WATERFORD; *Ullid.*—Mortality for the quarter, despite an epidemic of scarlatina and diphtheria, is very low, only two people in the prime of life having died in the three months out of a population of upwards of 5,000.

King's County.

BIRR; *Banagher.*—The district very healthy.

BIRR; *Birr, W.*—There were four cases of enteric fever in the urban portion of the district during the quarter.

BIRR; *Ferbane.*—Sanitary arrangements in district fair. An epidemic of whooping-cough in district during the past month, with three deaths (not yet registered). Two cases of scarlatina notified during quarter, and one of enteric fever.

BIRR; *Killyon.*—One case of diphtheria during the present quarter.

BIRR; *Kinnitty.*—Sanitary condition of district fairly good.

EDENDERRY; *Rathangan, No. 2.*—One death registered, a man aged 86 years. A death occurred from tuberculosis of lungs, a young man, aged 28 years; he had been ailing for fifteen months. No death known in his family from disease of lungs. He first complained of sight failing, though to outward appearance free from ophthalmic disease.

EDENDERRY; *Rhode.*—Measles prevalent in district during the months of October and November.

MOUNTMELICK; *Clonygowan, No. 2.*—The district has been remarkably healthy during past quarter.

ROSCREA; *Shinrone.*—Vaccination postponed on account of children coughing.

Longford County.

BALLYMAHON; *Abbeyskrule.*—The sanitary arrangements of the district are satisfactory. There are some cases of whooping-cough in the district. One case of death from cancer of the stomach was registered.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee.*—The district is in good sanitary condition, and free from contagious sickness. Vaccination vigorously enforced during quarter.

GRANARD; *Granard, W.*—The district is in a good sanitary condition.

GRANARD; *Scrabby, No. 2.*—Sanitary state of district satisfactory. No epidemic.

Louth County.

ARDEE; *Castlebellingham.*—District very healthy, and in a fairly good sanitary state.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Drogheda, No. 3, W.*—The district in a healthy state during past three months.

DROGHEDA; *Termonfeckin.*—Scarlatina occurred in two families, but the disease did not fortunately assume epidemic proportions, nor extend at all beyond these limits. District free from all other diseases of an infectious nature.

DUNDALK; *Barronstown.*—There was a case of small-pox at the beginning of quarter. I had patient at once removed to small-pox hospital, the place disinfected, and no recurrence of the disease. District at present in fairly sanitary state.

DUNDALK; *Ravensdale.*—Health of district very good. Sanitation good.

Meath County.

DROGHEDA; *St. Mary's.*—The health of the district and sanitary arrangement are fairly good.

DROGHEDA; *Stamullen.*—District healthy during quarter.

KELLS; *Kilskeer.*—District very healthy.

KELLS; *Moynalty.*—Influenzal bronchitis very prevalent.

KELLS; *Nobber.*—I am very happy to say that the sanitary condition of the district is, in general, very satisfactory. A mild type of scarlatina made its appearance, but the prompt energetic measures adopted to keep it within bounds have completely nipped it out. No death has occurred through the malady, and the district has resumed its normal state.

NAVAN; *Painestown.*—An epidemic of pertussis, prevalent since spring, is waning. Two deaths from tubercular disease. One death from malignant disease. All deaths registered during the quarter were those of females.

OLDCASTLE; *Oldcastle, W.*—Owing to small-pox appearing in some of the neighbouring unions, vaccination has been well attended to here. Some cases of typhoid fever from a neighbouring district were treated in the fever hospital during the quarter.

TRIM; *Summerhill.*—Sanitary condition of district fairly good. No cases of infectious diseases have occurred.

Queen's County.

ABBEYLEIX; *Ballinakil*.—Health of district good.

ABBEYLEIX; *Ballyroan*.—I wish to state that during the past quarter I registered the death of a man whose age was stated to be 104 years.

MOUNTMELICK; *Clonygowan, No. 1*.—The district has been remarkably healthy during past quarter.

MOUNTMELICK; *Coolrain*.—Pertussis prevalent during quarter.

MOUNTMELICK; *Emo*.—Births and deaths about the average. Vaccination satisfactory.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; *Athlone, No. 1, W*.—There were registered during the quarter the deaths of four males, whose ages were respectively, 84, 80 (two), and 75 years; and five females whose ages were 91, 85, 80 (two), and 77 years.

ATHLONE; *Glassan*.—Deaths of old people registered at 95, 90, 80, 70, and 61 years, respectively.

MULLINGAR; *Casiletown Geoghegan*.—The district is free from zymotic disease, with the exception of a mild form of whooping-cough.

MULLINGAR; *Milltown*.—Throughout the quarter chest affections prevailed, especially about Christmas, and there was one death of a young man, *et.* 23 years, from lung disease registered. Bright's disease, supervening on bronchitis, accounted for another death at 63 years, while the remainder of the deaths registered were due to old age and senile decay. Of children under one year of age there were no deaths, and there were none from cancer. Compared to the December quarter of last year, there is a decline, amounting to more than half, in the number of deaths, with an increase in the number of births. The district is healthy.

MULLINGAR; *Mullingar, W*.—Health of district fairly good during past quarter. One death from cancer of the stomach. No history.

Wexford County.

ENNISCORTHY; *Enniscorthy, W*.—No vaccinations. Children all bad, or recovering, from measles.

ENNISCORTHY; *Killann*.—Sanitary condition of district good. An outbreak of measles and whooping-cough; cannot

account for it, except by its spreading from adjoining districts. Most vaccinations in district postponed on account of measles and whooping-cough.

ENNISCORTHY; *Newtownbarry*.—There has been a big epidemic of measles during the quarter.

GOREY; *Camolin*.—This district has been in a very healthy condition, excepting one case of diphtheria in a young person. The number of deaths recorded is low—only five persons above 60 years, and two of children under one year. There were three deaths from malignant disease.

GOREY; *Gorey, W*.—There were eleven cases of diphtheria during last month in district, with no deaths.

NEW ROSS; *Fethard, No. 2*.—District very healthy.

WEXFORD; *Bannow*.—There is at present an epidemic of scarlatina, not very widespread so far, in the district. Earlier in the quarter there were a good many cases of tonsillitis. For these reasons, and on account of the severity of the weather, I postponed vaccination. At the beginning of this quarter there were no defaulters. The number of successful primary vaccinations for last quarter was 33.

WEXFORD; *Bridgetown*.—Scarlatina prevalent in the district during the quarter.

WEXFORD; *Taghmon and Glynn*.—Scarlatina of a mild type prevalent during the quarter. One child died, aged 10½ years; said child was suffering from debility for some years.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W*.—Most vaccinations postponed on account of influenza amongst the children.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—The health of the district is good.

RATHDOWN; *Powerscourt*.—No epidemic at present existing in district.

RATHDRUM; *Annacoe*.—District healthy during the quarter. There are eleven of the twelve deaths registered aged 60 years and upwards.

RATHDRUM; *Arklow*.—There has been a severe epidemic of measles prevalent in the town and district of Arklow during the quarter.

RATHDRUM; *Newcastle*.—One death from cancer of stomach registered during the quarter of an old woman 71 years of age. Not hereditary; cause unknown.

RATHDRUM; *Rathdrum, W*.—Whooping-cough is prevalent in the district.

II. PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN ; Ballyvaghan, W.—District continues to maintain its healthy character.

CORROFIN ; Corrofin W.—Health of district fairly good. There was one fatal case of enteric fever, the disease having been contracted elsewhere. Influenza making its appearance towards end of quarter.

ENNIS ; Crusheen.—Of the three deaths registered one was from cancer of face and neck ; the other two were aged 85 and 92 years, respectively.

ENNIS ; Killaniv.—Sanitary arrangements good.

ENNIS ; Newmarket.—The health of the district has been very satisfactory during the quarter.

ENNISTIMON ; Ennistimon, W.—The sanitary arrangements are satisfactory. Vaccination is in proportion to the population.

ENNISTIMON ; Roadford.—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT ; Labasheeda.—District healthy.

KILRUSH ; Carrigaholt.—A few cases of whooping-cough in the eastern portion of district ; no death. Otherwise the health of district is excellent, and rate of mortality below the average for past quarters.

KILRUSH ; Craggaknock.—The health of the district during quarter was good.

KILRUSH ; Kilkee.—Sanitary arrangements in the district very good.

KILRUSH ; Kilrush, W.—Acute lobar pneumonia and broncho-pneumonia have prevailed to some extent ; otherwise the district has been healthy.

LIMERICK ; Bridgetown.—The sanitary condition of the district is good.

LIMERICK ; Coolacasey.—The district was very healthy,

SCARRIFF ; Annacurriga.—District healthy, with the exception of two cases of enteric fever which occurred during the quarter. One case died, being ill for eleven days before I saw it. The other case I sent to hospital. The case of enteric fever is not yet registered, therefore I could not fill in column for it.

SCARRIFF ; Feakle.—District very healthy. Sanitary arrangements fair.

SCARRIFF ; Mountshannon, W.—One case of fever at present in union workhouse, came in from another district. District otherwise healthy.

TULLA ; Kilkishen.—There was one case of enteric fever during December. Patient was removed to hospital, and no other case has since arisen.

TULLA ; Quin.—The sanitary arrangements in the district are good. None of the principal epidemic diseases are prevalent.

Cork County and County Borough.

BANDON ; Inishannon.—The district is in a fairly sanitary condition, except one village, which I do not consider in a sanitary state.

BANDON ; Kilbrittain.—Vaccinations postponed, whooping-cough being prevalent.

BANTRY ; Durrus and Kilcrohane.—A good deal of pneumonia amongst children, and aged people ; otherwise district healthy. One case of death registered from enteric fever, but I was not in attendance.

BANTRY ; Glengarriff.—The sanitary condition of the district is satisfactory. No case of infectious or contagious disease during the quarter.

BANTRY ; Kealkill.—Sanitary condition of district is fairly good. No infectious disease in district for past quarter.

CASTLETOWN ; Castletown, W.—District healthy.

CASTLETOWN ; Kilcatherine.—District healthy.

CLONAKILTY ; Rosscarbery.—District healthy.

CORK ; Carrigaline, No. 1.—District very healthy during quarter.

CORK ; Cork Urban, No. 4.—Measles very prevalent.

CORK ; Dripsey.—The water in one pump and one well has been found on analysis to be unfit for drinking purposes without being boiled.

CORK ; Queenstown, No. 2.—District in good sanitary condition. The presence of catarrh amongst infants has prevented a greater number being vaccinated.

CORK ; Whitechurch.—District healthy.

DUNMANWAY ; Dunmanway, W.—District healthy. No epidemic prevalent. One death from cancer, and one from phthisis.

FERMOY ; Ballynoe.—One death from probable sarcoma.

FERMOY ; Kilworth.—One village is insanitary ; sewerage defective. No epidemic prevalent.

FERMOY ; Rathcormack.—Health of district generally good.

KILMALLOCK ; Charleville.—The district is healthy. There is no epidemic of any kind. The cases of whooping-cough (2) were imported from Rathkeale.

KINSALE; Ballyfeard.—Health of district fair. Bronchial affections rather prevalent, of an influenza type.

MALLOW; Ballyclogh.—District very healthy.

MALLOW; Buttevant.—Measles was prevalent during the quarter, and interfered with vaccination.

MALLOW; Kilshannig.—District healthy.

MALLOW; Rahon.—The district has been healthy during the past quarter. No infectious diseases, except one case of enteric fever, which ended fatally.

MIDDLETON; Aghada.—Of the eight adults whose deaths were registered during the past quarter, seven were sixty years or over, and the eighth death was due to alcoholism.

MIDDLETON; Castlemartyr.—Owing to an epidemic of measles, followed by whooping-cough and scarlatina, all vaccinations are postponed for the present quarter.

MIDDLETON; Cloyne.—Owing to an epidemic of whooping-cough, I had to postpone the vaccination of several children in the district.

MIDDLETON; Middleton No. 2.—Whooping-cough was introduced from the town of Middleton during the quarter, and is spreading throughout district.

MIDDLETON; Walshtownmore East.—Whooping-cough was very prevalent during the quarter.

MILLSTREET; Cullen.—No case of infectious disease has occurred.

MITCHELSTOWN; Kildorrery.—Bronchial affections became prevalent during latter part of quarter, and vaccination had in several cases to be postponed.

SKIBBEREEN; Skibbereen, W.—District free from infectious diseases.

SKULL; Skull, W.—District very healthy during past quarter. Two deaths from phthisis were registered. Of the 13 deaths, 60 years and upwards, one was over 60, five were over 70, six were over 80, and one over 90 years.

Kerry County.

CAHERSIVEEN; Caher, W.—The district is in good sanitary condition.

CAHERSIVEEN; Derrynane.—The district is free from infectious disease, although there is much room for improvement with regard to its sanitary condition.

CAHERSIVEEN; Glanbehy.—Sanitary condition of district good.

CAHERSIVEEN; Valencia.—District healthy during the quarter.

DINGLE; Anascaul.—An epidemic of whooping-cough prevented many children from being brought for vaccination during the quarter.

DINGLE; Castlegregory.—Pertussis, which was very prevalent, has now disappeared.

DINGLE; Dingle, W.—There is an epidemic of pertussis in the district for the last three months, consequently vaccinations had to be postponed. Otherwise the district is healthy.

KENMARE; Tuosist.—District exceptionally healthy. One death at 100 years, another at 90.

KILLARNEY; Coom.—Five cases of membranous croup, and one case of diphtheria since last report. District otherwise healthy. Vaccination normal.

KILLARNEY; Killarney, No 1, W.—No epidemic during quarter. A few cases of influenza lately.

KILLARNEY; Milltown.—District very healthy. Sanitary condition good. No case of contagious or infectious disease during the quarter.

LISTOWEL; Ballybunion.—Health of district good.

LISTOWEL; Ballyhorgan.—Sanitary state of district good.

LISTOWEL; Ballylongford.—One case of typhus fever ordered to hospital; precautions duly taken to prevent spread of disease. Health of district otherwise good. Vaccination very good for season. Sanitary state of one town requires improvement.

LISTOWEL; Tarbert.—The district is free from contagious diseases.

TRALEE; Castlemaine.—The prevalence of chicken pox, &c., prevented children from being vaccinated during the quarter.

TRALEE; Kilgobbin.—The district is free from any infectious disease, and parents should have children vaccinated without further delay.

TRALEE; Tralee No. 2.—Sanitary condition of district good.

Limerick County and County Borough.

CROOM; Castletown.—District has been free from infectious disease during quarter.

KILMALLOCK; Bruff.—The district appears to be healthy in general, with the exception of two deaths from whooping-cough; there were none other since.

KILMALLOCK; Bruree.—A small number of influenza cases, but very severe.

KILMALLOCK; Hospital.—Whooping-cough prevalent. District otherwise healthy.

KILMALLOCK; Kilfinnane.—One death registered of a person aged 102 years, whose children (alive) range from 73 to 60 years. District healthy now. Some enteric fever during quarter.

KILMALLOCK; Kilmallock, W.—Sanitary arrangements good, except in the case of some Schools, where common privies are used, and which are most insanitary and inadequate. Eight cases of typhoid fever occurred in one family, all of which were sent to hospital. No fatal case, or further spread of the disease took place.

LIMERICK; Annacotty.—Sanitary arrangements fair. Measles has been prevalent in one portion of the district, and scarlatina has just broken out in another portion.

LIMERICK; Limerick, No. 3.—The health and sanitary arrangements of the district have been good during the quarter.

LIMERICK; Moroe.—Sanitary condition of district fairly good. No contagious or infectious disease prevalent. Unusually large birth-rate and small death-rate during quarter.

LISTOWEL; Glín.—The sanitary condition of district fairly good.

MITCHELSTOWN; Galbally.—Owing to an unusually severe epidemic of whooping-cough, vaccination had to be postponed. Seven deaths from whooping-cough have been registered this quarter. One case of enteric fever in the district this quarter.

MITCHELSTOWN; Mitchelstown, No. 2.—District healthy.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair.

NEWCASTLE; Newcastle, W.—Scarlatina, typhoid fever, whooping-cough, and influenza in district during quarter; the latter only severe.

RATHKEALE; Askeaton.—During the last quarter whooping-cough was very prevalent amongst the children of the district; it, with pneumonia, caused the deaths of three children.

RATHKEALE; Pallaskenry.—The sanitary arrangements are fairly good.

RATHKEALE; Rathkeale No. 1, W.—The district was particularly healthy during the past quarter, owing, no doubt, in a great measure, to the genial weather. There were only 20 deaths of persons, half of whom died in the Workhouse—16 were over 60 years, one prematurely born, one aged fifteen, and two adults, one certified general debility, and the other uncertified. There was no epidemic or zymotic disease.

RATHKEALE; Rathkeale, No. 2.—There was an epidemic of pertussis during the early part of the quarter in my district.

TIPPERARY; Grean.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; Terryglass.—The district very healthy. No epidemic.

NENAGH; Nenagh, W.—Measles was prevalent during the quarter, not of a severe type.

NENAGH; Newport.—Two cases of diphtheria occurred during quarter, in addition to the three fatal cases registered. District otherwise healthy.

NENAGH; Portroe.—District healthy.

THURLES; Borrisoleigh.—No improvement in the very insanitary state of one town already reported.

THURLES; Moyne.—The sanitary arrangements are in a satisfactory state.

THURLES; Templemore.—District healthy. No prevailing disease.

Tipperary County, South Riding.

CALLAN; Ballingarry.—The health of the district is good.

CALLAN; Mullinahone.—The sanitary condition of the district fairly good. No disease prevalent. Vaccination fairly attended to.

CARRICK-ON-SUIR; Garrangibbon.—The health of the district is in a very satisfactory condition.

CASHEL; Killaquale.—The deaths of five old people aged 96, 85, 84 (two), and 80 years, respectively, have been registered during the quarter. One death from congestion of the lungs following measles. Mild epidemic of measles prevailing in one portion of my district.

CASHEL; Kilpatrick.—Six cases of typhoid fever occurred in one family. Patients were immediately removed to hospital. Mothers were afraid to bring their infants for vaccination on same account.

CLOGHEEN; Caher.—A mild type of whooping-cough is prevalent in the district. The sanitary condition of the district is good.

CLOGHEEN; Clogheen, W.—Whooping-cough prevalent throughout greater part of district, from which a few deaths occurred, owing to pulmonary complications. Vaccinations, owing to same cause, were postponed.

CLONMEL; Clonmel, W.—The district has been very free from zymotic disease, with the exception of a few cases of typhoid fever, which were speedily removed to hospital, and the disease terminated.

CLONMEL; Kilsheelan, No. 1.—Three cases of cerebro-spinal meningitis came under my notice, but in another district. All three cases were fatal.

TIPPERARY; Golden.—I registered during the quarter one death as due to cancer of the stomach in a woman. I could trace no hereditary tendency.

TIPPERARY; Tipperary, W.—The district has been in a fairly healthy condition.

URLINGFORD; Kilcooly.—The district has been very healthy during past quarter.

Waterford County.

CARRICK-ON-SUIR ; Rathgormuck.—The sanitary condition of the district is fairly good. We are quite free from zymotic disease.

CLONMEL ; Ballymacarbry.—No infectious diseases.

CLONMEL ; Kilsheelan, No. 2.—No zymotic disease.

DUNGARVAN ; Dungarvan, W.—There were some cases of scarlatina of a mild type, in urban part of district, during the past quarter.

DUNGARVAN ; Seskinan.—One death registered at 90 years.

DUNGARVAN ; Whitechurch.—District healthy.

KILMACTHOMAS ; Bunmahon.—The district healthy, and free from zymotic diseases.

WATERFORD ; Woodstown.—The health of district is good. There was a fatal case of glanders.

YOUGHAL ; Ardmore.—District healthy.

YOUGHAL ; Clashmore.—One death from typhoid fever.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM ; Doagh.—The district has been fairly free from serious disease during the quarter. Within the last fortnight measles has appeared in several localities.

ANTRIM ; Randalstown.—Measles epidemic. Otherwise district healthy.

ANTRIM ; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good. Measles has broken out in northern part of district; first case seen 15th December.

BALLYCASTLE ; Cushendall.—The sanitary arrangements of the district are fairly good; but they will be vastly improved by the new sewerage and water schemes. The average age of the nine deaths registered in the district during the quarter is 77 years.

BALLYMENA ; Ahoghill.—Health of district very good.

BALLYMENA ; Ballymena, W.—Town and district healthy considering the season.

BALLYMENA ; Broughshane.—The death of a man was registered aged 104 years. The health of district good; no epidemic disease.

BALLYMENA ; Clogh.—I never remember the last quarter of the year with so little sickness—only ten deaths, and seven of those average almost 73 years.

BALLYMENA ; Galgorm.—During the last quarter the district was extremely healthy; no infectious disease.

BALLYMENA ; Portglenone.—An epidemic of whooping-cough occurred during the quarter; otherwise the health of the district is extremely good.

BALLYMONEY ; Castlequarter.—One case of diphtheria, but disease did not spread.

BELFAST ; Belfast Rural, No. 4.—A slight outbreak of scarlatina—all cases sent to hospital.

LARNE ; Ballycarry.—Sanitary condition of district fairly good. Whooping-cough prevalent throughout the district during the quarter; one death registered of a female aged 104 years.

LARNE ; Waterfoot.—The sanitary arrangements of the district are in a very good condition.

LISBURN ; Dunmurry.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN ; Glenavy.—Death average high this quarter, due mostly to pulmonary fatalities. Scarlatina was prevalent for a short time, focussed to one school, the closing of which at once checked the epidemic.

LISBURN ; Knocknadona.—The sanitary condition of this district is good. One death from cancer of prostate, the deceased was aged 81 years.

Armagh County.

ARMAGH ; Markethill.—Whooping-cough is still prevalent in the district and caused one death. District healthy.

ARMAGH ; Rich Hill.—Autumn diarrhoea was very prevalent during earlier part of the quarter, but was of a mild type, only one death occurring from it.

LURGAN ; Lurgan, No. 1, W.—An unvaccinated child from Portadown died from small-pox in the hospital on 29th September, aged one year. Whooping-cough has been very prevalent during the quarter, and was responsible for twelve deaths, of which eight occurred in December; otherwise the district has been very healthy.

LURGAN ; Lurgan, No. 2.—This district is in a fairly good sanitary condition, and free from any infectious disease.

NEWRY ; Mullaghglass.—District healthy.

Belfast County Borough.

BELFAST ; Belfast Urban, No. 8.—Measles epidemic in this district.

BELFAST ; Belfast Urban, No. 12.—Four cases of small-pox occurred during the quarter in the district.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in fairly good sanitary condition.

CAVAN; *Ballyhaise.*—District in good sanitary condition.

CAVAN; *Killashandra.*—District generally healthy; sanitary condition fairly good.

COOTEHILL; *Drum, No. 2.*—Scarlatina of a mild type was prevalent in the last month of quarter.

COOTEHILL; *Tullyvin.*—General good health prevails in this district.

ENNISKILLEN; *Holywell, No. 2.*—The sanitary condition of the district is satisfactory. There is no epidemic disease.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra.*—The sanitary condition of this district is fairly good.

BALLYSHANNON; *Ballyshannon, W.*—Sanitation fairly good.

DONEGAL; *Donegal, W.*—A few cases of scarlatina occurred in one house in an outlying part of this district.

DONEGAL; *Dunkineely.*—Measles of mild type prevalent in one division of this district. Chest affections, especially pneumonia, prevalent, and very fatal in the case of elderly people.

DONEGAL; *Mountcharles.*—District has been free from any epidemic, except a few cases of influenza.

DUNFANAGHY; *Crossroads.*—The district has been unusually free from disease during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District very healthy—a few cases of influenza—not a severe type.

GLENTIES; *Ardara.*—The sanitary arrangements in this district are good.

GLENTIES; *Carrick.*—The sanitary arrangements are fairly good, but I would wish again to draw attention to the inferior or rather impure water supply in one town.

GLENTIES; *Doocherry.*—District healthy.

GLENTIES; *Dunglow, No. 2.*—District very healthy.

GLENTIES; *Killybegs.*—Sanitary condition of district fairly good. One case of scarlet fever in district during quarter. This was the only case of infectious disease in district.

INISHOWEN; *Clonmany.*—Owing to a severe cold among the children there were no vaccinations. The sanitary arrangements very good.

INISHOWEN; *Malin.*—District healthy.

INISHOWEN; *Moiville.*—During the quarter there were a few cases of scarlatina, there were two deaths from same; one not yet registered; isolation of patients and disinfection carried out in all cases. The cases occurred in different parts of the district, and the families had no communication with one another.

LETTERKENNY; *Church Hill.*—District healthy. No epidemic.

MILLFORD; *Fanad.*—District healthy. One death registered at 101 years.

MILLFORD; *Rathmullan.*—The District has been very healthy.

STRABANE; *Raphoe.*—Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon.*—District in fairly healthy condition. Sanitation progressive.

Down County.

BANBRIDGE; *Ballyward.*—Sanitary state of district fair. Whooping-cough epidemic has returned. Some vaccinations.

BANBRIDGE; *Crossgar.*—There was one case of typhoid fever during the quarter, the disease did not spread. There were several cases of scarlet fever, but no new cases recently.

BANBRIDGE; *Loughbrickland.*—The sanitary arrangements in the district are good. Whooping-cough was prevalent in the village of Loughbrickland and neighbourhood, and there were four cases of scarlatina during the quarter.

DOWNPATRICK; *Ballynahinch.*—There have been numerous cases of measles of a severe type throughout the district during the quarter.

DOWNPATRICK; *Downpatrick, W.*—Four of the primary vaccinations were of children born out of district.

DOWNPATRICK; *Killough.*—Measles has been prevalent during the quarter and interfered with vaccination; cases of scarlet fever and of diphtheria also occurred, happily without any fatality.

DOWNPATRICK; *Killyleagh.*—During the quarter just ended there has been an epidemic of diphtheria and measles, and some cases of scarlet fever. There have been seven fatal cases of diphtheria. Five of these were not treated with the antitoxic serum, and the other two were seen too late to give it a fair chance.

DOWNPATRICK; *Portaferry.*—The health of this district has been very good during the quarter. No case of infectious disease.

DOWNPATRICK; *Strangford.*—Of the 8 deaths registered during the quarter 7 were of persons aged 60 years and upwards. The health of the population has been remarkably good.

KILKEEL; Kilkeel, No. 2, W.—Smallest death rate in 30 years.

KILKEEL; Rosstrevor.—Public health most excellent.

LISBURN; Drumbeg.—Births are about the average. One death of a person was registered 104 years of age, and I have reason to believe it is correct. The outbreak of scarlatina that occurred in July has disappeared.

LISBURN; Saintfield.—The health of the district very good.

LURGAN; Moira.—A remarkably small death rate this quarter, very little over half average; nearly one-half these of persons aged over 60 years. Two deaths at 88 and 91 years respectively. Birth rate about average.

LURGAN; Waringstown.—Six cases of enteric fever and six cases of scarlet fever were reported to me as Medical Officer of Health during the quarter. These cases were principally in one portion of my district. In another portion of my district whooping-cough was prevalent, and one death was registered from this disease. The most of the enteric and scarlet fever patients were removed to the union hospital. Death rate is very low—lower than last quarter.

NEWRY; Donaghmore.—District very healthy, and sanitary arrangements good.

NEWRY; Rathfriland.—Births and deaths about the average.

NEWTOWNARDS; Bangor.—Sanitary arrangements good. Whooping-cough prevalent in one part of district; one death occurred. Vaccination well carried out.

NEWTOWNARDS; Comber.—Health of district good. Sanitary arrangements very fair.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Of diseases epidemic in the district during the quarter, pertussis (whooping-cough) and measles were in several townlands. Influenza general throughout the district.

NEWTOWNARDS; Newtownards, W.—Thirty-three cases of scarlet fever were notified during the past quarter. The greater number were removed to hospital; those nursed at home were well isolated. Disinfecting and other precautions were carried out by Sanitary Authority.

Fermanagh County.

BALLYSHANNON; Church Hill.—District healthy during last quarter.

ENNISKILLEN; Enniskillen, W.—Sanitary arrangements fairly good.

ENNISKILLEN; Florencecourt.—No outbreak of any infectious disease occurred during the quarter in the district; sanitation fairly good.

ENNISKILLEN; Holywell, No. 1.—The district is healthy. No epidemic disease during the quarter.

IRVINESTOWN; Ederney.—A case of a woman whose age was stated to be 102 years was registered during the quarter. There is still living in the same village, Ederney, hale and hearty, a man aged 107 years. I also registered the deaths of persons aged 68, 72, 73, 75, 80, and 84 years respectively.

LISNASKEA; Derrylin.—There have been scarlatina and mumps in the district during the quarter. District is never free from phthisis or allied diseases. Sanitary condition as before.

LISNASKEA; Lisnaskea, W.—Death rate very low during quarter—most of persons registered being aged 60 years and upwards.

Londonderry County and Co. Borough.

COLERAINE; Aghadowey.—District very healthy.

COLERAINE; Coleraine, W.—Three deaths from tuberculosis occurred in the Urban District and two in the Rural District. Four deaths from cancer in Urban District. Could get no particulars of hereditary tendency in any of the cases.

COLERAINE; Garvagh.—Health of district good. Influenza just begun to appear. Only 14 deaths registered during quarter, 7 of these were of persons aged over 60 years. One of these was a well-authenticated case of 107 years.

COLERAINE; Killea.—District at present fairly healthy. Two cases of diphtheria occurred during the quarter, and one death was registered as resulting therefrom. However, strict precautionary measures were taken to prevent the further spread of the disease.

COLERAINE; Portstewart.—District healthy.

LIMAVADY; Ballykelly.—Number of deaths much below average.

LIMAVADY; Bellarena.—District free from contagious disease.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory. Mortality considerably under average and principally due to senility. Three deaths from phthisis—in one a hereditary history, other two not; their ages were 14, 18, and 21 years respectively. Two deaths from cancer—one of stomach, the other of lower jaw and neck; in both cases no hereditary element can be elicited.

LIMAVADY; Limavady, W.—No traces of family histories could be discovered in the cases of cancer registered, 11 of the 22 deaths were registered at ages varying from 75 to 90 years, whilst 6 others were over 60 years. 9 deaths occurred in the Workhouse Infirmary.

LONDONDERRY; *Eglinton*.—The number of births registered in the district is remarkably small for the quarter.

LONDONDERRY; *Waterside Urban, W.*—One death occurred in Union Workhouse of a woman, aged 100 years.

MAGHERAFELT; *Moneymore*.—Three cases of scarlatina took place in the beginning of December in one family, but no deaths; and owing to isolation no other case arose from that source—cause not known. Two other children became affected from same disease about the middle of December, having no connection with the first ones—disease believed to have been caught in a railway carriage. At the beginning of same month an outbreak of diphtheria occurred—first person affected, an adult case, cause not known; was about a week ill before receiving treatment; serum used, but he died same night. A brother who took the disease was sent to hospital and recovered; no other case took place from that source.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Vaccination suspended because of the prevalence of scarlatina in the district. Two cases, which are not yet registered, proved fatal.

CARRICKMACROSS; *Donaghmoyne*.—Scarlet fever appeared in one part of district, but does not seem to have spread.

CASTLEBLAYNEY; *Ballybay*.—An epidemic of scarlatina prevailed in the district during the quarter; no fatal case occurred. One case of typhus was treated.

CASTLEBLAYNEY; *Newtownhamilton No. 2*.—A number of diphtheria cases; two fatal.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fairly good.

COOTEHILL; *Drum, No. 1*.—Scarlatina of a mild type was present during the last six weeks of quarter.

MONAGHAN; *Castleshane*.—District sanitary. An occasional case of scarlet fever—from late epidemic; whooping-cough prevalent.

MONAGHAN; *Emyvale*.—Sanitary condition of the district is satisfactory. There has been a diminution of vaccination owing to severity of weather.

MONAGHAN; *Kilmore*.—Some cases of scarlatina and pertussis (whooping-cough).

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in the district are satisfactory; and there has been no epidemic of any description during the quarter. There are no circumstances affecting the public health or vaccination which I consider necessary to bring under notice.

MONAGHAN; *Scotstown*.—The sanitary state of the district is satisfactory.

Tyrone County.

CASTLEBERG; *Castleberg, W.*—Sanitary state of district very satisfactory; no epidemic of any kind. Vaccination well carried out during past quarter.

CASTLEBERG; *Drumquin*.—The sanitary state of the district is satisfactory, with no infectious diseases of any sort.

CLOGHER; *Aughnacloy*.—The district has been free from infectious disease during the quarter, except a few mild cases of influenza.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter, and the death rate was low.

COOKSTOWN; *Coagh*.—Two cases of diphtheria occurred in the district during the quarter—one terminating fatally.

COOKSTOWN; *Cookstown, W.*—There has been an outbreak of diphtheria in the district—one death registered therefrom.

COOKSTOWN; *Pomeroy*.—This district is healthy and in a sanitary condition.

COOKSTOWN; *Stewartstown*.—Sixteen deaths registered during quarter at ages ranging from 60 to 102 years. At present there are a number of people sick.

DUNGANNON; *Caledon and Ballymagran*.—Health of the public generally good. Three cases of enteric fever; all recovered. One case of scarlatina.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—Cases of membranous croup, enteric fever, scarlatina, and erysipelas were reported during the quarter. Except for these four there were no other forms of infectious disease.

IRVINESTOWN; *Trillick*.—The district is at present healthy. Of the deaths registered, six reached the ages of 88, 84, 82, 80, 78, and 74 years respectively.

OMAGH; *Dromore*.—District is perfectly healthy.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory. None of the principal epidemics or other diseases are prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The death rate has been very low for this season of the year. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—The sanitary condition of the rural district is fairly satisfactory; of the urban the same cannot be said. We have typhoid fever, scarlatina, &c., prevalent during the quarter.

OMAGH; *Omagh*, No. 2.—This district is in good sanitary condition. One death registered, of a person aged 106 years; he retained all his faculties to the last.

OMAGH; *Sixmilecross*.—The sanitary arrangements in this district are very good at present; no epidemic of any kind.

STRABANE; *Newtown Stewart*.—The number of deaths aged 60 years and upwards should probably be greater than the number so returned, as owing to increase of small life assurances many of the ages as given are, I suspect, understated. This does not apply particularly to this quarter alone.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Roundstone*, No. 1.—The district is quite sanitary now, but one case of mild diphtheria was reported during the quarter.

CLIFDEN; *Roundstone*, No. 2.—The district is fairly healthy.

GALWAY; *Galway*, No. 3 (Arran).—One death from scarlet fever, and there are other cases through district at present.

GALWAY; *Oranmore*.—Enteric fever broke out about a month ago in one village. There were two cases which were immediately removed to hospital. The water supply of that village is under consideration. I am new to the district, and do not know it thoroughly yet. The main things I notice dangerous to health are the proximity of manure to the dwellings, and the keeping of animals in the dwelling-houses.

GALWAY; *Turloughmore*.—One case of epithelioma of face. An epidemic of catarrhal influenza.

GLENNAMADDY; *Glennamaddy*, W.—There were two deaths registered from cancer of the stomach, a man aged 65 and a woman aged 57 years respectively.

GLENNAMADDY; *Williamstown*.—There has been an epidemic of scarlatina during quarter. The district otherwise was free from infectious diseases.

GORT; *Ardrahan*.—Death from scarlatina not certified by medical evidence.

GORT; *Gort*, W.—Several cases of sore throat, the temperature running to 103 degs. F., and in one case to 104 degs. F., have occurred during the quarter, as well as one case of scarlatina. The throats were free from membrane, and there was no glandular enlargement. The acute symptoms lasted four or five days. There were many cases of ordinary cold and a few of influenza.

GORT; *Kinvarra*.—One death from scarlatina and broncho-pneumonia has been registered. The disease did not spread. The number of births registered is much below the average.

LOUGHREA; *Athenry*.—District fairly healthy. No contagious or infectious disease prevalent during quarter.

LOUGHREA; *Bullaun*.—Deaths were registered of old people aged 63, 68, 70 (two), 77, 79, 82, and 87 years respectively.

LOUGHTERARD; *Loughterard*, W.—One death of a woman at the age of 107 years; she retained all her faculties up to the end.

Leitrim County.

BALLYSHANNON; *Kinlough*.—One death at the age of 96 years was registered this quarter. Two deaths from cancer of the stomach.

BAWNBOY; *Ballinamore*.—No epidemics. Sanitary condition of district fair.

MANORHAMILTON; *Lurganboy*.—Vaccinations were not performed owing to severity of weather. There were no defaulters at end of last quarter. Of the 23 deaths, it will be noticed that 18 were aged 60 years and upwards.

MANORHAMILTON; *Manorhamilton*, W.—The ages of five old women, registered consecutively, tot up to 421 years.

MOHILL; *Carrigallen*.—The health of the district was good during the quarter, with exception of some cases of diphtheria, which occurred in five houses in different portions of the district, widely separated, and having no intercommunication.

MOHILL; *Mohill*, W.—There was one case of cancer on foot. Deceased was 12 months bad. It was never known to be in the family before. They attributed it to going without shoes on a rough street.

MOHILL; *Rinn*.—The district is healthy, and free from epidemics.

Mayo County.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements good.

BALLINROBE; *Hollymount*.—Births under the average. Measles and whooping-cough epidemics are now dying out.

BELMULLET; *Bangor*.—Health of district during last quarter excellent, and district free from all forms of zymotic disease. Registration and vaccination satisfactory. The town of Bangor, I am glad to say, has been recently provided with a good supply of pure spring water. The water is conveyed to the town in metal pipes from an adjacent mountain. Formerly the people depended on river water, the Owenmore, or some of its small tributaries, which was too frequently not above suspicion. Sanitation progressive.

BLMULLET; Knocknallower.—Four cases of enteric fever occurred in the district during the last quarter; all recovered.

CASTLEBAR; Castlebar, No. 1, W.—One death of a man aged 105 years was registered. The man retained possession of all faculties until his last illness. Health of the district very good.

CLAREMORRIS; Ballindine.—There were four cases of scarlatina during the quarter.

CLAREMORRIS; Ballyhaunis.—Health of the district during the quarter has been good. Measles and whooping-cough of a mild type prevailed rather extensively. Six of the deaths registered were 80 years and upwards. Sanitation progressive, with a marked improvement in the condition of the dwellings of the poor.

KILLALA; Killala, W.—The health of the district was good during the quarter. There were some cases of diphtheria.

SWINEFORD; Lowpark.—Three cases of diphtheria died, not yet registered.

WESTPORT; Achill.—General health and sanitary state of district good, and no epidemic present. No children presented for vaccination.

WESTPORT; Ballycroy.—Influenza and whooping-cough very prevalent. One death from diphtheria and one from measles registered during quarter.

WESTPORT; Louisburgh.—District healthy.

WESTPORT; Newport.—Sanitary condition fairly good.

WESTPORT; Westport, W.—Two deaths from cancer.

Roscommon County.

ATHLONE; Brideswell.—The health and sanitation of district are fairly satisfactory.

BOYLE; Boyle No. 1, W.—No epidemic. District was healthy.

BOYLE; Keadew.—Sanitary arrangement fair. Diphtheria showed itself in this district during quarter.

CARRICK-ON-SHANNON; Aughrim.—The district is in good sanitary condition. Only

five deaths were registered during the quarter. Of these, four were over 60 years of age, and the fifth was aged 59 years. No case of infectious disease of any kind.

CASTLEREAGH; Ballaghaderreen.—District fairly healthy. No death from zymotic disease.

ROSCOMMON; Ballyleague.—The doctor postponed all vaccinations until March or April next.

STROKESTOWN; Roosky.—The district is in a healthy condition. Sanitary arrangements fairly satisfactory. One half of the deaths registered were of persons whose ages ranged from 60 to 86 years of age.

STROKESTOWN; Strokestown, W.—Sanitary condition of district is good.

Sligo County.

BOYLE; Ballyfarnan No. 2.—No epidemic. District healthy.

DROMORE WEST; Easky, W.—Health of district good. Sanitation progressing. No case of fever during quarter in district.

DROMORE WEST; Skreen.—A single case of diphtheria, its origin not traceable, resulting in recovery.

SLIGO; Ballymote.—Sanitary arrangements good. A suspected case of small-pox has occurred in the district just now, but although the rash is very much like that of small-pox, I am of opinion it is not, since the temperature was normal in the pustular stage, and the rash was in all stages of formation.

SLIGO; Carney, No. 1.—Sanitary arrangements fairly good. Health of the district good.

SLIGO; Carney, No. 2.—The district healthy.

SLIGO; Collooney.—Four cases of diphtheria during quarter: one death.

SLIGO; Riverstown.—No zymotic disease this quarter.

TOBERCERRY; Coolaney.—Health of district generally good. Sanitary arrangements fairly good.

TOBERCERRY; Tobercurry, W.—Eleven cases of typhus fever occurred during the quarter, ten of which were in the one house, and the other a mile distant.
